RARE COIN AUCTIONS

OFFICIAL AUCTIONEER OF THE PCGS MEMBERS ONLY SHOW

THE REGENCY AUCTION

XIX

DECEMBER 15 | LAS VEGAS | THE VENETIAN

Welcome friends!

This is our 19th Regency Auction, and perhaps offering one of the best selection of coins yet. In the pages that follow you will find many great coins to add to your collection; from very nice collector coins to major rarities. The stars of the auction have been promoted for months now, making their way around the circuit: The Angel Dee's Buffalo Nickel Set; the Young-Dakota Proof Barber Dime Set; duplicates from the Cheyenne Collection of Proof Barber Quarters; the Brand-Knoxville-Morelan 1795 Draped Bust Dollar in PCGS MS65 CAC; and the Northern Lights Collection, Part 2.

Between these highlights, there are numerous coins from many different consignors. Are you interested in Mint State large cents? We have a gorgeous 1795 and 1798. Do you collect Matte Proof Lincolns? Feast your eyes on the TWO superb 1916s. Seated Dimes strike your fancy? There is a wonderful selection, consigned by one of the foremost collectors of the series. As usual we have a great group of Bust Half Dollars, always popular among novices and advanced collectors. As in our Regency 18 Auction, we have a collection of Carson City Morgan dollars, each GEM hand selected for eye appeal and quality; built exclusively by our sister firm, Legend Numismatics. Always gold bugs, we are pleased with the diverse offering of gold coins, which features many rare dates and some finest certified examples. We round out the sale with a really fresh group of 1858-59 Transitional Indian Cent Patterns and some Standard Silver issues.

In all, the 514 lots in the Regency 19 Auction will entice the novice collector and delight and challenge the advanced numismatist. As always it has been a delight to work with our consignors. Each coin was hand selected by our world-class numismatists. We rejected over 100 coins that were consigned to us for this sale. We reject coins that do not meet our quality or value standards. This ensures that you, the bidder, will be able to easily find coins of interest (without having to go through many subpar coins), and will be happy with the coins you purchase. Our motto is "a happy buyer will make a happy seller."

As we look at the end of 2016 and the beginning of 2017, we wish everyone a very happy, healthy, and prosperous new year. We are looking forward to what 2017 has to offer. Remember we are always looking for consignments for our Regency and Sessions auctions. If you have coins to consign, be sure to give us a call. We have proven over the course of 19 Regency Sales, that Legend Rare Coin Auctions' boutique style gets the same, or better, results than the "bigger" companies. We look forward to working with you!

Happy Collecting!

Best wishes,

Julie Abrams

Terms and Conditions

This is a public auction, conducted in accordance with these Terms and Conditions of Sale, by Legend Rare Coin Auctions (hereinafter referred to as "LRCA"). By bidding on any lot offered by LRCA, the bidder indicates acceptance of the following Terms and Conditions of Sale. Bidders are to comply with the Terms and Conditions of Sale, posted on LegendAuctions.com, at the time of the auction in which they are participating.

Buyer's Premium

A 17.5% buyer's premium will be added to all successful bids, and is payable by the winning bidder as part of the total purchase cost.

Sales Tax

All sales are subject to applicable state and local taxes. Any lots that are picked up and/or delivered in the state of Nevada are subject to applicable state and local taxes.

Payment

All merchandise must be paid for within TEN (10) days of the date of sale. We reserve the right to cancel any unpaid order after that time and to ban the bidder from future sales. Credit cards (Visa, MasterCard and Discover) are accepted for auction payments up to \$2,500.00 per invoice. Invoices and/or balances over \$2,500.00 must be paid via personal or certified check, money order, or wired funds. Personal checks, money orders and cashier's checks may be held for up to 10 business days in order to allow time for them to clear appropriate banking channels. Please email info@legendauctions.com for bank-wiring instructions and/or to provide numismatic references.

Return Policy

All lots are sold "as is." Lots graded by PCGS, NGC or other third-party grading services, or any lot viewed by the buyer or anyone on buyer's behalf prior to the auction, may not be returned. This is not an approval sale. All sales of lots to the highest bidder are final. Bidders are strongly advised and encouraged to research any lots upon which they plan to bid, and to determine bids, based upon their own evaluation. Bidders assume all risks concerning and related to the grade, quality, appearance, condition, history and origin of any lot. Bidders acknowledge that coin grading is not an exact science, that it can be subjective and inconsistent and that it is possible that two parties might assess or grade the same coin differently. LRCA makes every effort to accurately describe all items offered in its sales. All items will be available for preview prior to the auction.

Shipping

Shipping costs will be billed separately and are non-refundable. Items will usually ship within 5-10 business days after payment has been received and/or funds have cleared. Coins will be shipped via Fed Ex or USPS or transported via armored carrier.

The shipping charge includes fees for our third-party insurance coverage, as well as any costs incurred through the USPS or Federal Express. Any shipments made via armored carrier (Brinks, Dunbar, etc.) will be calculated and assessed at the time of shipment.

International Shipping

It is not possible for LRCA to ship to some countries. Please email questions to info@legendauctions.com. Payment for all international orders is required in US funds. Please contact julie@legendauctions.com for bank wiring instructions.

Customs requirements for each country are the responsibility of the buyer. All packages shipped outside of the United States will include the required customs declaration and full value of the invoice.

Bids Via Telephone

An absentee bidder may also participate live, during the auction, via telephone. Requests for phone bidding must be received at least three days prior to the auction date. Please fill out our phone bidding request form online or call 732-935-1168 to request a call from one of our representatives during the live auction. LRCA cannot guarantee phone lines, but will make every effort to accommodate those who wish to participate via this method.

Rights & Responsibilities

The auctioneer will determine the highest bidder. The auctioneer, alone, has the right to reopen the bidding for an item, if deemed necessary. LRCA and its representatives reserve the right to remove any attendees who impede the preview and/or the auction. Title to all merchandise shall pass to the winning bidder after receipt of good funds by LRCA. Bidders will be held responsible for their bids, including those bids placed incorrectly. PLEASE VERIFY BIDS BEFORE SUBMITTING THEM. In order to have a bid removed or corrected, bidder must contact LRCA prior to start of the auction. Bidder waives auctioneer's responsibility and holds LRCA harmless for failure to recognize, accept, receive or execute any lost or missing bids by internet, telephone, email, floor bid, fax, mail or other means. LRCA reserves the right to postpone or cancel an auction without notice. Lots may be withdrawn at LRCA's discretion, without prior notice. Lots may carry a reserve. A reserve is a price below which the auctioneer will not sell an item, or will re-purchase the item on behalf of the consignor or for LRCA. LRCA permits bids to be placed by the auctioneer, or an employee of the auctioneer, up to the pre-determined reserve set by the consignor. Legend Rare Coin Auctions' partner, Legend Numismatics, reserves the right to bid on items, for its own account and for the accounts of its clients.

PRINCIPALS

Laura Sperber
Partner

Laura was raised in Highland Park, NJ. During high school, the coin bug hit her hard. Her trip to the 1976 NYC ANA left a lasting mark and huge desire for her to own and handle the greatest rarities. While attending Monmouth University, Laura attended coin shows more than classes. After college, she started LSS RCI, a wholesale coin company. In 1986, she realized the need for a "better" coin retailer and teamed up in 1986 with George Huang to form Legend Numismatics.

In 1996 Bruce Morelan became a partner and since then Legend has exclusively built or assisted in assembling this generation's greatest collections. In 2012 Laura saw the need for a smaller, boutique auction firm, and created Legend-Morphy with Dan Morphy, whom she split with in 2014. Today, Laura is also a leading consumer advocate for coins. The passion has never subsided, and she keeps a beautiful Proof Walker on her desk to this day.

Bruce Morelan
Partner

Bruce started collecting coins when he was only six years old and by the time he was in high school his dream was to be a coin dealer. But life intervened and instead, Bruce went into business. By chance, he became Legend Numismatics' financial backer in 1996. His great grandmother had given him three coins when he was young, one of which being a Trade Dollar, so he set out to build the finest Trade Dollar set. After a few years with ultra rarities, Bruce returned to his love of dollars and completed both a set of Gobrechts and a set of Seated Dollars.

After selling those sets, Bruce recently returned to dollars with a new Gobrecht set and a spectacular early dollar set capped by his dream coin, the Amon Carter 1794 Dollar. Not many collectors can say they have completed not only the finest 1794-1885 Dollar Sets and have over the years owned such coins as two 1913 Liberty Head Nickels, an 1894-S Dime, 1876-CC Twenty Cent piece, 1827 Original and Restrike Quarters, 1838-O Half Dollar, two 1885 Trade Dollars and four 1884 Trade Dollars!

Julie Abrams
President

Julie Abrams started in numismatics in 1986 when she joined up with Bernard Rome and launched Teletrade, the first computerized auction company. Teletrade developed a unique coin trading method, utilizing state-of-the-art digitized voice board technology to run live auctions before the advent of the internet. As President of Teletrade, Julie helped expand the company, increasing the frequency of auctions and expanding annual sales to \$24 million within a few years. In 1999, GMAI, a publicly traded company, purchased Teletrade and Ms. Abrams became Executive Vice President of Sales for the parent company. Her job responsibilities included continuing her role as CEO for Teletrade as well as marketing to buyers and consignors, with the goal of maintaining a balance between inventory and sales while growing the business.

In 2004 she joined Stacks-Bowers, an old world traditional auction house where she worked to expand their e-commerce presence, including the development of an online bidding platform for the firm. She also marketed Stacks' programs to secure consignments from dealers and institutions such as banks, museums and universities.

Julie is a member of the American Numismatic Association, the Central States Numismatic Association and Florida United Numismatists.

LOT 1

1C 1794 HEAD OF 1794 S-59 PCGS MS63 BN CAC EX NAFTZGER-REYNOLDS

Just the names Naftzger and Reynolds should be an indication as to the quality of this beautiful early large cent. Steely brown luster shows light tan-gold in the protected areas of the well struck devices. Some light ticks are noted here and there, but blend nicely and are not noticeable without a glass. Middle to late die state for this R-3 variety with a couple of reverse die cracks, most prominent at the lower portion going through the fraction to the A in AMERICA. Depending on the EAC condition census you follow this is either 4th or 5th finest.

Not only does this marvelous Choice Brown 1794 offer a great eye appeal, but it also boasts a great provenance going back to the early 1960s: Herbert Dietz Collection, Stack's April 1962, lot 271; Stack's October 1966, lot 46; Gilbert Steinberg, Stack's 1976 ANA Auction, August 1976, lot 232; Del Bland; Herman Halperin Collection, Stack's March 1988, lot 80, Ted Naftzger, 1990 EAC Auction, lot 27; Tom Reynolds Collection, Goldberg's January 2016, lot 36. The lot tickets from the 76 ANA auction, the Herman Halperin sale, and Naftzger's envelope are all included.

PCGS 25, NGC 1, CAC 4. This coin sold for \$29,375 in the Reynolds Sale, on an estimate of \$40,000+; at the time of that sale, the market was very depressed, having succumbed to the triple whammy of plunging gold, oil, and stock prices. Since then, the market overall has firmed up and since there hasn't been a major collection of Large Cents sold since, we think this coin should bring more today. If you are looking for a 1794 large cent for a type set, or need one for a date set, this exceptional coin will serve either purpose brilliantly!

PCGS # 3539 | EST: \$29,000+

LOT 2

1C 1798 S-166. 2ND HAIR STYLE PCGS MS64 BN CAC EX NAFTZGER-REYNOLDS

What an awesome early large cent! One of the worst kept secrets in all of numismatics is how much the principles at our sister company, Legend Numismatics, loves high end copper, and this coin is one that would appeal to even the pickiest of collectors.

First, the luster swirls on satin smooth surfaces. Even medium brown shows hints of a lighter golden tone in areas. The strike is razor sharp throughout. Even with a strong glass, we cannot find a single spot or stain that would distract, but tiny abrasion is noted in front of Liberty's bust. The obverse die was slightly misaligned shifting the design up towards 1:00. Struck from clashed dies, and the reverse has a heavy die crack that goes from E in UNITED through the wreath and arcs down to about 6:00.

The extensive pedigree is as impressive as the physical qualities. Beckwith Collection (Chapman, April 1923, lot 17); Henry Hines; Dr. William Sheldon; Roy "Ted" Naftzger; Eric Streiner; Denis Loring; John MacDonald; Tom Reynolds Collection (Goldberg's, January 2016, lot 162) at \$18,212. This near GEM is ranked among the finest, and depending on which census you follow, it falls somewhere between CC#1 and CC#5; it is also plated in several of the major references on early cents.

PCGS 7, NGC 1, CAC 5. For the 2nd Hair Style type, only 3 are finer in the BN color designation, none are CAC approved. This well preserved coin will serve wonderfully in an advanced type or date set. The current PCGS Price Guide value is listed at \$50,000. We think whoever purchases this near-GEM will have as hard a time putting it down as we have!

PCGS # 36068 | EST: \$25,000+

LOT 3

1C 1824/2 PCGS MS63 BN CAC EX ELIASBERG

Scintillating steel and olive patina over smooth brown. Bold luster throughout both sides of this well struck CHOICE example of the over date. Under close inspection we can see some tiny marks but none that are distracting.

This attractive large cent has been a part of three of the great collections of the 20th/early 21st century. Starting with the Louis Eliasberg collection, this coin sold as lot 556 in the B&M/Stack's May 1996 auction. At the sale, Dr. Juan XII Soros bought this coin from the Eliasberg sale, and it was part of his collection that focused on overdates. The Soros sale was auctioned by Superior in February 1999. Gene Gardner ended up with this coin, where it sold in the sale of his collection, June 2014, where it was NGC MS63 BN without CAC approval.

PCGS 5, NGC 3, CAC 2. The last PCGS example to sell was NOT CAC approved and realized \$32,900 in the 2013 ANA auction. As mentioned above, this coin last sold in a non-CAC NGC holder, and sold for a decidedly soft \$14,100 (it sold for \$8,800 uncertified in the original Eliasberg sale). The current PCGS value is \$36,500.

Now that it has been crossed over to PCGS and is CAC-approved, there will be much more demand from specialized collectors in our sale. There are only 4 coins graded finer, none have sold. If you are interested in condition census, rare date large cents, be sure to bid liberally on this CHOICE coin.

PCGS # 1639 | EST: \$25,000+

LOT 4

1C 1844/81 NEWCOMB-2. PCGS MS63 BN CAC EX DAN HOLMES COLLECTION

A very choice example of this blundered date. The underdigits can be seen with the naked eye. Lustrous chocolate brown surfaces show some satiny luster and tinges of subtle mint color can be seen with effort. The reverse has steely-olive overtones and it takes a strong glass to find even the slightest little tick.

PCGS 2, NGC 1, CAC 1. Currently listed as # 6 in the Grellman Census, this is the Robinson S. Brown-Dan Holmes coin. It sold in the January 2011 auction of the Dan Holmes Collection for \$6,325. All the pedigree info is included with this lot. This coin has graced two of the most famous collections of Large Cents, and it can now be yours!

PCGS # 397722 | EST: \$4,000+

LOT 5

1C 1857 SMALL DATE. PCGS PR66 BN CAC

Wow, this SUPERB PR large cent has bold eye appeal. The devices are razor sharp, every minute detail in Liberty's hair, is fully defined. The deep chocolate patina and chiseled strike give this GEM the look of a copper-bronzed medal struck at the mint during this era. Accents of azure and olive patina can be seen on the rich mirrors adding to the amazing eye appeal.

Only 238 proof 1857 large cents were struck. PCGS 5, NGC 10, CAC 4. The most recent PCGS/CAC example to sell was graded PR65 BN and realized \$8,813 in November 2013. No CAC approved PR66 BNs have ever sold in auction. The current PCGS Price Guide for PR66 BN is listed at \$17,500.

This GEM will surely attract much bidding activity when it crosses the block.

PCGS # 2000 | EST: \$10,000+

LOT 6

1C 1857 FLYING EAGLE. PCGS MS65

A pretty MS65 example of the first year the small cent was struck for general circulation. A glowing tan-gold luster shines on both sides of this well struck example. Consistent with the grade we note only a couple of insignificant hidden ticks.

PCGS 236, NGC 226. The most recent PCGS MS65 to sell was in the 2016 ANA auction, realizing a price of \$3,173. The CU value is listed at \$4,250, which in the current market seems a tad high. This is a very pleasing coin and should bring around what the last 65 sold for.

PCGS # 2016 | EST: \$2,750+

LOT 7

1C 1858 SMALL LETTERS. PCGS MS66

For the Small Letters variety, there are only 2 MS66+s that are graded higher at PCGS. This marvelous GEM has a vibrant cartwheel mint luster that rolls along icy-smooth surfaces. The design elements are expertly struck rendering razor sharp definition on both sides. Mostly a light copper-golden-tan, we can observe some deeper coppery hues. There is a single unobtrusive fleck on the obverse, near the eagle's talon.

PCGS 12, NGC 16. In January 2016, a PCGS MS66 sold for \$18,800, and before that, in October 2014, one sold for \$24,675. There are two MS66+s graded at PCGS, neither have ever sold in auction. The current PCGS Price Guide is listed at \$24,500. If you are building a GEM set of Flyers or need one for a GEM type set, this beauty is well worth strong consideration. We think the bidding will really take off when this one opens for bidding.

PCGS # 2020 | EST: \$15,000+

LOT 8

1C 1857 FLYING EAGLE. PCGS PR64 CAM CAC

A boldly contrasted example of this RARE proof issue. It is a widely accepted fact that the 1857 PR Flying Eagle cent is tied with the Large Letters 1858 for being the scarcest proof in the short series; much more so than the highly coveted and much higher priced 1856.

The fields are boldly mirrored showing a lovely golden-tan color.

The eagle and wreath design elements are nice and frosty, contrasting nicely with the mirrored fields. The cameo contrast is particularly rare on this issue, most examples are more of a brilliant proof in nature. Close inspection reveals a few minor flecks, but none are serious. Due to the new planchet composition, many proofs do show weakness in strike as is the case here. Some of the highpoint details on the wreath, tip of the eagle's tail feathers, and some of the obverse lettering are not full.

Only 425 were originally struck. PCGS 9, NGC 0, CAC 3. Not only is this coin CAC, but for specialists in the series, do note that it is also Eagle Eye Photo Seal approved. This is NOT the coin that sold in February 2016 for \$9,888, but rather the example that sold in an April 2014 online auction for \$15,565. The current PCGS Price Guide is \$14,500. This is a great looking coin and is destined for a special set of PR small cents.

PCGS # 82040 | EST: \$10,000+

LOT 9

1C 1858 SMALL LETTERS. PCGS PR63 CAC

A very rare proof Flying Eagle cent. Choice quality surfaces boast bold mirrors that accentuate a rich orange-tan coloration on the obverse and a rosy-pink patina over golden-tan surfaces on the reverse. A few light specks on the obverse and a tiny contact mark are all that limit the grade. At first glance, this coin has the impression of a higher grade.

Despite the small mintage of 200 for the Small Letters variant, and there are 4 die marriages for the Small Date listed by Rick Snow. This coin is the High Leaves variety, listed as S-PR-1. It is a very scarce variety, as would be imagined given the low mintage in general.

PCGS 11, NGC 1, CAC 3. The last example sold in the 2012 ANA auction, realizing \$7,050, the same price a non-CAC PR64 sold for in December 2014. This coin, housed in an OGH and bearing not just CAC-approval, but the specialized Eagle Eye Photo Seal as well, this coin has a lot going for it, in addition to its great eye appeal. The current PCGS Price Guide is \$7,650 and that level may get challenged when this Flyer sells.

PCGS # 2043 | EST: \$6,500+

LOT 10

1C 1860 POINTED BUST. PCGS MS66 CAC

This SUPERB gem also has the approval of the Eagle Eye Photo Seal. A bold golden-tan luster revolves around silken surfaces, free of all but the most microscopic ticks. Add to the great color and luster a bold strike and you have one PQ copper-nickel cent.

PCGS 11, NGC 2, CAC 4. The most recent example to sell in auction realized \$7,638 in December 2015, and while the last seven examples have sold in the \$7,000-\$8,200 range, PCGS graded examples have APRs into the \$12,000-\$15,000 range. The current PCGS Price Guide lists a value of \$10,500 in MS66. There is a single MS67 finer, which sold for \$32,900 in February 2014. This GEM will certainly bring a premium price to a specialist who wants the very finest.

PCGS # 2056 | EST: \$6,000+

LOT 11

1C 1877 PCGS MS63 BN

Housed in an old Green Label holder. The KEY to the Indian cent series, and in demand from collectors in all grades, from AG through GEM BU. Pleasing golden brown surfaces show a soft satin luster and a hint of woodgrain. The devices are well struck and there are no carbon spots, flecks, or serious ticks to be found, even with a strong loupe.

PCGS 59, NGC 30. The last non-CAC approved 1877 Indian cent sold for \$4,112 back in the 2015 CSNS sale and that coin had no where near the eye appeal of this one. It was brown and lifeless with a rather serious carbon spot on the obverse. This coin is clearly finer offering much more eye appeal. The current PCGS Price Guide is \$5,500. If you need a Mint State example for your set, this one is certainly worth looking at!

PCGS # 2127 | EST: \$3,600+

LOT 12

1C 1909-S INDIAN. PCGS MS65 RB CAC

Glorious mellowing mint red luster shines on both obverse and reverse of this pretty GEM. The surfaces are a very pleasing red with a fascinating woodgrain texture and hints of rose and gold hues throughout. The luster is bold and vibrant, without any breaks or marks that would distract the eye.

PCGS 160, NGC 107, CAC 48. The last one to sell in auction was not as pretty as the presently offered GEM, realizing \$2,115 and the current PCGS Price Guide value is \$3,250. Keep in mind there are only a handful graded higher in the RB category, and in RD, a gem example will cost double. This 65RB offers about 90% full red and is a great looking coin that should seriously be considered.

PCGS # 2239 | EST: \$2,000+

LOT 13

1C 1909-S LINCOLN. PCGS MS66 RD CAC

A brilliant golden-RED that is well struck and beautiful. This wonderful GEM is about as vibrant and flashy red as it was the day it came off the press. The luster swirls around both sides of this frosty gem and the bold details are razor sharp.

PCGS 187, NGC 69, CAC 35. The PCGS figure includes the 15 graded MS66+ RD, and there are 9 graded MS67 RD finer. In September 2016 a non-CAC approved MS66 RD sold for \$3,055 and a CAC approved example sold for \$4,465 in the recent ANA auction. The current CU value is \$3,150. This GEM is highly appealing and will sell for a premium bid when it crosses the block.

PCGS # 2434 | EST: \$3,000+

LOT 14

1C 1912-D PCGS MS65+ RD CAC

A blazing mint red original GEM. Sharply struck and highly attractive. There are only a tiny little tick or two away from a 66. This is NOT a mellowing red; the red is as fresh as the day this coin was struck.

PCGS 121, NGC 35, CAC 21. There are only 7 graded as 65+ and there are 28 graded finer, the finest at 66+. The last PCGS/CAC MS65+ RD sold in 2014 for nearly \$2,000. The PCGS listed value is \$2,600 and in MS66, it is listed at \$11,000. We really like the look of this coin and we think it will sell for a premium price.

PCGS # 2455 | EST: \$1,500+

LOT 15

1C 1914-D PCGS MS65 BN CAC

A premium example for sure. Most likely this coin simply sat undisturbed for most of its existence. Superior surface are super clean and smooth. Even using a strong glass, we found NO imperfections anywhere. A good luster enhances the totally original colors. You can clearly see bold shades of Mint Red by the rims. The centers are a fresh even brown. A few tiny toning dots are by the rims. Lincoln and every detail are boldly struck. The eye appeal is fantastic!

PCGS 14, NGC 16, CAC 7. The last PCGS MS65 BN CAC to sell in auction brought \$7,638 in March 2016 and the current Collectors Universe Value is \$7,500. In today's market, these seem to be overlooked. This is a great example of a very important "Key Date" for the series.

PCGS # 2471 | EST: \$5,500+

LOT 16

1C 1914-D PCGS MS66 RB CAC

This coin is scary close to full GEM Red. There is no question this coin sat undisturbed and totally protected for most its 102-year existence. We cannot imagine a finer 1914-D! We grade this coin a MS66+ RB (but make no promises PCGS ever will).

Incredible surfaces are the epitome of perfection. You can use a microscope and find NO impairment of ANY size, ANY where. A strong luster (for a 14-D) enhances the totally original GEM faded Mint Red/pale golden brown colors. There are NO spots or discolorations. Lincoln and every detail are fully struck and do stand out. The eye appeal is awesome!

PCSG 2, NGC 4, CAC 1. There are none graded higher. NO 1914-D MS66 RB has ever been sold via auction. We do know a pop 2 PCGS MS66 RD NO CAC once sold for a mind blowing \$200,000.00+. We can NOT impress enough the grand rarity of this piece-especially in this incredible condition. This is a fresh coin to the market as well. Bidders, be prepared for strong bidding and a possibly a record price!

1C 1916 PCGS MS67+ RD CAC

An AMAZING fiery, mint red cent! This spectacular GEM looks as fresh today as it did the moment it came off the dies. Were it not for a couple of TINY flecks, the coin would be fully flawless. The surfaces are silky smooth-there is only a touch of texture from the dies in the fields, similar to the orange-peel texture. Hints of reflectivity and exceptionally bold details, suggest a very early striking in the life of this obverse die.

PCGS 70, NGC 9, CAC 17. While there are 11 MS67+s listed on the PCGS Population Report, it is highly doubtful many look like this! The most recent example was sold in March 2016 and was NOT CAC; it sold for \$5,405. This coin was from our Regency XVII Auction, where it realized \$5,288. The current CU value is \$6,900. It is highly unlikely you will find a finer example.

1C 1922 NO D. STRONG REVERSE PCGS MS64 BN CAC

Legend Rare Coin Auctions is proud to offer this amazing and extremely rare Lincoln Cent.

The quality is all there and then some! The surfaces are ultra clean and overall are totally blemish, spot, and are problem free. Even with a strong glass there are no problems. A strong glossy luster shows off GEM even and totally original chocolate brown colors. There is faded original Mint Red in thin bands around the devices. Lincoln and all the details are well struck. The eye appeal is exceptional!

PCGS 2, NGC 1, CAC 2. The last one to sell was a PCGS NON-CAC back in 2010 and even back then that coin brought \$29,900. We have not seen or heard of it since. The current Collectors Universe Value is \$40,000. This is one of the rarest Lincoln cents to find in above MS63 and in any color. There is a PCGS CAC MS65 BN that brought \$67,563 in August 2014. Call us prejudiced, but this coin has more eye appeal! Once this prize is sold, good luck on finding any others over MS63 BN and CAC-approved. Think about it, NONE have sold at auction since 2010-that's forever ago! Good luck and congrats to the winning bidder-this one super rare coin!

This SUPERB GEM looks like it just was taken off the press with cloth gloves! Blazing mint red luster bursts off both sides. The surfaces are clean and the devices are well struck. The fiery color has hints of gold that just pop in the light. This coin is very deserving of its lofty grade.

PCGS 165, NGC 380, CAC 26. ONLY 16 have received the coveted "+" grade, and NONE are graded finer at PCGS. The PCGS Price Guide value is \$3,500 and the SOLE example to sell in auction was sold in April 2016 realizing \$4,230. There are a small number NGC MS68 RDs, the last selling in 2010 for \$2,530.

If you are in the process building a Lincoln cent Registry set, take a look at this SUPERB, tied for PCGS finest!

1C 1969-S DOUBLED DIE OBVERSE. PCGS AU58 CAC

One of the most important Lincoln Memorial cents, and among the KEYS in the entire series. The obverse is fully doubled. Well struck and the devices showing only the slightest rub on the high points, this PQ GEM AU is evenly toned in a mahogany-brown with some lighter brown and hints of slight blue highlights. The surfaces are smooth and show only the slightest little marks, consistent with the grade. It is a beautiful coin for the grade and would make a great addition to any advanced Lincoln cent collection.

PCGS 16, NGC 2, CAC 3. The last PCGS AU58 CAC to sell in a MAJOR auction realized \$30,550 at the 2016 CSNS auction, which sold previously in July 2013 for \$28,200. From 2006 to 2009, these were bringing \$35,000-\$44,000 without CAC approval. The current PCGS value is \$30,000. This is a great opportunity to acquire this major rarity. Keep in mind that a Mint State piece will run around \$40,000. This is an exceptional coin that will find itself in a great collection of Lincolns. It may be a while until another comes up for sale.

1C 1911 PCGS PR66+ RB CAC

ULTRA HIGH END. All we can say is, PCGS must have been in a super bad mood the day this coin came in to be graded. To us, it sure looks much better than just a PR66+. And it's got MONSTER colors that would make a peacock blush!

Incredible surfaces are flawless: they display a full Matte texture that is undisturbed. There is some luster. You will not find any spots anywhere on the surfaces that display a rich blend of totally original and electric colors of pearl green/gold/fiery violet/pale Mint red/purple all swirl vividly on both sides. Any master artist would give a thumb up to this outrageous work of Mother Nature. Lincoln and the details are needle sharp in strike and the rims are thick and stand out. The eye appeal is jaw droppingly tremendous!

PCGS 21, NGC 16, CAC 8. This is the ONLY PCGS PR66+ RB and PCGS has graded only ONE coin finer. If you are building a monster MPL set-then look no further-this is your dream coin!

Mother Nature's masterpiece! A spectacular superb GEM, tied for the finest numerically graded by PCGS with only one other RB and 2 BNs. Mostly rich brick red satin matte surfaces. Hints of violet and green add to the exceptional color and amazing quality surfaces. Boldly struck throughout and a tiny fleck is the only flaw noted on the reverse.

PCGS 15, NGC 7, CAC 7. Only 2 are graded 66+ RB and none are finer at PCGS. We sold the finest PCGS PR66 RD CAC for a record \$37,600 in our February 2016 Regency Auction. While more muted, this coin is about 90% RD and is gorgeous. This coin has not appeared at auction in over two years and when it last sold it sold for \$14,100. The current CU value is \$13,500 but to see GEM is to love it, and we think it will bring a very strong price. If you are putting together a great MPL set, take a close look at this coin!

1C 1916 PCGS PR67+ RB

Mezermizing colors and astonishing quality and eye appeal. It is hard to imagine that a nicer looking RB 1916 Matte Proof Lincoln exists! In this coin's case, we think the B in RB stands for blue, not brown. Rich brick red blends with magenta, violet and blue over sublime surfaces. It is the sole finest graded at PCGS, and for good reason; even after studying this MONSTER for several minutes with a strong glass, we cannot find a single fleck, tick, line, spot, or any other distraction anywhere. The Matte surfaces show a satiny sheen over the delicate sandblast surfaces. Lincoln's portrait looks as though it was carved by hand by a very talented engraver, the details are bold, sculpted and razor sharp. Even the edges are perfect showing the high knife rim and are reflective.

PCGS 1, NGC 0. This amazing survivor has never appeared at auction. There are 3 PCGS PR67 RBs, but none of these have ever sold in auction either. The most recent comparable is the PR66+ RB CAC that was in the McCullagh Collection sold at the 2014 ANA Auction for \$30,550 that is now in a PR67 holder. PCGS currently has a value of \$42,500 in 67+ RB, and if you demand the finest colored PR Matte cent, take a look at this superb GEM.

1C 1916 PCGS PR66 RD CAC

What other auction in recent memory had TWO superb 16 Matte Proof cents? Each coin will appeal to a different type of collector. The presently offered jewel has a mint fresh brilliant beaming red color. The strike is about as bold as can be hoped for (you can almost count Lincoln's whiskers). The surfaces are problem free and totally original, looking about as nice today as the day it was lovingly removed from the coinage press. After close inspection, we found a single tiny line on the reverse and a minute fleck or two here or there. The RED surfaces show a great satin-like sheen that makes the little facets of the sandblast finish sparkle in the light.

PCGS 5, NGC 2, CAC 2. No CAC-approved PR66 RD has ever sold in auction. The closest looking coin was an old holdered NGC PR67 RD that sold in October 2011 for \$34,500. This coin is likely the finest or second finest RED Matte Proof 1916 cent, and as such should attract considerable bidding from advanced collectors. The CU Price is listed at \$32,500 and that may prove low.

1C 1936 BRILLIANT. PCGS PR66 RD CAMEO CAC

What a jaw dropping spectacular SUPERB GEM. This is a REAL cameo coin-you do not have to imagine there is contrast. We assure you, the quality and WOW factors are off the charts!

Remarkable mirrors are the ultimate in depth. They also have stunning clarity, are ultra clean, and have an intense reflection. You don't have to twirl the coin to see the mirrors roll like a flowing river. Both sides are an outrageous totally original GEM Mint Red color. Lincoln and every detail are needle sharp in strike. The frosting is heavy and clearly visible. The eye appeal is just jaw dropping!

PCGS 4, NGC 2, CAC 2. The last time one of these sold was back in June 2013 and it brought \$21,150, and the current Collectors Universe value is \$25,000. This is NOT the same coin-the other had uneven color in the right obverse field. We cannot stress enough how "on fire" this coin is. Even the most ridiculously picky buyer would love this coin (if not, then they will never ever find one they like). We know we have only seen the other coin back in 2013. If you collect PR Lincolns, this is a dream coin! We expect strong bidding here-good luck!

One of the nicer MS 3CS pieces we have ever seen. Our sister company Legend has handled EVERY one of the VERY best MS pieces that exist. On a scale of 1-10, this coin ranks a 9+. Immaculate surfaces are smooth. Even using a strong glass, you will find NO tiny imperfections or lines. A moderate luster enhances a wonderful mix of olive/golden brown/pale violet colors that swirl all over. The strike overall is impressive and the eye appeal is super!

PCGS 33, NGC 17, CAC 17. The current PCGS Collectors Universe value is \$7,600-which is what this coin traded for in February 2015. This will be a tremendous addition to ANY GEM set!

Save for the typical die clashing, this coin is really immaculate. Super smooth and semi satiny surfaces are boldly lustrous. Both sides are a creamy original white color. Every detail is sharply struck and does have thick frosting. You do NOT need a glass to see the details! The eye appeal is terrific!

PCGS 74, NGC 30, CAC 27. PCGS has graded only 5 coins in MS66+. The last one to sell in auction brought \$3,525 in January 2014. 3CS are a wonderful and historical series to collect and yet they are another area that has taken harsh market down turns.

3CS 1867 PCGS MS65 CAC

This is an extremely rare and magnificent example of a 1867 MS 3CS piece. Legend Numismatics' (our sister company) experience in 3CS pieces (PR+MS) is unequaled as they have built the #1 sets with nothing coming close. They have assured us, this date is quite rare and you won't see many offered that are equal to this piece.

Immaculate surfaces are smooth and are ultra clean. You need a microscope to see any ticks or lines. There are also traces of semi-prooflike mirrors. A very good luster enhances the moderate and totally original mix of olive/pale violet/blue/gold colors that are spread all over. This coin is NOT dull or drab. Every detail is sharply struck and has strong frost. There is NO question this piece is an MS. The eye appeal is excellent!

PCGS 3, NGC 0, CAC 1. PCGS has graded 5 coins higher. An NGC MS65 sold in auction for \$14,100 with no CAC bean, and prior to that the last PCGS coin sold in 2010. That is a powerful statement as to this coin's rarity! If you're building a great MS 3CS set or even a special Type set, this coin will make a great addition.

Only 3,000 were ever minted. Not a date or grade you see offered even in major auctions! This piece is an unquestionable MS. The surfaces are smooth, have prooflike tendencies, and do emit a strong luster.

There are NO noticeable problems anywhere. A beautiful mix of colors form a ring of pearl green/gold/pale blue that opens into lighter lavender centers. This coin is NOT dull or drab. Every detail is sharply struck and has generous frost. The eye appeal is very nice!

PCGS 9, NGC 7, CAC 4. The only PCGS MS67 is locked away in major a collection. The last auction sale for one was in March 2016 that brought \$8,813.

Our sister company, Legend Numismatics has built the TWO FINEST PR 3CS sets, so we know how these do and do NOT come. This coin is an outstanding VERY HIGH END PR65. We think PCGS is simply afraid of the die polishing lines to grade it PR66.

Unusually deep, crystal clear, clean (save for the Mint made die polishing lines) and incredibly reflective mirrors beam from all over. The mirrors make this small coin look really big! A gorgeous ORIGINAL mix of pale navy/gold/blue colors all swirl evenly together all over. Every detail is needle sharp in strike and has light frost. The eye appeal is BOLD!

It is estimated LESS than 100 pieces were ever minted.

PCGS 5, NGC 4, CAC 4. PCGS has graded only this coin in PR65+ with just 2 higher. The current Collectors Universe Value for this coin is \$16,000.00. Its very high end so we could see the price exceeding that number. We'll challenge this coins quality and eye appeal vs any PR65 and even the majority of PR66's! You certainly won't have many opportunities to find many of these!

RARE and original. Deeply toned mirrors in shades of teal and navy shine around the well struck devices. The dies were highly polished, directional die polish lines are seen on both sides of this lovely superb gem. This coin was clearly cared for since it was purchased from the mint in the first year that proof coins were struck specifically for sale to the general collecting public. Before 1858, proofs were struck but only in very limited numbers for well connected collectors or other VIPs.

An estimated mintage of only 100 coins were struck. PCGS 14, NGC 18, CAC 2. This is NOT the one that we just had in our September Regency auction that sold for \$14,688 on an estimate of \$9,000-\$10,000. The current PCGS price is \$13,500. Amazing, deep mirrors shine through a layer of rich, sultry toning. Multi-colored tones dazzle the eye when viewed under a light; green, gold, orange, red and blue shades sparkle and dance when rotated. Even with the color, the mirrors are crisp and clear and wonderfully reflective.

Only 500 were struck. PCGS 0, NGC 7. There is only a single PR68 finer at NGC. The highest non-CAMEO designated PR 1865 3CS graded by PCGS is a PR66+. This is NOT the Gardner coin that sold in October 2015 for \$3,643, nor is it the PCGS PR66+ CAC that sold for \$3,995 in June 2015. This coin has a better eye appeal than both of those coins. Before the Gardner NGC PR67 sold, you have to look back to September 2008 to find another APR, a coin that sold for \$6,325. Since PCGS does not have graded a PR67 non-CAMEO, there is no CU value in this grade. The eye appeal and quality should certainly speak for themselves though. A wonderful example for any PR Civil War coin set, or set of PR 3CS.

This coin is so nice it could reside in our #1 all-time set, the Legend Collection, it is that phenomenal!

The powerful mirrors are amazing on this near miss PR67 cameo status piece. You need a glass to see it. Both sides have shimmering deep mirrors that are crystal clear, super clean, and have bold reflectivity. A heart pounding mix of original pale champagne /olive/gold colors swirl all over the obverse. The reverse is a blue/olive color. Every detail is frosted and has a pinpoint sharp strike. The eye appeal is major WOW factor-even though it is a smaller coin!

ONLY 600 pieces were ever minted. PCGS 11, NGC 4, CAC 3. PCGS has graded 3 higher (A PR67 CAC is worth around \$15,000.00). The last PCGS CAC 66 CAM to sell in auction brought \$3,525 in January 2016-in a weaker sale. You certainly do NOT see this date and grade offered with any frequency. Good luck!

Among the highest graded PCGS PR 1889 nickels, and it is highly doubtful that among the non-CAM issues, there can be more than a few that rival this superb gem's eye appeal. The surfaces are expertly preserved and showing a delicate gold with rainbow accents here and there. With proof nickels of the era, the polished die finish wore away quickly, which is why coins with cameo designations are so scarce, and the finish turns to a more satiny semi-lustrous with hints of reflectivity. The devices for the most part are very crisply struck. The eye appeal is strong with this one.

PCGS 11, NGC 21, CAC 4. The last PCGS/CAC coin to sell was back in February 2014, realizing nearly \$6,500. The last PCGS, non-CAC coin also sold in 2014, in an October sale, realizing \$2,825. The current CU value is listed at \$4,000. There are none graded finer at PCGS with the non-CAM designation, and there is only 1 PR67 CAM. This is a prize for a registry collector.

Spectacularly toned! This superb GEM is a delight to behold. The reflectivity and clean surfaces are just a part of the story here; the eye appeal is broadened by superb toning, especially on the reverse. This is Mother Nature's gift to PR Liberty nickels! The surfaces are clean and icy smooth and the eye appeal is wonderful.

PCGS 11, NGC 21. It has been over two years since the last PCGS coin sold, realizing \$2,585 in October 2014. That coin could not hold a candle to this one in terms of overall eye appeal and physical quality. The current PCGS Price Guide value is \$4,500. This coin should bring a premium bid from someone assembling a set of superb toned PR Lib nickels.

5C 1892 PCGS PR67 CAM

Deep mirrors shine throughout and they beam from across the room and contrast with the frosty design devices. Boldly struck throughout and display a pleasing dusting of light gold. Among the best graded by PCGS and should command serious attention from bidders.

PCGS 5, NGC 9. There is one finer, graded 67+ CAM. This great coin has great eye appeal and should bring a premium price.

Only 1 PR67 CAM graded by PCGS (and was CAC approved) has ever sold in auction, realizing \$5,581 in August 2014. Aside from that, only NGC coins have sold, the most recent selling for \$3,760 in August 2015. Keep in mind the sole 67+ realized \$8,225 in November 2014. The current CU price is \$3,500. This coin is exceptionally fine and belongs in a top quality set.

5C 1893 PCGS PR67+ CAMEO CAC

What a tremendous borderline ULTRA black and white cameo GEM!

Borderline Ultra deep mirrors are so fine you can shave using them.

They have remarkable clarity, cleanliness, and a nearly blinding reflection. The mirrors do appear black (a positive term). Miss Liberty and the details are thickly frosted and iridescent white. Everything is needle sharp in strike too. The eye appeal is jaw dropping!

PCGS 15, NGC 8, CAC 13. PCGS has graded 4 coins in PR67+ Cameo - NONE have graded any higher. The current Collectors Universe Value is \$5,650. These also have been smacked down hard for no reason by the market. It should be noted, the last PCGS NON-CAC to sell brought \$3,760 in a July 2015 auction sale. If you're building a GEM black and white set or just love cool coins, this coin is a must buy!

Superb quality mirrors beam from across the room. The mirrors are like quicksilver, deep and bold. The sharply struck reliefs are frosty white and contrast beautifully with the black mirrors. The surfaces are smooth and completely blemish free. A superior quality GEM.

PCGS 10, NGC 2, CAC 7. Three of the PCGS coins are 67+, none are finer. The last three have sold in the \$4,000 to \$5,000 range and the current PCGS Price Guide value is \$3,650. If you wish to own one of the finest 1898 CAMEO proof nickels, here is your chance! Good luck.

This GEM is the singular FINEST graded at PCGS, and borders on a DCAM designation. The mirrors are deep, your eye is drawn to them and cannot turn away! The boldly struck devices are highly frosted and the contrast is eye arresting. The surfaces are clean, crisp, and smooth. The quality is exceptional and unimprovable!

PCGS 14, NGC 8, CAC 10. This is the ONLY PR67+ CAM graded by either service, has never sold in auction. The most recent regular PCGS/CAC PR67 CAM sold in September 2015 for \$2,585, and before that, they were regularly bringing over \$4,000. The current PCGS Price Guide Value of a 67+ CAM is \$4,900 and keep in mind that our Regency 15 Auction had a PR67+ DCAM that sold in excess of \$15,000. Opportunity knocks loud here.

THE ANGEL DEE'S COLLECTION OF TONED BUFFALO NICKELS

ANGEL DEEL'S COLLECTION OF TONED BUFFALO NICKELS

BUILT OVER THE COURSE OF MANY YEARS BY BUFFALO NICKEL SPECIALIST ANDY SKRABALAK AND HIS WIFE ALYNNE, THIS IS THE FINEST COLLECTION OF TONED BUFFALO NICKELS TO EVER BE AUCTIONED OFF. HAVING ACCESS TO THE FINEST BUFFALO NICKELS TO APPEAR ON THE MARKET, THE SKRABALAKS AGGRESSIVELY BOUGHT THE BEST OF THE BEST TO APPEAR. AS FINER, OR BETTER TONED EXAMPLES APPEARED, THEY WOULD UPGRADE THEIR SET. MANY OF THE COINS ARE AT THE TOP OF THE POPULATION AND EACH IS EXQUISITELY TONED.

THIS WONDERFUL SET IS NOW BEING BROKEN UP AND SOLD AS A HIGHLIGHT COLLECTION IN OUR REGENCY 19 AUCTION. ON THE EVENING OF DECEMBER 15, COLLECTORS WILL FINALLY BE ABLE TO ADD THESE GREAT COINS TO THEIR SETS. THESE ARE THE COINS THAT BUFFALO NICKEL COLLECTORS DREAM ABOUT, AND THIS SET HAS MADE A HUGE IMPRESSION ON COLLECTORS WHEREVER IT WAS DISPLAYED.

LOT 55

5C 1913 TYPE 1. PCGS MS68 CAC

A truly spectacular way to begin this great collection of Buffalo nickels. Virtual perfection! A bold strike has left every detail fully rendered, from the Indian's braid and feathers. All the definition of the bison's head, haunches, and the mound that he stands on are seemingly chiseled they are so sharp. In addition to an amazing strike, the luster radiates a vibrant satin bloom that bursts through the soft rainbow iridescent toning. This coin is about as perfect as you could hope to find in a circulation strike Buffalo! Not only is the technical quality all there and then some, the eye appeal is nothing short of superb.

PCGS 17, NGC 13, CAC 5. There are NONE graded finer at either service. It has been over two years since the last PCGS MS68 CAC '13 Type 1 nickel has sold in an auction sale, and that coin, which realized \$15,275 (in a September 2014 auction) had no where near the exceptional eye appeal that this monster coin has. A few months earlier one sold for \$22,325. The current PCGS Price Guide value is listed at \$14,000, and there is almost no doubt in our minds that this coin will far exceed that level. Our consignor notes that he had purchased five different 1913 Type 1 nickels to include in this set before finding this one that had the absolute best color and eye appeal. As the collector who will end up with this SUPERB GEM, be glad that he took the time and effort to locate this one so you won't have to. Good luck!

5C 1913-D TYPE 1. PCGS MS67+ CAC

Another spectacular Type 1. The strike is bold and strong throughout on both sides; each device is seemingly sculpted out of the planchet. A very pretty pastel iridescent bullseye pattern shows clear periwinkle around a center of a pinkish-orange rose. The brilliantly satin frost truly catches the light and brings the hues to life. The technical quality of this superb gem is incredible, and this coin has a look that will make even the most jaded collector fall in love.

PCGS 71, NGC 17, CAC 25. Only 4 of the 71 MS67s at PCGS have been assigned the coveted "+", and there are none at NGC. Only three are graded MS68 combined between PCGS and NGC (and neither is CAC approved). NO MS67+ has ever sold in auction. The most recent regular 67 sold for \$2,350 in December 2015, and the only MS68 to sell in auction brought \$32,200 a dozen years ago. PCGS suggests a value of \$3,750, but fundamentally, this seems too low, as even regular 67s have sold in the \$4,000-\$6,000 range in the last five years. This is likely the highest grade example that will be available for quite a long time. If you are building a top tier Registry Set of Buffalo nickels, or just appreciate beautiful SUPERB quality type coins, be sure to bid on this amazing 13-D.

5C 1913-S TYPE 1. PCGS MS67+ CAC

Beautiful rings of iridescent rainbow toning grip the rims of both the obverse and reverse of this stunning 13-S Type 1. While the centers are mostly nickel-silver, they are haloed by superb rings of rose, orange, gold, and hints of aqua. The strike is bold, all the details on both sides are accentuated by the glowing satiny mint frost. A wonderful capstone to the 1-year only subtype; this and the previous two lots would make a very special mini-collection on their own!

PCGS 26, NGC 17, CAC 10. Only TWO are graded MS67+ at PCGS, and only a single MS68 is finer at that service (at NGC there is a single 67+ and one 68). This will be the first 67+ to sell in auction from either service. The last PCGS 67 CAC to sell brought \$5,640 in May 2015, and an NGC MS68 sold for \$12,650 back in January 2012. The PCGS Price Guide value is currently listed at \$9,500. Our consignor notes that this is the best example of the date that he has ever seen. Clearly this coin is very choice for the grade. Until one day in the future the sole PCGS MS68 is sold, this will likely be the **FINEST** 13-S Type 1 you will have a chance to bid on. Good luck.

5C 1913 TYPE 2. PCGS MS67+ CAC

Brilliant mint luster provides a backlight to the fantastic emerald, rose, teal, and gold and they blend together beautifully over crisply struck devices. Tied with four others for finest graded, our consignor has handled 4 out of the 5 graded 67+ and he notes that this one has the best color. As to be expected the technical qualities are amazing and they eye appeal is superb.

PCGS 28, NGC 12, CAC 10. As mentioned above, there are only 5 graded 67+ at PCGS and this one possesses the best color of the four that our consignor has handled. There are NONE graded higher at PCGS, and NGC has not awarded a + to any 67s and there are no 68s. The only PCGS/CAC example in 67+ to sell in auction brought \$14,100 in a March 2015 auction. That coin was very nicely toned, but much darker and uneven on the reverse. This coin clearly possesses the better overall look of the two pieces. The current PCGS Price Guide value is \$10,000 and with such an amazingly eye appealing coin, all bets are off! Good luck!

LOT 59

5C 1913-D TYPE 2. PCGS MS65 CAC

Since the TONING, along with grade and quality is the focus of the Angel Dee's Collection, it is not surprising that higher grade coins were passed over for this beauty. A softly glowing satin gloss shines under a dusting of rich golden-amber color hugs the rims, while tinges of rose-gold blend throughout. Typically strike shows only a hint of weakness on the buffalo's shoulder. Using a strong glass, we cannot find any singularly distracting marks or ticks.

PCGS 155, NGC 82, CAC 29. Don't let the pops fool you, since 2011, there have only been 10 PCGS/CAC MS65 13-D Type 2s sold in auction, the most recent in June 2016 for \$1,763 and the current PCGS Price Guide is \$1,450. This highly eye appealing GEM is certainly worthy of a premium bid!

5C 1913-S TYPE 2. PCGS MS66

Boldly struck from clashed dies, this lovely gem shows a soft luster with very appealing champagne and peach on the obverse. The reverse displays a light champagne color with subtle tinges of tangerine hues. The strike is bold throughout and the clash marks add character.

PCGS 35, NGC 13. A mere four are graded as MS67 as finest at PCGS. The most recent sale of a PCGS graded MS66 13-S Type 2 was in April 2016, which realized \$4,230, and was CAC-approved.

That said, PCGS 66s have been selling \$4,700 and while the current PCGS Price Guide is \$5,000, there are multiple examples that have sold for as much as \$9,200. The last MS67 sold for \$28,200 back in April 2014. Since most 13-S Type 2s do not have this kind of color, we would not be surprised if we saw strong bidding for this colorful gem.

PCGS # 3923 | EST: \$4,000+

LOT 61

5C 1914 PCGS MS67

A brilliant SUPERB gem with an amazing eye appeal. A rich glossy luster accents the boldly defined devices on both sides. The dies imparted exacting detail when this coin was struck, all the details of the Indian's braid and feathers are crisp, as are the minute details of the buffalo's furry hide along the neck and haunches. But it is the combination of exacting strike, luster and the wonderful subtle rainbow hues that give this coin its bold visual allure. Narrow bands of rainbow iridescent hues at the rims frame both obverse and reverse. To look at this coin is to truly marvel at the work that mother nature can do on a coin.

PCGS 29, NGC 9. There is a single MS67+ finer at PCGS and none are graded finer at NGC. Don't let the pops fool you there have only been 23 auction sales of a 14-D in PCGS MS67 going back over the last 13 years, that is less than 2 per year since 2003. The most recent example sold in the 2016 FUN auction, realizing \$5,875 in an auction that took place at the valley of the current market cycle. That coin did not have nearly the lovely visual appeal this one does. The current PCGS Price Guide lists a value of \$6,000. Another lovely early GEM from the Angel Dee's Collection, one that will no doubt inspire a spirited bout of bidding from advanced Buffalo nickel specialists!

LOT 62

5C 1914-D PCGS MS67

Tied for finest graded by PCGS and aside from the fine technical quality of this superb gem the overall visual appeal is stunning. Swaths of rainbow patina create two beautiful halos, one on the obverse and one on the reverse. The allure is truly heavenly. Viewing this coin in a light, the bands of colors, especially the red, green and gold really pop. The strike is bold and all the details are nearly full, and is essentially, save for a touch of flatness on the buffalo's shoulder. You will be very hard pressed to find a lovelier example for the date.

PCGS 8, NGC 1. The most recent PCGS MS67 example sold in December 2015 for \$17,625, and that CAC approved gem did not have the beautiful color that this coin does, furthermore, that coin had sold in an August 2012 auction for \$23,500. The current PCGS Price Guide value is listed at \$21,500. While not CAC-approved, this coin possesses an eye arresting look that is truly beautiful. Our consignor notes that the look is stunning, especially for this tough date and grade. We feel this coin is a contender for inclusion into another world class Buffalo nickel set, and we think it should see some very active bidding activity from specialists. Good luck to all the bidders, and congratulations in advance to the winner!

PCGS # 3925 | EST: \$17,000+

5C 1914-S PCGS MS65+

A vibrant glossy mint luster accentuates the delicate golden highlights. The color and luster truly amplify the crisply defined design elements. A tough coin to find in higher mint state grades, the population drops off dramatically in grades higher than MS65. The naked eye appeal is very nice it does hold up to scrutiny when viewed with a strong glass.

PCGS 4, NGC 0 (in MS65+). While there are a number of finer coins at PCGS, clearly this coin has special attributes that higher grade specimens lacked when assembling the Angel Dee's Collection. Only a single 65+ has sold at auction, a CAC approved coin that realized \$2,580 in March 2016. More recently a PCGS MS65 CAC sold for \$2,820 and a PCGS MS66 sold for \$5,875. The current PCGS Price Guide value is listed at \$3,250.

A pretty coin like this should bring a solid result.

Bold sunset hues frame the obverse and a satiny-lustrous sheen backlights the toning. When viewed under a light, the colors are enlivened, with rich orange and gold, with hints of violet and lilac that appear when the coin is rotated. The reverse is perhaps a touch more understated than the obverse, but its technical quality is superb. Well struck and nearly flawless (we note a tiny dot on the lower obverse). The strike is full and is among the absolute finest certified by either PCGS or NGC.

PCGS 5, NGC 0 (for MS67+). NONE ARE FINER. We note the last example was not anywhere near as pretty as this GEM, nor was it as well struck. It realized \$4,465 in a weak auction, the 2016 FUN auction. The previous two MS67+s to sell were both CAC and realized \$4,700 and \$5,640 respectively in the 2015 FUN auction sale, and again, neither had the very pretty toning of this coin. The current PCGS Price Guide value is. We would expect some competition to add this superb 1915 to any top tier set.

5C 1915-D PCGS MS66+

One of the prettiest examples of the date that can be imagined. Tied for second finest certified by PCGS, there are a mere three coins graded MS67 that are numerically finer. This satiny lustrous GEM displays a stunning array of multicolored toning, with very pretty shades of lilac, rose, pink, and sky blue iridescence dominating. A very crisp strike was imparted by an exacting strike and this coin has been lovingly cared for since the moment it fell from the dies at the Denver mint.

PCGS 3, NGC 0 (for MS66+). Both services count three coins each at MS67 as finest. Only a single MS66+ has ever sold at auction, a CAC-approved example that brought \$7,050 in April 2014. No finer PCGS graded coin has ever sold in auction; there are four records for NGC MS67s, the two most recent selling for \$10,350 (the most recent in April 2012). The current PCGS Price Guide values 66+ for \$7,500. While no PCGS MS67 has ever sold in auction, the PCGS value is listed at \$45,000, and were one to appear, it would certainly generate a fierce bidding war. This could be the highest grade example to appear at auction for many years, so if you are need a high grade piece for your set, don't let this opportunity pass you by.

A richly toned example, featuring olive-gold, rose, and apricot hues that coat well struck devices and expertly preserved fields. The details are razor sharp and seem to be chiseled out of the planchet. A satiny mint bloom, really brings the colors to life when rotated in a light, especially on the reverse.

PCGS 4, NGC 0 (for MS65+). Only one 65+ has ever sold in auction which realized \$2,585 in the 2016 FUN auction, often noted for its bad timing when the stock market, oil, and gold were all falling in value, creating a perfect storm that took the wind out of the market's sails. More recently a regular PCGS MS65 sold for \$2,703 and a PCGS/CAC MS66 realized \$4,700. The current PCGS Price Guide lists MS65+ at \$3,750, perhaps as an aggregate of the recent APRs. While there are a number graded higher, we do like this coin for its gem quality and rich toning.

PCGS # 3929 | EST: \$2,500+

This is the SINGLE FINEST PCGS graded example of this date! The technical quality is all there and then some! A rich, glowing luster highlights the boldly defined design devices. A beautiful golden-peach-champagne accents both sides and really brings out the stunning detail and essentially pristine surfaces. One of the prettiest Buffalo nickels in this set and certainly worthy as its designation as the finest example extant.

PCGS 1, NGC 0. There is a 68 on the NGC Census, and that coin, which also boasted pretty toning, last sold in auction back in January 2012, selling for \$14,375. It has been nearly two years since a regular PCGS MS67 (Population of 21) sold, realizing \$7,050 in February 2015. The current PCGS Price Guide suggests a value of \$12,500, a level that may well be surpassed when this SUPERB GEM crosses the block. Our consignor purchased this FINEST PCGS 1916 from the late David Weygant, and it is not surprising because David had great taste in coins. Lovingly cared for since the moment it left the mint, no doubt the next owner will lovingly care for it as well. An important opportunity for the advanced Registry Set collector that demands the absolute finest graded examples.

A superb example, tied for FINEST certified by either service. A soft golden-peach pastel iridescence dominates while light rose and magenta hues can be picked up when the sultry-lustrous surfaces are rotated in a light. The surface quality is excellent and the strike is bold and full, with complete definition throughout on both sides, surprisingly enough, as the dies had clashed and began to crack on the obverse (see the B in LIBERTY).

PCGS 20, NGC 6, CAC 9. There are a mere two coins graded 66+, and none are graded finer at either service. The other 66+ was also CAC-approved and it realized nearly \$25,000 back in the 2014 FUN auction. That coin had some flecks here and there, absent on the presently offered SUPERB GEM. Our consignor notes that this is the nicest example of this date that he had ever seen, and we would have to agree with him on that fact. We anticipate that the advanced Registry set collectors will be out in force when this coin crosses the block, and it would not be surprising if a record price is realized when the gavel finally falls.

Another magnificently toned GEM, which despite its modest numeric grade (in relation to the other coins in the Angel Dee's set) this coin has a superb look. Rich rainbow toning with every shade on the spectrum, displaying pretty blues, teals, pinks and oranges. A satin luster combines with the spectacular color and crisp strike to create a very special looking 16-S nickel.

PCGS 96, NGC 46. The last one to sell realized \$2,233 in March 2016. That coin lacked the strike and beautiful color that this GEM displays. And don't let the pops fool you, less than a handful of examples sell in auction each year. The current PCGS Price Guide lists the value at \$2,350, and we expect this one will realize a very strong price for the beauty.

5C 1917 PCGS MS67+

This is the consignor's favorite coin in the entire set, and it is not hard to see why! The beauty is mesmerizing (his words)! A beautiful satin like luster swirls on both sides and it accentuates a rich sunset toned crescent on the obverse. Stunning orange-gold lightens to a silvery-blue towards the center. Likewise on the reverse, a crescent of toning, more beautiful than on the obverse shows richer shades that include violet and magenta hues. This superb gem is also displays an extremely crisp strike on both sides; the hair details on the Indian and the buffalo are fully defined. Overall the coin has a great look, so the few microscopic ticks can be overlooked.

PCGS 1, NGC 0. This is the SOLE MS67+ certified by PCGS, and only two are finer; both at MS68. We have not seen either of the 68s sold in auction. NGC has nothing graded higher than 67 on their Census. The last PCGS MS67 sold in August 2014 for \$4,847. None of the recent MS67s had any color to speak of, let alone the gorgeous color that this superb gem exhibits on both sides. The eye appeal is amazing. The current PCGS Price Guide for MS67 is \$6,500 and in 67+ it is listed at \$9,250. We suspect more than a few people will place bids on this coin when it crosses the block. Good luck!

5C 1917-D PCGS MS65+

Pretty in pink and green. Soft emerald and pastel pink hues are joined by shades of gold and peach, primarily on the obverse.

The color is very pleasing, albeit somewhat "funky" as well. The strike is blunt, showing the typical details for this date. The dies were clashed before this coin was struck, perhaps part of the cause of the areas of light flatness at the highpoints. The surfaces are clean and free of all but the smallest spots. The pleasing satin-like mint frost is picked up by the light and really brings out the beauty of the toning.

PCGS 5, NGC 0. None of the 65+s have sold in auction. To give some perspective, the last PCGS MS65 was CAC-approved and realized \$3,760 in April 2016 and a PCGS MS66 CAC sold for \$7,050 in the 2016 ANA auction. In July 2012, an NGC-66 sold for \$5,750. The current PCGS Price Guide lists MS65+ at \$3,250.

Both sides are fully struck and display full, crisp devices, which is rarely seen on this date. The eye appeal is great!

PCGS 88, NGC 67, CAC 9. Only three coins are graded 65+ and only 25 coins have been assigned a higher grade at PCGS, 24 are 66 and a single 66+ stands at the apex of the Pop Report. The only PCGS MS65+ did not have the stunning eye appeal that this gem possesses, but it was also not CAC-approved. It sold for \$4,406 in April 2014. Vibrant, glossy mint frost provides a pleasant backlight to the soft lavender and periwinkle tones. In certain protected areas of the design a richer rose and gold hues are seen. The strike is blunt, with some flatness of detail, but the surfaces are generally of very pleasing overall quality.

PCGS 62, NGC 8. There are 11 reported higher, MS67 the finest. The last PCGS graded MS66 to sell was in April 2016. That coin was CAC-approved and realized \$1,763. That was a very low price, considering that most examples sold since 2002 have sold for more than \$2,000 and some have broken into the \$3,000-\$4,000 range, which is why the current PCGS Price Guide value is listed at \$3,150. Keep in mind that the last MS67 to sell was an NGC coin that sold for \$10,575 in November 2012, and the last PCGS MS67 was back in February 2010, selling for \$23,000. The color and luster combine for a very eye appealing gem.

5C 1918-D PCGS MS66+

This coin calls you from across the room. The luster shines and swirls along both sides and brings the pale pastel hues to life. Light robin's egg blue and soft lemon-gold tone accentuates the smooth surfaces and well struck features of the design. Among the TOP 3 coins graded for the date, there is only a single MS67 graded by either PCGS or NGC. That coin is likely long off the market, making this nearly SUPERB coin the finest available for collectors. Our consignor specifically noted the great eye appeal, and he even said that he thought it would grade 67.

PCGS 2, NGC 0. There are 24 regular 66s on the Pop Report as well. It has been nearly 3 years since the other 66+ sold, realizing \$9,518 in March 2014. That coin had some carbon flecks around the buffalo's head, a feature that is lacking on the presently offered GEM. The current PCGS Price Guide value is listed at \$13,000. Until the MS67 comes to market, this is the FINEST available to collectors and we anticipate strong bidding from the top PCGS Registry set collectors, who will all be vying to own one of the best 18-D nickels in existence. We wish all bidders, good luck.

5C 1918-S PCGS MS65+ CAC

The final coin needed to complete the set. That is a strong testimonial to how this date comes. A bold strike is highlighted by a vibrant, glossy lustrous sheen on both sides. Pleasing, light pastel iridescent blue and gold tones are seen all over both sides of this carefully preserved, condition rarity. This GEM sits tied for second finest certified by PCGS, and has finer eye appeal than most examples of the date.

PCGS 39, NGC 18, CAC 8. Only 4 are graded 65+ and a SINGLE coin is graded MS66 as finest at PCGS. This is a date that when offered in gem grades, does very well in auction. This coin last sold at auction for \$24,675 in the 2015 FUN auction. This is by far the most eye appealing example that is available for collectors. Keep in mind the single MS66 has not appeared at auction in a PCGS holder, and the estimated PCGS value is \$100,000 should it ever appear. The current PCGS Price Guide value for MS65+ is \$29,500.

This coin, with its superb eye appeal, ultra-gem quality, rank as probable second finest for this condition rarity, and CAC accolades, should realize a record price. We know that any top set collectors will want to add this coin to their sets.

Va Va Voom! This coin is AMAZING. Sleek, smooth surfaces, carefully preserved over the course of nearly 100 years retain all the full satin luster imparted by the dies at the time of striking. Clearly this coin sat for years in an old album, which imparted rings of rainbow tones on the peripheries of both obverse and reverse. Very well struck, this uber quality-superb gem is tied for finest graded by PCGS. Even using a strong glass, we cannot find a single flaw. The eye appeal is stunning, the coin's allure captures your eye even from arm's length. This is a date that was clearly not well preserved.

Our consignor has a personal connection to this coin; his mother was born in 1919, and he felt compelled to include the absolute finest, most eye appealing example as an honor to her in his set.

This cataloger believes he was successful there.

PCGS 2, NGC 1. There are 17 graded MS67 at PCGS without the "+". Despite a mintage of nearly 61 million, there are fewer than 1,000 graded MS65 or higher combined by PCGS and NGC (and clearly there is duplication in the submissions). There is a single NGC MS68 reported, and last sold in auction in January 2012 for \$14,950. No PCGS MS67+ has ever sold at auction, the only 67+ was the brilliant and untuned Eric Newman coin that sold in November 2013 for \$11,750 (NGC/CAC). The current PCGS Price Guide lists a value of \$20,000, and while that might be a tad optimistic, we think that it will certainly bring more than the Newman coin.

The SOLE FINEST graded by either PCGS or NGC! Ever so close to MS67! This coin displays a wonderful eye appeal that combines a strong strike, a wealth of silky luster, pretty color, and clean, distraction free surfaces. Apricot and champagne toning blend with a hint of gold and a wealth of icy blue on the obverse and an arc of rainbow appears in front of the buffalo, and a peachy-rose continues around the rim. With the aid of a strong glass, a solitary fleck can be spotted between the buffalo's hind legs.

PCGS 1, NGC 0. There are 18 reported in MS66 at PCGS. None are finer than the presently offered MS66+. Going back to 2002 in our auction database, we have seen MS66s sell between \$10,000 and \$15,000 in general. With the current PCGS Price Guide value at listed at \$14,500 for MS66s and a conjectural \$18,500 for this MS66+, we think this coin will sell for a record price. If you are building the top ranking set on the PCGS Registry, you NEED this coin!

5C 1919-S PCGS MS64

A major condition rarity, the 1919-S becomes rare in MS65, and prohibitively so higher. This puts a lot of demand on the MS64 coins when they are offered. This coin offers a brilliant, glossy mint luster that provides a backlight to the pearly gold that dusts the surfaces.

Accents of rose can be seen on the reverse. Both sides are fully struck, a trait that is not often seen on this date.

PCGS 198, NGC 119. About 40 coins are graded higher by PCGS, the finest being a trio at MS66. The last PCGS MS64 to sell realized \$2,174, a very weak price, in September 2016. Before that one sold in ANA 2016 for \$3,290 and an NGC coin sold in another session of the ANA sale for \$3,995. The current PCGS Price Guide lists a value of \$3,400 and considering that a MS65 coin will cost double (and if you could find a PCGS MS66, it would cost high five figures), MS64 seems to be a good grade price wise for most collectors. This example is above average for the grade and has a nice look that most collectors would enjoy.

Rose and gold are seen in areas but the dominant color is a deep, rich blue. A satin mint frost catches the light and brings depth to the blue tones. The strike is sharp and all the details boldly defined.

PCGS 69, NGC 30. There are 10 coins graded finer, split evenly between MS65+ and MS66. The last MS65 sold for \$3,525 in October 2016, but the patina was a dull nickel gray. This grade has routinely sold in the \$3,500 to \$4,000 range, with CAC approved coins bringing substantial premiums. With 65+s selling for at least \$7,000 (and as high as \$20,500) and MS66s selling for \$45,000-\$98,000, the presently offered MS65 with the current PCGS Price Guide Value of \$5,500 is a great option for anyone working on a GEM calibre set. Beautiful iridescent rainbow hues grace both sides of this tough early Buffalo. The shades of teal, pink, gold, and pale orange are really picked up by the light when rotated. Both sides are well matched, which according to our consignor's notes "is tough for this date, finding an example with an even look on both sides." The luxuriant luster shines under the lovely colors. The strike is even and the devices boldly defined. Only under close inspection can we find a few tiny flecks. Not only does this GEM have a nice eye appeal, it is certainly among the finest graded at PCGS.

PCGS 22, NGC 15. Only TWO are graded numerically finer at PCGS, a single 65+ and a 66. The last PCGS MS65 to sell in auction was back in a December 2014 auction, a gray toned, spotty coin, sold for \$12,338. This coin is much more eye appealing, with nicer color and better overall look. The PCGS Price Guide value is \$17,000. Going through the photos of prior MS65s this coin has the look of many coins in NGC "STAR" holders, with the added cache of being certified by PCGS. It will take a very long time to find another with such great color!

Tied for the **FINEST** certified by PCGS. Exceptionally well struck from boldly clashed dies, this coin is cool to look at under a glass, the details from the reverse showing in the fields in front of and behind the Indian's head. An arc of pastel patina in shades of gold and pink accents the right obverse, while the reverse has an even dusting of similar shades. Every detail is crisp and sharply defined giving this superb gem a great look.

PCGS 29, NGC 19. The most recent PCGS MS67 sold for \$3,525, in a June 2016 auction. That one was untuned, showed some prominent spots and was not nearly as attractive as the presently offered Angel Dees coin. Before that, the previous four examples to sell fell into the \$4,000-\$5,000 range. The current PCGS Price Guide value is \$5,350. A rare date in GEM that has not sold in auction since 2014. This rainbow toned example was struck from a late die state, with both sides displaying heavy metal flow which makes for a very satiny luster. Effulgent pastel pink, teal, blue, gold, and pearly silver grace both sides. The reverse shows a few minor marks, noted for accuracy. For the issue, the strike is bold and pleasing, with just a little weakness on the highest points of the buffalo's shoulder.

PCGS 72, NGC 31. Don't let the pops fool you, it has been over two years since a PCGS MS65 sold in auction, the last being a CAC-stickered coin that realized \$8,813. Non-CAC coins have sold on the order of \$5,500+. The presently offered GEM was sold in January 2013 for \$8,813 and before that it was in the "Harpeth Valley Collection" sold in May 2008 for \$7,475. The current PCGS Price Guide value is \$7,700. The SOLE FINEST 1925 nickel graded at PCGS. Of all the coins in the Angel Dee's Collection, our consignor made it a point to tell us that "when David Hall looked at the set, this was his favorite coin!" Looking at this coin, it is not hard to understand why. First off, the satin luster booms loud from across the room! Icy blue, and soft gold and powdery lavender toning accent the impeccably smooth surfaces. The central reverse shows some salmon-gold that really makes the underside of the buffalo show full 3-D effect. It is hard to imagine a that there can be many SUPERB gem Buffalos that have such a stunning look, all dates combined!

Burnt orange at the upper left obverse rim turns to a lighter gold, and blends to an icy-blue at the centers. The reverse shows the same hues, but the depth of the hues is a bit more dramatic, especially the blue centers and hints of crimson at the left periphery. The rarest Buffalo nickel in the series to find in high grades, and the KEY in all grades. This date is notorious for the poor and crude strike. There are certainly areas of weakness on both sides of this near-GEM, but it does have a slightly better than average strike. Overall the eye appeal is good, the luster is more vibrant than the dull lackluster examples that generally appear on the market, and this satin sheen brings out the subtle gold, rose, and olive-tan tone. If the strike was a tad bolder, our consignor believes that this coin would have graded MS65. The demand for this date is always strong.

PCGS 178, NGC 114. Because of the rarity in GEM grades, there is likely much duplication in the population data. That said, over the last dozen years, PCGS MS64 examples have mostly sold in the \$11,500-\$15,000 range. The most recent example sold for \$11,750 in the 2016 ANA auction, which had a pleasing wood-grain tone in shades of coppery-red. This coin has a more multi-hued pastel iridescent patina that will certainly attract strong bidding activity. The current PCGS Price Guide value is \$16,000. Aside from the overall lovely look of this coin, there are merely 25 coins graded higher at PCGS, none finer than MS65, and with MS65s bringing between \$75,000 and \$105,000 in recent auctions, MS64 is the highest grade that the vast majority of collectors can ever hope to own. THE ANGEL DEE'S COLLECTION OF TONED BUFFALO NICKELS

LOT 100

5C 1928-S PCGS MS66 CAC

This is a date that almost never comes with full definition, but the presently offered SUPERB gem is about as close to a full strike as could be hoped for. A brilliant satin mint frost shines through a lively pastel toning. The obverse shows shades of icy/powder blue and rose that accents a pleasing dove/gold. The lower reverse has hints of sunset patina, while the upper portion is an icy-steel blue. A beautiful example.

PCGS 11, NGC 10, CAC 5. Only a single MS66 is recorded at PCGS as the finest. The most recent PCGS MS66 CAC sold for \$11,498 back in September 2013, and one sold for nearly \$20,000 in August 2013. The current PCGS Price Guide value is listed at \$17,500. This PQ coin has eye appeal for days and we could see serious bidding competition when it crosses the block.

5C 1929 PCGS MS67 CAC

Radiant satin luster shines on both sides of this amazing high end quality superb gem. A light, subtle silvery-blue, and delicate gold. The strike is razor sharp and the details have a bold chiseled look. The overall look is superb and it is doubtful that a better looking coin can exist.

PCGS 10, NGC 1, CAC 3. NONE ARE GRADED FINER. The last one to sell did not have a CAC sticker, and sold for only \$8,225, the last PCGS/CAC coin to sell was nearly three years ago, in the 2013 FUN Auction, for \$23,500. The current PCGS Price Guide value is listed at \$12,500 and this coin is virtually perfect so we have a suspicion that when this great looking coin crosses the block, there will be many hands in the air and bidders online. If you will be one of them we wish you good luck.

Lustrous and well struck this 29-D is HIGH END for the date and grade. The toning is very subtle, with hints of apricot and champagne tone.

PCGS 59, NGC 16, CAC 12. The last PCGS/CAC to sell brought \$2,174 in October 2014. The most recent CAC was an NGC coin that sold for \$5,405 in June 2016. The current PCGS Price Guide value is \$1,950. This coin is very pleasing and PQ.

PCGS # 3967 | EST: \$1,800+

LOT 103

5C 1929-S PCGS MS67

Rings of gold and subtle emerald iridescent toning at the rims show hints of rose and olive depending on the angle the light hits the surfaces. The central portions of the coin sport a lovely ice-blue/lilac tone that is light and does not block the bold luster from truly popping. As expected for the assigned grade the surfaces are extremely smooth, free from distracting marks or spots of any kind. The dies were heavily worn by the time this coin was struck, so there is a touch of weakness, but nothing detrimental, most of the details on the bison's shoulder are visible.

PCGS 9, NGC 5. There are NONE graded higher at either service. There has not been an MS67 sold since a PCGS coin sold in February 2014 for \$11,750. This coin has a much more eye arresting look, and should sell for more. The current PCGS Price Guide value is \$9,500. Like many of the Angel Dee's coins, this one is tied for finest graded and good luck finding another with this kind of look!

5C 1930 PCGS MS67+

An amazing SUPERB GEM, a MONSTER! The sole FINEST certified example. As our consignor says, "The obverse just reels you in!" Iridescent rings of pastel rainbow hues flaunt pink, olive, orange, and gold. The luster is vibrant and just swirls undisturbed across sleek, smooth fields and devices. This is the FINEST seen by our consignor who has specialized in Buffalo nickels for many years. That statement means a lot. The strike is bold and the quality is quite nice.

PCGS 1, NGC 0. THROW AWAY THE PRICE GUIDES ON THIS ONE! Our consignor paid a huge premium to purchase this coin for the set, and with the beauteous colors, it is not surprising. We note that there is not a single record for even a regular MS67 to compare this one to. The current PCGS Price Guide value is \$5,250 and we know that our consignor paid about 3X that amount to buy this special coin. If you demand only the BEST for your set, you need this moose of a buffalo!

LOT 105

5C 1930-S PCGS MS67+

This tie-dyed beauty is the SOLE finest graded at PCGS! Lucious pink, green, gold, and lilac iridescent hues really dance with the luster when twirled in a light. The color is spectacular and the overall quality is great. The devices are boldly struck and the luster GLOWS in the dark! One of the prettiest nickels in the set to be sure. Our consignor told us he never thought that this date could ever look like this. Another coin that we are unable to come up with enough superlatives to describe it.

PCGS 1, NGC 0. Here is another coin that the price guides can be thrown away for; PCGS does not even list a value in 67+! In regular MS67 the current PCGS Price Guide value is \$12,000. The most recent one of those to sell in auction brought \$8,225 in December 2015 and an NGC MS67 sold for \$10,350 back in January 2009. We know that even in this somewhat softer market, Buffalo nickels are always popular, and when given the opportunity to bid on the sole FINEST example, bidding participation will be heated. Good luck.

5C 1931-S PCGS MS67 CAC

Tied for finest of the date, and one of only two in this superlative grade to receive a CAC sticker. The toning on this SUPERB nickel is sublime! Blended shades of pink, rose, gold, lavender, teal, periwinkle, lilac, orange, and baby blue all combine over rich satiny surfaces. The strike is about as sharp as can be hoped for, with the details in full chiseled relief. Certainly high end, and quite memorable; this is a coin that once viewed, will not soon be forgotten!

PCGS 7, NGC 2, CAC 2. Going back to 2008, PCGS MS67s have sold for very strong prices, the most recent being for \$21,738 in October 2016. A PCGS/CAC coin, not the presently offered coin, sold for \$38,188 in the 2013 Central States auction. In 2008, the first recorded auction sale of a MS67 coin in any holder, realized \$63,250! The current PCGS Price Guide value is \$28,500 and we would not be at all surprised if this AMAZING coin sold in excess of that amount. If you appreciate coins with great eye appeal, along with being among the finest graded, you would do a disservice to your collection by not bidding on this coin!

PCGS # 3971 | EST: \$20,000+

LOT 107

5C 1934 PCGS MS67+

A very pretty example of this date, this coin is tied with one other for finest graded honors at PCGS. The rich original satin mint bloom sparkles in the light and around the boldly struck devices.

While many of the coins in the Angel Dee's set are dramatically toned, this one, is a bit more subtle, but no less impressive. The color is pearlescent in nature, with lovely gold and rose tones. The look is graceful, pleasing, and the overall quality will delight even the fussiest of collectors.

PCGS 2, NGC 2. The other PCGS MS67+ to sell in auction was CAC approved and realized a hair shy of \$10,000 in January 2015. Even though the current specimen is not CAC, the one that sold had some fly specks on the obverse in prime focal points, making this one clearly a more eye appealing example. The current PCGS Price Guide value is listed at \$9,500. Because of its relatively high mintage of over 20 million coins, the 1934 is often included in Type sets; if you need one for your set, this uber-gem will attract your attention for sure.

5C 1937-D 3-LEGS. PCGS MS64 CAC

Lovely gold tone dominates both sides. The typical subdued satin luster is noted. The 3-Legged Buffalo nickel is one of the most famous of all U.S. coins. The variety was created when an employee of the mint over zealously filed the die down to remove clash marks. These marks are still visible throughout and add a texture to the surfaces, typical of the variety. Everyone, even non-collectors have heard about the "rare 3-legged Buffalo nickel."

PCGS 191, NGC 232, CAC 41. While the last two PCGS/CAC examples sold for weak prices, \$6,463 and \$5,640 (both in April 2016), a non-CAC sold for \$9,400 sold in the same auction. The current PCGS Price Guide value is listed at \$8,000. These were selling for \$7,500+ over the past few years. We think that this one is particularly nice and should sell for a strong price.

OUR ESTIMATES

The estimates you see published in this catalog are just that: estimates. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 123

5C 1914/3 PCGS MS65 CAC

One of the more controversial issues of the 20th century, there has been much debate and research that has been done on this "overdate" issue. Since its discovery it has been collected as part of the Buffalo nickel series as an overdate similar to the 18/7-D, the current thought is that a 1913 master die was repunched by a 1914 dated hub, which then went on to create several working dies, each with vestiges of the 3 visible to some degree under the 4. PCGS now encapsulates these as 4/(3), and will only do so with certain dies. With a glass you can see parts of the top of a three under the 4, however the doubling of the date that PCGS CoinFacts uses to show the traits of one of the dies is absent. The current GEM is FS-101, one of the dies that PCGS recognizes.

The coin itself is a lustrous gem, possessing great eye appeal partially imparted by the soft pink-gold and periwinkle iridescent hues. Well struck and free of any distracting marks, this buffalo will certainly be welcome in any herd.

PCGS 2, NGC 3, CAC 2. The last one to sell realized \$32,200 in a February 2013 auction. This coin is ex Joseph C. Thomas and realized \$18,400 back in April 2009 and at the time was not CAC. PCGS CoinFacts still lists a \$27,000 value. We are not going to weigh in on the ongoing debate as to whether this variety should be included in advanced Buffalo nickel sets, other than say that it has traditionally been collected as part of the series. If you would like to own a GEM example, here is your chance.

5C 1916 DOUBLED DIE OBVERSE. PCGS MS64 CAC

In an auction full of memorable Buffalo Nickels, this coin is certainly one of the most memorable and a highlight of the entire sale. We are pleased to present this EXCEPTIONALLY RARE coin. This is one of the major rarities in the series, in consistent demand from collectors in all grades, from low-grade damaged examples to the AMAZING near-GEM we are proud to offer here. Legend Auctions has had the distinct privilege to sell the Forsythe Collection duplicate in our July 2013 Regency Auction IV for a strong \$253,000. There are perhaps around 200 examples known in all grades, most in the VF range; very few are in mint state.

The presently offered coin is one of only 3 graded MS64 at PCGS, tied for FINEST graded. The clean, smooth surfaces have a moderate satin frost that really shows off the delicate lavender, olive, tan, gold, and powder blue patina. The details are boldly struck and the doubling is exceptionally bold; you do not need a glass to see the doubled features. Overall, this example displays fantastic eye appeal. Even using a strong glass there are no flaws worthy of mention, and in the old days, this coin would have likely been cataloged as a GEM.

PCGS 3, NGC 6, CAC 2. NONE are finer! The most recent MS64 sold is the above mentioned Forsythe coin that sold for \$253,000 in July 2013; that was the first example to sell since April 2009. The record price for this date is \$276,000 for an NGC coin in April 2008. PCGS lists a value of \$250,000 and this coin will certainly sell for a strong price, perhaps even breaking a record in the process. This sale, has attracted the attention of all the Buffalo nickel specialists with the consignment of the Angel Dee's set, and we think they will stay to bid on this delicacy. The addition of this near-Gem to any set will automatically catapult you to near-Legendary status. Good luck and congratulations in advance to the winning bidder!

5C 1918-S PCGS MS65

A splendid GEM 18-S nickel. Struck from clashed dies, the Indian appears to have whiskers coming off his chin. A pretty autumnal gold show hints of rose-pink. The devices are well defined and overall very attractive. This is one of the classic condition rarities of the Buffalo nickel series. While scarce in all MS grades, above MS64, this is a very RARE date and always in demand from serious collectors.

PCGS 35, NGC 17. Only five coins are graded numerically finer at PCGS, 4 in 65+ and one in 66. The most recent PCGS graded coin was CAC-approved and realized \$21,150. Without CAC approval, generally PCGS graded examples sell in the \$10,000-\$12,000 range. We think that this coin, with its wonderful, original toning and bold visual allure should sell closer to the PCGS Price Guide value of \$16,000. This sale will long be remembered for the amazing selection of Buffalo nickels, each an important opportunity for the specialist; but this GEM creates a very important opportunity for anyone building a gem set. The sole MS66 has not appeared at auction and PCGS estimates a value of \$100,000 should one come to market.

5C 1919-S PCGS MS65

A beautiful GEM example housed in an OGH. Brilliant luster shows hints of reflectivity in the fields. A boldly struck GEM with beautifully original golden-rose-pale green tone. All the details in the Indian's hair and buffalo are accented by the color and semi-reflective luster. Despite not being CAC, this coin is all there and then some! A rarely seen date in this high grade.

PCGS 32, NGC 17. There are only 5 graded higher at PCGS. The most recent PCGS MS65 sold for \$6,463 in June 2016, and keep in mind that a 65+ sold for \$28,200 and the most recent MS66 sold for \$89,300. The current PCGS value is \$9,750. This lovely coin will certainly sell for a strong price when it crosses the block.

PCGS # 3943 | EST: \$5,500+

LOT 132

5C 1920-D PCGS MS65 CAC

Lustrous and well struck. The surfaces show only the lightest minute ticks, essentially looking the way the coin did shortly after leaving the mint. Hints of gold here and there add to the stunning allure.

PCGS 69, NGC 30, CAC 13. There has not been a CAC-approved MS65 of this date since July 2014, when a PCGS coin sold for \$5,288. The current CU price is \$5,500. Since there are only a handful of coins graded finer, including 5 65+ and 5 66s This GEM is at a perfect grade for most collectors who do not want to spend mid-five figures for a 66. You will NOT be disappointed with this coin's quality.

PCGS # 3945 | EST: \$3,500+

LOT 133

5C 1920-S PCGS MS65 CAC

A major condition rarity, where the few gems do not appear at auction with any frequency. Wonderfully satin luster on PQ gem quality surfaces show a hint of rose-gold iridescent hues. We note the typical softness in strike on the highest points of the design, but most details are visible.

PCGS 22, NGC 15, CAC 3. There are exactly TWO examples graded finer, a 65+ and a 66. The most recent PCGS coin sold two years ago, a non-CAC coin that sold for \$12,338 in December 2014. The last PCGS/CAC coin to sell was in September 2013 which sold for nearly \$26,000. The current PCGS Price Guide value is \$17,000 and we think this gem should sell for more. This is another MAJOR opportunity for the advanced Buffalo nickel collector that should not be taken lightly. Good luck!

PCGS # 3946 | EST: \$15,000+

LOT 134

5C 1923-S PCGS MS65+ CAC

Tied for SECOND finest certified by PCGS. This coin will certainly be a highlight in any advanced set of Buffalo nickels. A smooth satin glow on both sides is just the beginning of how to describe this GEM. The strike which is often soft, is bold, with nearly all details fully rendered. The surface quality truly stands up to close inspection with a strong glass, revealing no marks or flecks of any consequence.

PCGS 57, NGC 37, CAC 10. There are only FOUR MS65+s and three MS66. No MS65+ has ever sold in auction. There were three coins in PCGS MS65 (2 CAC) that sold in 2013 in the \$16,500-\$26,500 range (these may be +s today), and the last PCGS MS66 sold for \$32,200 in September 2013. In 65+ the PCGS Price Guide lists a value of \$18,500, and we think this GEM should sell for that or more. If you are putting together a top notch set of Buffalos and do not want to wait for one of the 66s to appear, you should really consider this beauty. Good luck, as this opportunity will not repeat itself again anytime soon!

5C 1926-D PCGS MS66 CAC OGH

Legend Numismatics is the proud owner of this superb Buffalo nickel and is pleased to offer this great GEM. When we saw this coin, we feel head over heels in love! We grade the coin a MS66+ easily (that does not mean PCGS ever will).

Outstanding surfaces are not just clean, they are perfect. We used a strong glass and covered every inch of the surfaces and found ZERO imperfections. A full booming luster enlivens the fiery original gold/nickel colors. There are NO spots or discolorations. Every detail is sharply struck. The eye appeal is stunning!

PCGS 25, NGC 9, CAC 12. The last one to sell in auction brought \$7,638 in a July 2016. The coin we are offering has more luster and spark. It is important to note; this coin has been off the market in a major collection for many years. This coin belongs in a top Buffalo set!

PCGS # 3958 | EST: \$7,000+

LOT 136

5C 1926-S NGC AU58

One of the KEY dates to the Buffalo series and ALWAYS in demand from collectors. Scarce in all grades, especially in VF or higher, in Mint State, the 26-S is one of the rarest of dates.

The 26-S is often weakly struck with even high grade pieces exhibiting mushy details. For the date this coin has a good strike. Hints of semi-satin luster peer from below a layer of gold-tan-steely nickel toning. Although under close magnification we see some minor lines, overall this is a very pretty AU58.

PCGS 53, NGC 47. Nearly 2 years have passed since the last NGC AU58 sold in auction, a CAC-beaned coin that realized \$3,290 in the 2015 FUN auction. The most recent 26-S in 58 to sell was a PCGS/CAC coin that realized \$4,230 in the recent 2016 ANA auction. The 26-S for many is a stopper; if you are on a budget, this coin may finally fill that hole in your set!

OUR ESTIMATES

The estimates you see published in this catalog are just that: estimates. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin.

The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 137

5C 1926-S PCGS MS65

In an auction that will long be referred to for the extensive offering of Buffalo nickels, this is arguably the most important one in the sale! The 1926-S is the undoubted rarity in the series in GEM, bested only by the 18/7-D. The presently offered coin is tied with as many as 14 examples for finest known honors at PCGS.

The luster is better than usually encountered for the date, a rich satin frost accentuates a much better than average strike. We would certainly rate this coin high end for the assigned grade, even without endorsement from CAC. The luster glows under a light dusting of gold accents a rich dove/nickel surfaces. Using a strong glass we can see a tiny speck in the right obverse field but nothing else that could possibly distract the eye. This is a very impressive example one that even the pickiest of Buffalo nickel specialists could find attractive.

PCGS 15, NGC 11. There are NONE graded finer at PCGS, and it is possible that there is duplication in the data looking for a higher grade. The most recent example sold in August 2014 for \$84,500. That coin was CAC-approved. Before that, one sold for \$94,000 and another for \$105,750. While not CAC approved like the others, cited, this GEM is very pleasing and certainly worthy of strong bidding activity. The current PCGS Price Guide value is listed at \$94,000. It may be a while before another example comes up for sale, so if you need one for a GEM set, be sure to bid liberally for this one!

TIED for FINEST GRADED! Clearly this coin has been kept safe from any possible damage since the moment it came off the dies and boasts a wonderful eye appeal. The luster booms from all over accentuating the well struck devices. Except for some minor flatness on the Indian's hair, every detail is bold and chiseled! A clear, icy-powder blue and soft lilac and gold tone adds to this coin's SUPERB eye appeal.

PCGS 16, NGC 10, CAC 4. The most recent PCGS coin to sell was NOT CAC-approved and sold for \$7,050 and the Collectors Universe Price is \$7,500. No CAC coin has EVER sold in auction, so we think that the APR in December 2015 will be exceeded when this one crosses the block. If you are building a top set of Buffalo nickels bid liberally for this moose!

Magnificent eye appeal. A rich lustrous surface shows a pleasing salmon-orange-rose-gold patination across both sides. For the date, this GEM is well struck and among the most eye appealing examples to cross this cataloger's desk. The surfaces are smooth and free of any distractions.

PCGS 79, NGC 32, CAC 19. Of those graded at PCGS, 8 of them are 65+, and there are only 7 coins at the pinnacle of the population report, all MS66. The current CU value is \$6,250. This colorful GEM, housed in an OGH, is of exceptional quality, and more vibrant than the other PCGS/CAC MS65s that have sold, the most recent for \$5,288 in December 2015. In June 2016, an NGC MS65 CAC sold for \$7,050. Keep in mind that the last MS66 sold in 2014 and realized \$23,500. Throughout this sale, Buffalo nickel collectors have many awesome opportunities to add great coins to their sets, and this is an underrated date in the series in GEM. We think this one will make people take note.

Exceptional everything. The luster is bold, with an attractive satin-like gloss. The surfaces are glassy smooth which display a beautiful icy-blue and gold color throughout. The devices are boldly struck up and overall this lustrous GEM is a delight to behold. The final issue of the ever popular Buffalo nickel, these were saved in huge quantities and are common even in MS67, but in the ultimate grade of MS68, these are very rare.

PCGS 20, NGC 21. There are NONE finer at either service. The most recent coin to sell in auction realized \$11,750 in a June 2016 auction and in that same month, an NGC 68 sold for \$13,513. 5C 1913 TYPE 2 PCGS PR68 CAC

Monumental quality for this early Proof Buffalo and toned with a perfect combination of nickel blue to the centers and framed in varying shades of gold, yellow and crimson on both sides! A more appealing example could not possibly exist, and this splendid coin was chosen to represent this date on the CoinFacts website. The strike is bold throughout, as expected for a Proof, and this is the second style issued in 1913, with the straight and level ground. Only 1,514 pieces were struck and this stellar example is tied with the absolute finest known today. The original design was altered slightly after Mint officials realized the Type 1 with raised ground allowed the letters FIVE CENTS to wear down quickly, and vending machine owners believed the original design may be deemed a counterfeit by their machines. Thus as has been the case of several newly designed coins, changes quickly came about to appease various groups.

The Buffalo Nickel design was created by James Earle Fraser, an artist from outside the Philadelphia Mint. Fraser took images of three aging chiefs and developed a composite portrait. The chiefs used were Iron Tail (Custer's opponent at Little Bighorn), Two Moons, and John Big Tree. The desired result was a Native American that could not be attributed to any one tribe. For the reverse Fraser used an American bison named Black Diamond, then living at the Central Park Zoo in New York City.

PCGS 7, NGC 6, CAC 7. A non-CAC PCGS piece sold for \$46,000.00 04/2009. The CoinFacts price guide is \$55,000. This majestic coin has few peers and should bring that or more! It truly deserves a place in the finest Type or Proof Buffalo collection!

WOW, what a spectacular SUPERIOR quality gem this Matte PR 1914 is! Exceptionally clean surfaces show a light gold and iridescent olive-rose tone that accentuates the sandblast surface and crisply and deeply struck devices. This is clearly ranked among the finest graded gems in existence and only a few are graded finer.

PCGS 91, NGC 70, CAC 44. Keep in mind only 7 PCGS coins and 1 NGC coin are graded PR67+; and at PCGS only 11 are graded finer (all PR68). The only PR67+ to ever sell in auction realized \$9,400 in July 2014. A PCGS PR68 sold for \$12,925 in the recent ANA auction, the first example sold in more than five years! A rarity in the Jefferson nickel series, especially so well preserved. The Doubled Monticello is a misnomer, it is a true DDR, with FIVE CENTS also boldly doubled. The surfaces are fresh and lustrous nickel-silver-gray with absolutely no toning.

All the devices are fully struck and exceptionally bold.

PCGS 8, NGC 1, CAC 1. This is the ONLY CAC-approved Doubled Monticello with Full Steps. That speaks VOLUMES about how hard this coin is to find with the full strike. The most recent one sold in auction in February 2010, selling for \$5,175.

The CU value is \$6,650. There is a pair of MS66+ FS and a single MS67 FS (which sold in February 2016 for \$20,563). There are a number of people putting together major sets, this Doubled Monticello will elevate any FS set it gets added to!

PCGS 11, NGC 10, CAC 5. This coin is likely duplicated in the pops as we recently crossed it from NGC/CAC to PCGS/CAC. It is currently the PCGS CoinFacts plate coin. There is a very wide range of prices realized for PR68, the most recent CAC-approved example realized \$4,320 in July 2016. An NGC/CAC coin realized \$5875 in December 2013, and it had a similar look, except it had some noticeable spots. H10C 1838-O NO STARS NGC MS64

A sultry New Orleans half dime.

A very scarce coin in Mint State, the 1838-O half dime is the first of its kind struck at the southernmost branch mint. Interestingly the half dimes struck in Philadelphia were of the With Stars type, not the more open design as here. This example shows rich pastel iridescent toning and boldly struck for the date. As the New Orleans mint was just getting its coining operations going, the first coins coming from that facility for circulation were somewhat crude, which certainly adds to the charm and appeal of the near gem being offered here.

PCGS 4, NGC 4. Only 1 coin graded MS65 at NGC is considered finer at that service, while the finest graded for the date is a PCGS MS66+. This coin sold for just shy of \$10,000 in our May 2016 Regency Auction, and before this near-gem sold, it had been over two years since the last NGC-certified example sold (February 2014, realizing \$11,750). More recently the superbly toned PCGS/CAC Reed Hawn/Gene Gardner coin sold for \$17,625. Given this coin's lovely eye appeal it should see spirited bidding.

Exceptionally sharp and satiny. An AMAZING superb grade GEM. The highest graded example at either service, and the surfaces are satiny and smooth. The fields are free from all but the most nominal and trivial clash marks which are mint made. The satiny luster swirls along both sides, showing off a radiant pearlescent hue. This coin is exceptional in every way. The low mintage of 160,000 saw many melted as the composition changed later in the year.

PCGS 1, NGC 0. This coin last sold over two years ago, selling for \$12,925 in October 2014. The only other SUPERB gem quality coin to sell was an NGC MS67 that sold way back in September 1998! There may be a tiny line or two but that is it. We are surprised that this coin did not CAC, as there is nothing we can find that would prevent it from getting a bean.

Only 1,000 were struck. PCGS 15, NGC 23. The last one sold at the lowest point in the current market cycle, realizing a very soft \$1,058, the CU value is \$1,600 and we think this one, because of its eye appeal should bring a price more inline with the next grade up, the last PR67 sold for \$2,350 in July 2015. One of the coolest die breaks in early numismatics, this is about the middle die state where the multiple die cracks merge around the date, but have not yet become a cud. There are some minor friction lines in the fields which account for the assigned grade, there is barely any wear on the highpoints. Subtle toning, particularly an orange-gold frame on the reverse rim.

The strike is better than usually seen with only slight weakness seen is on the eagle's breast. Even using a glass we can't find anything except for the slightest little mark on the reverse.

PCGS 3, NGC 0, CAC 1. No PCGS AU58s have ever sold in auction. The only AU58 to sell was an NGC coin that sold nearly a decade ago for \$16,100. The two closest graded PCGS coins to sell were an AU55 in June 2005 for \$12,650 and a MS61 that sold for \$28,200 in the 2016 ANA auction. The MS61 was very similar looking and not CAC. 10C 1839-O NO DRAPERY. PCGS MS67 CAC

A superlative GEM, among the absolute finest known of this early New Orleans issue. The surfaces are silky smooth, even using a strong glass we cannot locate a single distracting feature. The devices are RAZOR sharp, each fold in Ms. Liberty's gown, every stripe in the shield, every strand of hair, every finger, etc on the obverse and every leaf on the reverse wreath are fully embossed by a forceful and exacting blow from the dies. A delicate pearlescent lilac tone drapes the peripheral devices, leaving the centers either untuned, or with a subtle dusting of clear gold. The brilliant, satiny, nearly cartwheel textured luster really shines and brings the subtle color to life and adds depth to the chiseled devices. The quality of this coin is unusual for an early New Orleans issue, which often come somewhat crude in nature.

PCGS 3, NGC 1, CAC 2. The finest graded at PCGS is a solitary MS67, which has never been sold in auction. Prior to this coin selling in the recent 2016 ANA auction, the only PCGS MS67 was a colorful coin that sold in January 2008 for a whopping \$35,650. Since that coin has yet to reappear on the market, this is likely the finest that the advanced collector will be able to add to their cabinet. The current PCGS value is listed at \$37,500.

While the recent drop in the market for Seated type coins has brought the values of these wonderful coins to more reasonable levels, we feel that coins like this will not be sluggish for long, and NOW is the time to put great coins like this away for the long term.

Lovely peripheral toning frames pleasing light silver centers on both sides of this important early O-Mint dime. Well struck devices show bold definition from an exacting strike on both sides. The frosty mint luster has a subtle reflectivity to it, and we note a few teenie lines in the fields that limit the grade to MS62.

PCGS 5, NGC 4, CAC 5. This lovely dime has been off the market since the Simpson Seated dime collection was sold in September 2010, and it realized \$10,925 back then. LOT 158

10C 1841-O PCGS MS64+ CAC

Only two coins are graded finer at PCGS than this MS64+. This lovely coin boasts pearly lustrous silver surfaces are untuned. For an early O-mint dime, the strike is strong and bold and the luster pleasing. The details are crisply defined across Liberty's drapery and throughout the reverse wreath. Upon close inspection, we can locate, with much effort, a tiny tick or two, but nothing is distracting to the eye.

PCGS 5, NGC 5, CAC 4. This is the only MS64+ graded by either service, and there are two coins graded MS65 at each PCGS and NGC finer. This coin has not sold in auction. In October 2014 there was a PCGS/CAC MS64 that realized \$5,288 and a MS65 that sold for \$8,225; this coin should sell for somewhere in the middle. If you are building a set of O-mint Seated dimes, or collect early Seated coins in general, be sure to bid on this lovely coin.

PCGS # 4580 | EST: \$5,000+

LOT 159

10C 1842-O PCGS MS63 CAC

Bold satiny luster swirls around on both sides of this pearly-silver with pale gold and lilac iridescent hues. The color and luster help define the boldly impressed devices, exceptionally sharp throughout. Close inspection under a strong glass reveals the slightest ticks. RARE in mint state, especially so in Choice and Gem grades.

PCGS 4, NGC 4, CAC 2. This coin last sold for \$4,600 when it sold as part of the Jones Beach Collection, FUN 2007. Since then, only 1 PCGS graded coin has sold, realizing nearly \$4,300 in a July 2014 auction, that coin was NOT CAC and the current PCGS Price Guide lists a value of \$5,450. Early Seated coinage, dimes in particular are very underrated in mint state and keep in mind that only five coins are graded higher. Very rarely do MS graded pieces come up for sale, if you are building a set, take a look at this PQ piece.

PCGS # 4582 | EST: \$4,000+

LOT 160

10C 1843 PCGS MS65

Among early Seated dimes, the 1843 is EXTREMELY UNDERRATED in MS65. How is this for rare, the last PCGS MS65 sold in 2001 (to put that in perspective, the present cataloger was a senior in high school when the last one sold)! Even in NGC, the last coin was back in 2008. This date is NEVER seen! Rich and original silver-olive-russet-rose hues show a dappled texture over remarkably preserved surfaces. The strike is decent, with only a touch of weakness on the tips of the top leaves of the wreath. A satin bloom catches the light and brings the details, surface quality, and color to live.

PCGS 4, NGC 7. There are three graded finer. By no means is this a date that was saved in any quantity. As noted above, the last PCGS-graded coin sold in an October 2001 auction. The last NGC coin was a dipped white coin that sold in July 2008. Our consignor's notes state he bought this coin in 2008, privately. Since these never appear at auction, we think the Collector's Universe value of \$4,000 is too low. The Gardner coin, graded PCGS MS66 CAC sold for \$8,225 in 2014, and another sold for \$6,169 in 2015. While not CAC, this coin is all there and then some, and even if you are not a member of the Seated Liberty Collectors Club, you can understand how important an opportunity like this is. Good luck.

PCGS # 4583 | EST: \$4,000+

LOT 161

10C 1850-O PCGS AU58 CAC

Another very scarce New Orleans dime, and this is not a date/grade combination that is often seen. Pleasing mint frost still lingers in the fields, the coin is the definition of a slider, there is only a touch of minor friction on the highest design elements. We do note a dusting of clear gold and a scattering of minor marks from a very brief stay in circulation.

PCGS 5, NGC 2, CAC 2. This date is scarce in all grades AU and finer, and very few were lucky to survive in mint state. The last time an AU58 coin graded by PCGS sold at auction was back in 2010, where it sold for \$2,070 (it was not CAC). This is a date that is often difficult for collectors to find, so when they do appear, there is strong competition.

PCGS # 84029 | EST: \$2,000+

LOT 162

10C 1852-O NGC MS64

Soft silver luster shines through a lilac-olive-champagne tone. Boldly struck with all of the details in Ms. Liberty's gown, drapery, face, and hands visible. The reliefs stand out in bold relief against the smooth satin-like fields.

PCGS 5, NGC 10. There are none graded higher at PCGS, and there are two finer at NGC, 1 65 and one 66. The last NGC MS64 realized \$3,525 in August 2013 and it was very clearly dipped and unnatural. Before that, these were selling for \$4,000+. This one is quite pleasing and should bring a bid stronger than the one sold in 2013, as it is more visually appealing and original.

PCGS # 4598 | EST: \$3,000+

LOT 163

10C 1853 NO ARROWS. PCGS MS68

Wow, this SUPERB GEM is incredible. How did a dime, struck during a period of American history that was rife with economic and socio-political ups and downs survive in such an astonishing grade? Whether it was intentional or by pure happenstance, the numismatic community is lucky to be able to enjoy this virtually perfect coin. Essentially as struck, the luster is vibrant and frosty with much satin bloom. Save for a touch of golden accents, this coin is as silvery as it was at the second it came off the die. Well struck, all of the details are boldly embossed into the planchet. Using a strong glass, all we see are some planchet lines and die clash marks, which are both products of manufacture and do not affect the grade.

Because of the massive amounts of gold pouring out of the California gold fields, the proportion of gold/silver in commerce became unbalanced and the price of silver, relative to gold increased to the point where the content of silver coins was worth more than their stated values. Congress changed the weights of these coins, and the new composition was denoted by arrows placed at the date.

Before this change went into effect, only 95,000 dimes were struck using the No Arrows dies.

PCGS 4, NGC 5. This is the James Lull Collection coin, which sold in January 2005 for \$16,675. Since then, two PCGS-graded examples have sold for \$18,800. The current PCGS Price Guide value is \$26,000. This would make for a great example for a SUPERB type set, and will be a stand out in such a set.

PCGS # 4599 | EST: \$15,000+

LOT 164

10C 1853-O ARROWS. PCGS MS64

Pleasing pearly surfaces show a pale champagne/apricot tone that dusts both sides and it is amplified by the soft satin luster that catches the eye. Bold definition throughout, there is only a touch of weakness on the head and on a few places on the reverse. Overall though it is easy to see how this coin is one of the finest of the date to survive!

PCGS 3, NGC 1. There is only a single coin graded higher, a PCGS MS66. The last MS64 graded by PCGS to sell was in November 2008, and it sold for \$17,250. A truly rare coin like this should bring a strong price for the advanced collector.

PCGS # 4604 | EST: \$12,000+

LOT 165

10C 1854-O ARROWS. PCGS MS65 CAC EX ELIASBERG

A RARE gem grade example of this popular issue, pedigreed to the arguably the greatest collection of coins ever built, that of Baltimore banker Louis Eliasberg. Frosty mint brilliance shines under a pearly-gold-olive-tan toning. The strike is bold throughout.

PCGS 8, NGC 10, CAC 1. There are only two coins graded finer at PCGS, a 66 and a 66+. This is the only MS65 example approved by CAC. This gem sold in an August 2013 auction for \$7,637, attesting to the superb quality. Since it may be a long time until the MS66 comes up for sale, this is likely the finest to appear on the market for a while. We think that now is a great time to put great coins like this away in a type set, or if you are feeling ambitious and would like to challenge yourself to building a set of Seated Dimes, this might well be a great example to start off with.

PCGS # 4606 | EST: \$5,000+

LOT 166

10C 1857 PCGS MS66 CAC

An amazing GEM 1857 dime! Satin mint frost catches the light and brings life to vibrant blues and golds that dominate both the obverse and reverse. The surfaces are quite impressive. The devices are well struck and the lovely toning adds dimension to the design.

PCGS 6, NGC 15, CAC 2. This is the first time a PCGS MS66 CAC is being sold in an auction sale. This GEM brought \$3,220 in May 2012, graded MS65 CAC. The most recent PCGS MS66 (non-CAC of course) sold for \$2,585 in a weak auction (FUN 2016). The current Collectors Universe Price is \$6,000. This coin is more appealing visually, and we think it should bring a strong price when it crosses the block.

PCGS # 4614 | EST: \$2,800+

LOT 167

10C 1858-O PCGS MS66+ CAC

The FINEST PCGS graded 58-O dime and it is a gorgeous coin! There are just not enough superlatives to describe this GEM! A vibrant satin luster shines through salmon-orange, teal-blue, and rose-gold patina on both sides. This coin displays a razor sharp, crisp strike on both sides. While the experts have described the 58-O as being weakly struck and lackluster, this coin is the exact opposite. It's placement in the incomparable Gene Gardner Collection should be enough to vouch for the quality.

PCGS 2, NGC 1, CAC 2. This coin probably accounts for both CAC submissions. When this coin sold for \$21,150 in the June 2014 Gardner sale it was in a 66 CAC holder, it has since upgraded to 66+, making it the SOLE finest PCGS graded coin. The current PCGS Price Guide lists this grade at \$25,000. A stunning SUPERB coin, worthy of placement in the finest Seated dime set. Even if you do not collect Seated dimes, and need a superb coin for type or just enjoy very special coins you should certainly consider this GEM.

PCGS # 4617 | EST: \$21,000+

LOT 168

10C 1858-S PCGS AU50

A lovely AU, showing only the slightest hint of rub on the highest points of the design. Brilliant silver with hints of lilac-gold. The devices were well struck and most details are still visible. Satiny surfaces show only the most insignificant tiny marks. Rare in high grade, the small mintage of 60,000 went right into the gold rush economy and remained circulating for years. Even in XF, these are 4-figure coins.

PCGS 4, NGC 0. How is this for rare, this is only the second appearance in AU50 since this exact coin sold in 2004, realizing \$2,530. The current PCGS Price is \$2,500 and we think this coin will exceed that level when it crosses the block. A rare occasion for the advanced collector.

PCGS # 4618 | EST: \$2,000+

OUR ESTIMATES

The estimates you see published in this catalog are just that: estimates. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 169

10C 1858-S PCGS MS63 CAC

A deeply toned and ORIGINAL example, tied for second finest at PCGS. Very pretty olive, russet, and variegated forest green hues are brought to life by a soft underlying luster. The details are bold and overall this coin is extremely attractive. The advanced Seated dime collectors know that this is a date that was not saved. All 60,000 coins went right into circulation and they remained there for years; problem-free VFs are now approaching four-figure values. This is one of the more challenging dates to find in any grade, and particularly so in Mint State.

PCGS 2, NGC 0, CAC 1. This is the coin that sold for \$18,800 in 2013. Before this coin sold, you have to go back to March 2006 to find another example sold in auction. Needless to say, there are not many finer, there is an NGC MS64 and NGC MS65 and a single PCGS MS66 finer (which sold for \$88,125 in June 2014!). The current PCGS Value is \$24,000. If you are building a Mint State Seated dime set, and need an example of this RARE date, this is not an opportunity to miss!

PCGS # 4618 | EST: \$16,500+

LOT 170

10C 1860-S PCGS MS63 CAC

A very rare date in Mint State, there are less than a handful graded finer than the presently offered original MS63. Mottled gold, olive, and russet tones accentuate a well defined strike. Exceptionally rare so fine; an important condition rarity, one of only 140,000 dimes struck for circulation at San Francisco.

PCGS 4, NGC 0, CAC 3. There are only four PCGS graded coins finer, 2 each at MS64 and MS65. This coin was the most recent PCGS MS63 to sell in auction, realizing \$6,900 in the 2012 FUN Auction. Keep in mind that the most recent MS64 was an NGC coin that sold for over \$10,000 in October 2015. The current PCGS value is \$7,000 and even though the values of type coins have come down off their highs of 2013/14, a coin like this should always be sought after by specialist collectors who appreciate how truly rare it is.

PCGS # 4622 | EST: \$6,500+

LOT 171

10C 1863 PCGS MS65 CAC

A rare Civil War era dime, one of only 18,000 struck, making it the lowest mintage since the famed 1804. As the war raged on, coins were hoarded and the mint slowed production. It is interesting that the circulation strike dimes were produced using the same dies as the proofs, which explain why some of the mint state survivors have hints of prooflike surfaces. Sultry salmon, aubergine, and tangerine tones blanket both sides of this well struck GEM. The color, surfaces, and satin luster combine for superb eye appeal.

PCGS 8, NGC 9, CAC 3. The only CAC-approved example to sell was an old holder NGC coin with a GOLD CAC label that realized \$7,638 back in the 2014 ANA auction (now a PCGS MS66+). This GEM was purchased by our consignor privately back in 2013, and we cannot find an auction appearance for it. The current PCGS Price is \$4,500. If you are building a set of Seated dimes, or Civil War era coinage, this gem is very pleasing for sure.

PCGS # 4637 | EST: \$3,600+

LOT 172

10C 1864 PCGS MS66

This is one heck of a Civil War date Dime! The surfaces are actually sleek and are slightly semi-prooflike. Only with a strong glass can you see some Mint made die clashes and a few trivial scattered ticks. You can twirl the coin and see full mirrors. A moderate mellow totally original mix of blue/pewter colors swirls all over. Miss Liberty and the details are frosty and are sharply struck. The eye appeal is fantastic!

Only 11,000 were minted. PCGS 3, NGC 4. The ONLY record of an MS66 selling is for a CAC piece, which brought \$17,625 in June 2014 and the current Collectors Universe value is \$14,500. This is a date and grade seldom seen. We love it when a GEM 152-year-old Civil War coin makes an appearance. It's so historical and special. Don't blink!

PCGS # 4639 | EST: \$10,000+

LOT 173

10C 1865 PCGS MS66+ CAC

A bold, semi-PL low mintage Civil War dime. Of the 10,000 dimes struck during the course of his historically important year, this one ranks among the top ranks on the population reports. Untoned on both sides and possessing a frosty, and somewhat reflective luster, this SUPERB coin shows only light die lines (as made) in the fields. The strike is essentially full throughout and the eye appeal is wonderful.

PCGS 5, NGC 8, CAC 4. This is the ONLY 66+ at either service, and at PCGS, only 5 coins are graded higher. The last PCGS/CAC coin sold in the 2015 ANA auction, realizing \$9,008, and in October 2014 the last PCGS/CAC MS67 sold for \$14,688.

The CU value in 66+ is \$7,900, which, in light of the APRs for regular 66s, we think is low. If you are collecting Seated dimes, or putting together a collection of Civil War era GEMS, you will love this dime!

PCGS # 4641 | EST: \$7,000+

LOT 174

10C 1868 NGC MS65

Very pleasing deep violet, gold and orange toning blankets both sides. There is a rich underlying frosty luster that shows off the crisply defined devices and exceptionally clean GEM surfaces.

PCGS 5, NGC 8. The most recent example to sell was in October 2015, realizing \$2,350, and one sold in a March 2015 auction for \$3,819. Only 2 are graded finer at each service and they are all MS66. No MS65 or 66 graded by PCGS has ever sold in auction and the most recent MS66 NGC sold back in 2010. This is an exceptionally difficult date to find in high grade. If you are a Seated dime specialist, you know how long it might be until another comes up for sale.

PCGS # 4647 | EST: \$2,200+

LOT 175

10C 1872-CC PCGS AU53

All dimes struck in Carson City prior to 1875 are rare. They had limited mintages, and the few that came off the presses, went right into the wild west economy and remained in circulation for many years. Your typical survivor is low grade, and often comes with damage such as corrosion, bends, or holes. The presently offered AU53 is a wonderful exception, and the 3rd finest graded at PCGS! A light lavender-lilac-silver color accentuates the wonderful, lightly worn surfaces. Aside from a few minor abrasions, we do not see any serious marks. The strike is bold and hints of luster remain in the protected areas of the design.

PCGS 1, NGC 0. There are only 2 coins finer at PCGS, a single AU58, and a single MS63. The presently offered AU53 has not appeared in auction. Back in November 2014, a PCGS AU50 realized \$15,275. The MS63 has sold for over \$180,000, while the AU58 has never sold in auction. This is a VERY important Seated Liberty dime and an opportunity the advanced collector may never get again for quite a long time. The current Collectors Universe price is \$22,500 and it would not be shocking if this coin surpassed that level.

PCGS # 4567 | EST: \$18,000+

LOT 176

10C 1875 PCGS MS66

A visually impressive gem with fully PL surfaces. Fully struck and frosty devices and the reflective luster combine with a very pale gold accent to show bold visual appeal. We note a tiny mark or two with a strong glass, but none are distracting.

PCGS 30, NGC 42. Only 1 is in 66+ and the five finest are graded MS67. This gem last sold in auction over 10 years ago, realizing \$1,380. The current PCGS Price Guide value is listed at \$1,250.

The PL nature, showing moderate cameo contrast, will ensure strong bidding when this dime is auctioned off.

PCGS # 4672 | EST: \$1,000+

LOT 177

10C 1875-CC PCGS MS64 CAC

There are two varieties for the date, with the mintmark below or above the bow; the present coin, housed in an OGH is the variety with the mint mark below. Satiny, near-GEM quality surfaces are pleasing and the devices are well struck. Mostly untoned, we see a hint of gold dusting. The obverse shows very interesting die cracks and the CC under bow variety is somewhat scarcer than the CC above bow.

PCGS 17, NGC 13, CAC 6. There are 2 in 64+ (included in the PCGS figure), 11 in MS65, and a single MS66 finer at PCGS. This coin sold in the Frog Run Farm Sale in 2004 ANR for \$2,070. The most recent PCGS/CAC MS64 sold for \$1,399 in April 2015 and the CU value is \$1,750. This coin is PQ and should sell for a strong price.

LOT 178

10C 1877-CC PCGS MS66 CAC

Brilliant cartwheel luster shows a lot of reflective character under a layer of teal-azure toning that shows hints of gold and original silver. The strike is razor sharp throughout, with bold definition throughout. The eye appeal is exceptional!

PCGS 65, NGC 49, CAC 18. Our consignor purchased this SUPERB coin privately for \$4,000 in March 2007, and it has more eye appeal than the last PCGS/CAC example that sold for \$4,406 in an April 2014 auction sale. This beauty should sell for more! The current CU price is \$4,500. While common in lower grades, any finer than MS65 this date is RARE.

PCGS # 4683 | EST: \$3,500+

LOT 179

10C 1877-S PCGS MS65 CAC GOLD

Housed in a first generation PCGS holder. Intense silvery cartwheel luster swirls on both sides of this undergraded GEM. A very pleasing gold patina clings to the rims. The devices are crisply struck and boldly defined. While over 2.3 million dimes were struck, they were not saved, making coins graded higher than MS64 very rare.

PCGS 9, NGC 13, CAC Gold 1 (only one for the date). The last PCGS MS65 to sell was in June 2013 for \$2,820 and the most recent PCGS MS66 to sell was in April 2016 for \$3,525. In MS65 the CU price is \$3,000 and in MS66 it is \$6,000. The presently offered gem sold for \$3,450 in the March 2006 ANR auction. We think this coin will bring a price commensurate with its wonderful quality and eye appeal.

PQ through and through! Brilliant frosty silver centers yield to rings of bold crimson and rich azure. Well struck with only a tiny contact mark keeping this GEM from a higher grade. The eye appeal is superb. Among the finest from an original mintage of only 24,000.

PCGS 7, NGC 5, CAC 4. Only 2 are graded finer. The most recent MS66 was NOT CAC approved and still sold for \$2,938 back in September 2013, and the current PCGS Price Guide is \$4,000.

This PQ coin is certainly worthy of a premium bid!

10C 1884 PCGS MS67 CAC

Bold and satiny mint frost shines in the light on both sides of this untuned SUPERB GEM. Well struck and among the finest graded, only 2 are finer. Closely viewed with a glass all we see are subtle clash marks, as made. This coin looks the same as it must have the second it came off the dies.

PCGS 25, NGC 30, CAC 9. This coin has been off the market for over 10 years. The most recent to sell was NOT CAC and brought \$3,450, back in 2009! These do not come up for auction with any frequency, so the CU Price of \$3,500 might be low. Keep in mind, one of the 2 MS68s sold for \$10,575 in October 2015. A great looking type coin or for a set of Seated Dimes. Good luck!

PCGS 13, NGC 17, CAC 10. There is a solitary MS67+ included in the Population figure that is finest seen at PCGS (sold for \$8,813 in August 2015). The last MS67 PCGS/CAC sold recently in our September 2016 Regency Auction which realized \$3,055. The CU price is \$3,500 and this one should sell for a strong price.

LOT 185

10C 1889-S PCGS MS64 CAC

Despite a generous mintage of 972,000+ coins, VERY few survive in such fine condition, and is exceptionally rare in any grade above MS64. Sultry amber, gold, and cobalt blanket both sides of this well struck and brilliantly lustrous near GEM. The look is stunning; clearly this coin sat for years, unmolested in an old Wayne Raymond type album which imparted the great color.

PCGS 23, NGC 13, CAC 4. This date is totally underrated, underappreciated and undervalued. Only 9 coins are graded higher at PCGS, the finest graded is an MS66. For a coin with such low populations, the PCGS Price Guide's suggested value of \$1,700 seems low, especially considering the one that recently sold for \$3,290 in September 2016 (and was not CAC). A coin with such great eye appeal should sell for more.

LOT 187

10C 1844 PCGS PR65 CAC EX SIMPSON

In a sale with several early Proof rarities, this is a stand out. The 1844 dime has always had cache as a scarce date, dubbed the Orphan Annie dime. Scholars have estimated the mintage of this early Seated PR dime at 8, and the presently offered GEM is tied for FINEST certified by PCGS, and has an illustrious history, being the Eliasberg-Simpson coin.

Described in the May 1996 Eliasberg catalog as follows:

"Possible finest known. Delicate champagne and iridescent toning over deep mirror fields. A spectacular coin which could hardly be exceeded in appeal by any other of the few known specimens." Try as we might, there really is nothing to add to that succinct description, except to emphasize that the quality is unimprovable and this coin is ultra rare.

PCGS 2, NGC 0, CAC 3. Clearly there is duplication at CAC. The other PCGS/CAC coin is the Pittman-Kaufman-Greensboro-Gardner coin that used to be an NGC PR66 (Gardner bought it for \$64,625 in October 2012 and it sold in the October 2014 Gardner sale for \$44,063). PCGS lists a value of \$50,000 for this incredibly rare coin, it should be remembered that the current offering-the Eliasberg-Simpson coin- sold in the May 1996 Eliasberg sale for \$88,000! With Ultra rare Seated Liberty coins currently discounted in the current market, this is a great opportunity to start a set; these early proofs rarely appear at auction, making a set a serious and exciting challenge for the advanced collector.

10C 1889 PCGS PR67 CAM

Among the highest graded 1889 PR dimes, only a single PR67+ CAM is graded higher at PCGS. Completely untoned, both sides display deeply reflective fields that contrast nicely with the frosted reliefs. Well struck and pretty.

Only 711 proof dimes were struck. PCGS 5, NGC 6. There is a single 67+ finer. The last PR67 CAM sold in auction in August 2014, realizing \$2,820. An NGC PR67 CAM CAC sold in June 2013 for \$3,290. The current PCGS Price Guide is listed at \$3,750. We think that the current market has put coins like this on sale, and now would be a great time to build a set of PR dimes.

10C 1893-O PCGS MS67 CAC OGH

This is one beast of a coin! It's hard to find early O Mints this nice. Phenomenal surfaces are satiny smooth and are clean overall. A strong glowing luster enhances totally original silky white/pale gold colors. Miss Liberty and the details are frosted and have crisp sharp strikes. The eye appeal is great!

PCGS 3, NGC 1, CAC 3. PCGS has graded one coin higher. The Law/Simpson coin sold in December 2015 for \$9,750. The current Collectors Universe Value seems cheap at \$9,500.

Good luck finding another 93-O as nice!

LOT 190

10C 1895-O PCGS MS66 CAC EX SIMPSON

A VERY HIGH END GEM 1895-O.

You rarely see 1895-Os as satiny and lustrous as this, which leads us to believe that this coin has been well protected from the day it left the Mint. The surfaces have no marks of any kind, and you can only see a few light frost breaks with a strong glass. An above average luster shows off original moderate golden brown/creamy white colors. The eye appeal is superb!

PCGS 2, NGC 0, CAC 1. There is one PCGS MS66+.

Legend Numismatics bought this coin in 2005 for \$41,400 and placed it directly into the Law Collection where it has resided until 2014. In 2014, this coin sold in our December 2015 sale for \$44,650. Due to the extreme rarity, the price guide values are not up to date on this piece. We expect strong bidding on this coin.

Good luck!

LOT 191

10C 1896-O PCGS MS66+ CAC EX PITTMAN/SIMPSON

This magnificent gem, the finest PCGS graded 1896-O, was purchased raw for the Law Collection in 1997 and has resided there until 2014. There's no question that this amazing coin sat undisturbed from the day it left the bank.

The mark free surfaces have a deep satiny texture, while a moderate, above average luster shows off the dove gray, yet lively colors. We would grade the reverse MS67. Miss Liberty and the details are amazingly struck and stand out nicely. The eye appeal is superb.

PCGS 7, NGC 4, CAC 1. PCGS has now graded 2 coins MS66+ with none higher. The last MS66 PCGS CAC piece to sell at auction brought \$15,275 (FUN 2014), but there is no question this piece is worth far more. This rarity will be a standout in any O Mint, Barber, or Type Set it resides in. Good luck! This coin is being sold with no reserve.

LOT 192

10C 1897-O PCGS MS67 CAC EX SIMPSON

First, this coin clearly ranks among the finest known for the date. Second, it's one of the best New Orleans coins you will EVER see! WOW!

The flawless surfaces are satiny, yet show traces of semi-prooflike mirrors, while a surprising, full booming luster shows off vibrant, original shades of blue/lilac/gold/pale forest green. Miss Liberty and the details are frosty and have sharp, stand out strikes. The eye appeal is superb!

PCGS 4, NGC 3, CAC 4. No PCGS CAC piece has ever been sold at auction and the last PCGS non-CAC piece that sold brought \$16,100 in the 2009 CSNS sale. Legend Numismatics bought and placed this magnificent coin in the Law Collection over a decade ago for more than \$25,000. Opportunity knocks for the serious Type enthusiast, MS Barber Dime, or O Mint collector.

10C 1898-O PCGS MS67+ CAC EX SIMPSON

This is one of the truly unsung coins in the incredible Law/Simpson collection. If you sit and study the population and appearance, you'll quickly realize what an amazing coin this piece is. It is superior to all other 98-O's we have ever seen. In fact, it probably ranks as one of the finest O mints that exists!

At first glance, this coin looks more like a common later date than the finest known 1898-O! Outstanding, velvety, nearly flawless surfaces show only a small planchet impression on the obverse, while a remarkable full, booming luster shows off fully struck, frosty features. You rarely see O Mints in this condition. Both sides are frosty white with some speckles of light gold. The eye appeal is tremendous!

PCGS 1, NGC 0, CAC 1. There are no MS67's graded by PCGS or NGC, though NGC has graded one piece MS68, and a PCGS MS67 (no longer on the pop reports) sold at auction for \$36,800 in 2005. How the current Collectors Universe became only \$25,000 is a mystery to us. We believe a coin like this should easily be worth \$50,000. When is the last time you remember seeing any 1898-O in MS65 or better?

This completely original coin has a killer, full booming luster that shows off sleek, flawless surfaces. There is a thin band of gold/blue that frames the outer rims. Miss Liberty and the details are sharply struck and have light frost. The eye appeal is tremendous!

PCGS 3, NGC 1, CAC 3. Here is yet another grossly undervalued MS Barber Dime. This particular coin last in our December 2014 sale for \$9,963. We can see this coin selling for closer to \$10,000. This coin has been spanked so hard by today market-opportunity can't get any greater! Good luck!

10C 1909-S PCGS MS67 CAC

We do very much rank this coin among the all-time finest 1909S 10C. No question, the quality is all there and then some!

This is a truly special coin, especially considering the condition you typically see these in. One microscopic planchet chip on the cheek is all that keeps this coin from full MS68, with no other imperfections of any kind. A surprising luster shows off original shades of moderate gold/deep pewter colors. Miss Liberty and the details are pinpoint sharp and the eye appeal is great!

PCGS 3, NGC 0, CAC 1. This coin has never been to auction until it sold in our Regency 10 sale. Years ago, Legend paid \$12,337 for it. Now one just sold for \$7,050.00 in June 2016. The current Collectors Universe value is now a low \$9,500. Now is a great time to build a high energy, high level set. This coin more than belongs in one!

10C 1912-D PCGS MS67 CAC

An exceptional preserved GEM MS Barber Dime! Our sister company, Legend having built the #1 all-time MS Barber set, told us how these coins come. They said, this date does not come as nice as you would think. Had they still been building the Law/Simpson set, this coin would have been included!

The surfaces are as sensationally smooth and clean as you will ever see! They do have a soft satiny texture. Even using a strong glass, the surfaces will impress you with their extreme cleanliness.

A surprisingly strong luster illuminates the luxurious and totally original egg shell/pale champagne colors. This is NOT a dipped or messed with in any coin. Miss Liberty and the details are sharply struck and have delicate frost. The eye appeal is terrific!

PCGS 3, NGC 1, CAC 3. This piece is tied for FINEST graded (3 coins in 67 is not a lot at all). Legend Numismatics bought this marvelous GEM right smack during the market dip. Prior to that, the last one of these selling in auction brought \$6,168 in August 2015. The current Collectors Universe Value is \$9,500. This coin has tons of long term potential!

There's a tiny, interesting die crack running from the trunk of the neck to the rims on the obverse. Both sides have an explosive luster and the surfaces are a stunning frost white. Miss Liberty and the details are incredibly frosty and have sharp, stand out strikes. The eye appeal is tremendous!

PCGS 2, NGC 1, CAC 3. It's possible that PCGS has graded two MS67+ pieces, but none have been sold at auction. The current Collectors Universe value is \$13,500. Maybe one day, these precious rarities will get the valuations they truly deserve! Good luck!

When you twirl the coin, the mirrors have a beautiful rolling "watery" look. A mellow layer of totally original lavender/pale olive/soft rose colors blends nicely all over. Miss Liberty and the details are frosted and have needle sharp strikes. The eye appeal is terrific!

Only 425 were minted. PCGS 1, NGC 2, CAC 1. This coin last sold in June 2014 for \$11,751. We thought then that price was too cheap. PCGS has been in operations 35+ years and no other has been graded to date. To us, that is powerful proof as to the coin's rarity! Be prepared. We can see a huge bidding war for this GEM rarity!

LOT 221

10C 1915 PCGS PR67 CAC

PCGS must have been in bad mood the day this coin was submitted. We do not understand why it was not worthy of a +.

Superior mirrors beam vividly from all over. They have great clarity, cleanliness, and are highly reflective. A gorgeous mash up of totally original shades of blue/violet/purple/deep gold/green colors swirl all over the obverse. On the reverse, they form an electric rim that frames the peripheries. The most famous artists would be proud of the color scheme. Miss Liberty and the details are thickly frosted and have crisp full strikes. This coin is gorgeous!

Only 450 were minted. PCGS 8, NGC 14, CAC 12. Here too, NO PCGS CAC 1915 PR67 has ever been sold via auction (we sure do not see any records). The current Collectors Universe value is \$4,500. We can see a High End great looking coin like this selling for much more. Good luck!

OUR ESTIMATES

The estimates you see published in this catalog are just that: estimates. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

10C 1894 PCGS PR67 CAC EX YOUNG-DAKOTA

This is a wonderful SUPERB GEM. There is nothing not to love here! Deep shimmering mirrors beam from all over. The have exceptional clarity, cleanliness, and of course offer bold reflection. The obverse has totally original shades of crimson/gold/violet/golden brown/blue. The reverse has semicircular shades of pearl green/gold/russet/violet colors. Miss Liberty and the details are thickly frosted and have crisp full strikes. The eye appeal is great!

PCGS 25, NGC 25, CAC 17. The last PCGS CAC piece to sell in auction brought \$3,525 in September 2012. These have been so hammered in price over the past 2 years. How can you not want to buy a piece or build a set at today's prices?

A beautifully toned, awe-inspiring, essentially PERFECT gem. Rich multi-hued toning blankets mirrors that are bold, deep and watery and really sparkle under the cobalt, azure, crimson, magenta, burnt orange, and gold toning. The mirrors are bold and FLAWLESS. The strike is bold and overall the look of this coin is absolutely unimprovable.

PCGS 0, NGC 2, CAC 1. This AMAZING coin is the Gene Gardner coin, which sold for \$14,100 in May 2015; prior to that this coin sold for \$5,775 in November 1999. The other NGC PR68 has never sold in auction. Because there are no PCGS graded examples, PCGS does not offer a value in their Price Guide. If you are building an amazing set of Barber dimes, perhaps inspired by the offering of the Dakota-Young Collection offered in this sale, take a good look at this significantly important coin.

Superb in every respect! We do very much rank this as a VERY high end coin.

Deep mirrors beam vividly from all over. They have tremendous clarity, are super clean, and have a stunning reflection. Both sides re sprinkled with pale pewter/olive/lavender toning. This coin is far from dull. Miss Liberty and the details are fully struck and do stand out. The eye appeal is super!

ONLY 425 were minted. PCGS 19, NGC 21, CAC 18. The last PCGS CAC piece that sold in auction brought \$1,351 in May 2016. That seems too cheap. Even the Collectors Universe Value is only \$2,000. A stunning, ultra-grade example from the first year of issue of the beautiful Mercury dime series. A bold, thick frost shines through a rich original multi-hued patina. A very sharp strike on both sides show all the details of Ms. Liberty's cap and reverse.

PCGS 11, NGC 15. This SUPERB coin has eye appeal for days! The look is truly original and beautiful. This coin sold for \$4,406 in September 2014. The current PCGS Price Guide is \$10,500. A stone bold GEM with rich golden-russet-orange color on both sides that formed a pattern where the satin mint bloom can shine through and bring this coin's exceptional strike to vivid life. Exceptionally rare any finer.

PCGS 60, NGC 5, CAC 16. There are only 2 in 67+ and 2 in 68 that are graded finer than this presently offered SUPERB gem. It is amazing that so many of these dimes were so well preserved as the nation plunged into the Depression after the stock market crashed in October 1929. We suspect there is some duplication here. The last one to sell realized \$1,998 in the 2016 ANA auction and the current CU price is \$2,400. Keep in mind a 67+ will cost about double and a 68 FB, if you could find one, would cost \$25,000-\$30,000! This beauty has a great look without the high price.

10C 1931-S PCGS MS67 FB CAC EX FORSYTHE II

This SUPERB GEM appeared last in our Regency 4 Auction, where it was described as: "No question this superb GEM rarity was carefully saved since the day it left the bank. There is NOT a single negative about this coin and it's more than worthy to be tied for FINEST GRADED. This is NOT the same coin we auctioned in April. Only Forsythe could have yet another MS67 FB CAC as a duplicate and we promise, there are no more 1931-S MS67s! The surfaces are sleek and super clean. You can study this coin for hours and find no imperfections of any kind. A super strong luster shows off pretty satiny surfaces and both sides are totally ORIGINAL white. Miss Liberty and the details are exceptionally struck and stand out. The eye appeal is mesmerizing!" The 31-S dime is a lower mintage date, only 1,800,000 were struck during this depression era year and very few survived in mint state.

PCGS 9, NGC 2, CAC 3. There has not been a CAC-approved example in this grade sold since this one realized \$34,500 in our July 2013 auction. The only other CAC-approved coin to sell in auction was the William Dominick-Joshua II-Forsythe Duplicate that sold in our April 2013 Auction for \$43,125. The current PCGS Price Guide value is \$37,500. This is a very important opportunity for the advanced Mercury dime collector to acquire a coin from one of the finest collections of Mercury dimes ever assembled. Our consignor has placed a very reasonable reserve on this GEM, and should sell for substantially more! Good luck!

Simply superb and tied for finest graded! It is a rare treat that a MS68 FB Mercury dime from the San Francisco mint becomes available for advanced collectors. Most coins in this lofty grade are either 39-Ds or are from the Philadelphia mint. A lively luster dances under a dusting of dappled autumnal golden-orange on the obverse (with hints on the reverse as well). Studying the surfaces with a strong glass reveals not a single mark or line, anywhere. The luster is satiny and very pleasing.

PCGS 3, NGC 1. This coin is not CAC only because they have impossible to meet standards. The eye appeal is exceptional and we really do like this coin, which last sold in July 2013 for \$14,100 and the current PCGS Price Guide value is \$16,500. If you are building a top ranked PCGS registry set, this may be the only opportunity to acquire a 68 FB anytime soon; we wish you the best of good luck in bidding!

A real 69! superb and lustrous example with swaths of deep olive-embalmed slate toning on both sides. Hints of crimson and orange are seen as well when the coin is rotated in the light. The luster rolls on both sides of this exceptionally well struck and beautiful dime. Rotating under a light and viewing under a glass, you cannot find a single distraction anywhere. This coin is essentially as flawless as can be imagined!

PCGS 22, NGC 4. It is hard to imagine that there are 22 different examples in MS69 FB, but there was a small hoard of ultra high grade superb gems that came onto the market, each displaying a similar beautiful look! Depending on the look, these have sold for between \$6,000-\$10,000 and the current CU value is \$9,500. A great looking coin that should see spirited bidding.

Brilliant, quicksilver textured mirrors contrast nicely against the boldly frosted devices on both sides. Nearly of full gem quality, we note a few stray lines under magnification. Untoned except for a touch of clear gold at the rims, the strike is exceptional and the eye appeal is bold. This coin was expertly dipped years ago, which brought the mirrors out, but did not dull the reflectivity.

Only 600 proofs were struck of this Proof ONLY and final year. PCGS 32, NGC 20. There are only 11 CAMEOS finer at PCGS.

The last PR64 CAM sold over two years ago, realizing \$4,700. More recently a PCGS PR63 CAM CAC sold for \$4,935 at the 2015 ANA auction. The current PCGS Price in 64 CAM is \$6,150 and keep in mind that a PR65 CAM will cost over \$10,000. 25C 1805 PCGS MS64+ CAC

By far this is one of the prettiest ORIGINAL toned 1805 25C you will EVER see. In fact, for the series, the ONLY better early Draped Bust, Large Eagle quarters we have seen are the 1806/5 PCGS MS65+ CAC and the 1807 PCGS MS67 Eliasberg! The quality of this 1805 is clearly near miss MS65. In the old days before PCGS and NGC, it would have been called a GEM.

Sensational surfaces are exceedingly clean and satiny. Even using a strong glass, we do NOT see even microscopic ticks or lines-which is more than impressive. A surprisingly strong luster great adds to the bold colors. Unquestionably original shades of blue/aqua blue/pale lime/purple/burnt orange flow in and out of the centers. Miss Liberty and the details are well struck. The eye appeal is memorable and jaw dropping!

PCGS 4, NGC 3, CAC 4. PCGS has graded only 2 in MS64+. Legend Numismatics recently placed the other MS64+ into a collection. This coin should NOT be compared to most others. Again, we have NEVER seen any similar spectacular toned ones like it BELOW MS65 (even then we really one saw one for the Type). If you are into WILD toned coins, are building a killer Quarter set, or want a once in a lifetime Type coin, check this out! For sure, for its 211 years of existence it has been lovingly stored. Congrats to the buyer-this is one irreplaceable killer GEM!

LOT 239

25C 1820 BROWNING-4. SMALL 0. PCGS PR64 CAC EX NORWEB

Extraordinary eye appeal from the dazzling toning is the first sign of quality. Toned in varying shades of teal, russet, magenta, and green, perfectly organized in rings of perfection by the ages. The surfaces are free of all but a few trace lines, to be expected on these extremely fragile mirror surfaces from generations of collectors who have admired this stunning rarity. The original mintage is estimated at 10 pieces; this is a best guess by the experts at CoinFacts. Today there are only five graded between both PCGS and NGC, with probable duplication in that tiny number. CoinFacts notes that only four examples are confirmed, one of which resides at the Smithsonian and is off the market. Even more remarkable is the fact that three different die pairings were used to strike these Proofs, which must have been made to order, literally one at a time! The obverse die has perfectly executed this coin, with strong mirror fields which cause the devices to float over the glassy perfection. Notice the perfectly formed clasp on Miss Liberty's dress with the formal script "JR" for the designer John Reich apparent. The reverse too is bold throughout, with a mirror like finish but more satiny on the devices. The strike is bold on that side as well, save for the claws which show a hint of softness. Both dies show traces of die rust, yet were clearly highly polished to produce this numismatic delicacy. Of further interest is the fact that this may be one of the first Proof quarters struck by the Philadelphia Mint, as no other dates prior to 1820 have been confirmed to offer Proof finishes of this denomination.

This specimen has resided in several the most famous collections of the past century including Earle, Ryder and Norweb and will undoubtedly find a happy new home when it crosses the block. As impressive as this sounds already, the full provenance is more so: George Earle Collection (Chapman, June 1912); Hillyer Ryder; Wayte Raymond; Louis Eliasberg (duplicates from his monumental collection sold in New Netherlands June 1957); Norweb Family; Norweb Collection (Bowers and Merena, March 1988); Superior's Session of Auction '90; 1993 ANA Auction; Whitney Summerland Collection (Bowers and Merena, March 1994); Superior September 2008; Heritage August 2012, where it sold for \$88,125. Imagine how cool it is that this coin has been a part of all these famed collections, and can now be yours!

PCGS 1, NGC 1, CAC 2. Currently there are four Proof Small 0 examples currently traced: NGC PR67 B-1; NGC PR64 B-1; the presently offered PCGS PR64 CAC; and the uncertified B-2 in the Smithsonian. There are other coins that were cataloged as Proof in the past, but their present whereabouts are unaccounted for, and may well be PL circulation strikes. This is the ONLY B-4 in Proof known. For all intents and purposes this coin is unique. Combine its rarity, awesome provenance, and bold visual appeal, and you have a centerpiece for any Capped Bust quarter collection. We congratulate the winning bidder in advance.

25C 1863 PCGS PR66 CAC EX BENSON

Among the finest of 440 proofs struck during this important Civil War year. Deep watery mirrors catch the light and the colors jump to life on the obverse. Mostly deep blues/greens, we see hints of gold and rose in areas. The reverse shows a more subdued dusting of gold over watery mirrors. Very clean, icy smooth surfaces show no distracting lines and the strike is bold.

PCGS 11, NGC 11, CAC 4. Two of the coins on the PCGS Pop Report are graded 66+. None are finer at that service. This coin has floated around the market quite a bit trying to find a "forever home." Its first appearance at auction was in 2002, when it sold as part of the Benson Collection. That collector, according to the Goldberg's catalog, bought a complete set of proof quarters from 1858-1915 from famed dealer Ira Reed on August 17, 1944 which this coin was a part of. In 2002, it sold for \$9,775; most recently this coin realized \$8,913 in May 2009. The current PCGS Price Guide value for this gem is \$8,500. While the Gardner Collection coin was also PCGS PR66 CAC, and sold for only \$5,875 in July 2015, this coin has better color and eye appeal and should bring more. Keep in mind that at PCGS there are none graded finer than 66+. Good luck.

Tied for FINEST GRADED AT PCGS. This coin was last offered in our September 2016 Regency Auction, where it was NGC-graded, and it did not sell. Our consignor yet again submitted it to PCGS, where it finally crossed over. We described it as: "A STUNNING survivor of this centennial year, one of 1,150 proofs minted, and certainly among the finest in existence! This coin clearly sat undisturbed and was lovingly cared for since the time of striking. The mirrors are complete and essentially pristine, taking on the appearance of a clear, frozen lake. The mirrors are ultra deep and on the obverse a rich purple with hints of teal, emerald, and cobalt dazzle the eye. The centers of the reverse are blast silvery white with a ring of ultra sharp rainbow toning. You can see this coin screaming at you from across the room! Ms. Liberty and the eagle are boldly and crisply defined."

PCGS 3, NGC 8, CAC 2. When it was graded by NGC, this coin was awarded the NGC "STAR" for eye appeal, and we will never question it! NO PR67 CAM has sold since April 2013 when a PCGS coin sold for \$6,756; the last NGC example to sell brought \$4,600 back in April 2011. Keep in mind that both of those were clearly dipped, and neither had the STUNNING color this GEM does. The Collector's Universe value is listed at \$8,250 and we expect a record price when this wondrous coin crosses the block!

25C 1900 PCGS MS67 CAC

A superb example, chosen by the late great collector Gene Gardner for his legendary collection. Possessing of a blend of electric-blue, lavender, gold-orange, and violet patination on both sides, being just a tiny bit richer on the reverse. Sharply struck design elements, and neither side reveals mentionable marks. The eye appeal is superb and superior in quality to nearly all examples. While common in lower mint state grades, these were not preserved in GEM and are RARE in MS66 or higher grades.

PCGS 4, NGC 3, CAC 2. This coin most recently sold in a WEAK auction for \$10,281. We think this coin, with its superior eye appeal should realize more in today's market. The quality is all there and then some, and destined for a superb set of Barber quarters.

PCGS # 5625 | EST: \$9,000+

LOT 250

25C 1907-O PCGS MS67 CAC

This AMAZING GEM coin is from the superb Gene Gardner Collection, sold in October 2015, where it was described as follows: "Spectacularly toned in intermingled shades of electric-blue, violet, slate-gray, and reddish-orange, this simply gorgeous Registry Superb Gem is of equally high technical quality. The surfaces are smooth and pristine with luminous, softly frosted luster. The typical New Orleans strike seen here shows a touch of softness on the headband, shield, feathers, and fletchings, but does not diminish the appeal."

PCGS 5, NGC 1, CAC 6. The CU price is listed at \$10,000 and this coin realized \$10,575 in October 2015. A superb Barber quarter, destined for an AMAZING registry set or for an interesting superb type set.

PCGS # 5647 | EST: \$9,000+

LOT 251

25C 1911 PCGS MS66

A satiny, mostly untoned GEM that displays a hint of gold at the rims. Very pleasing the luster blooms throughout both sides and the eye appeal is bold.

PCGS 16, NGC 6. Only a dozen are graded higher, 11 in 66+ and a single 67. The last one to sell realized \$1,528 and the CU value is \$2,400. Barber coinage has really taken an undeserved beating in the market, and now would be a great time to start a set.

PCGS # 5659 | EST: \$1,400+

LOT 252

25C 1911-S PCGS MS67 CAC

Bold satiny luster swirls under a pale blue, lavender, and clear gold tone around on the obverse and the reverse is untuned and pearly. Both sides are boldly struck and very attractive. Close examination of the fields under a strong glass reveal no flaws.

This GEM possesses exceptional and superb eye appeal. A lower mintage year, with 988,000 struck for circulation.

PCGS 8, NGC 8, CAC 6. NO CAC approved example has ever sold in auction. The most recent MS67 sold for \$6,169 back in June 2014. The current PCGS Price Guide value is \$7,000 and we think this superlative, PQ coin will sell for more. There are only 2 graded finer at PCGS, both MS67+.

LOT 253

25C 1892 PCGS PR68 CAC

An amazing superior quality PR68 housed in a first generation PCGS holder. Clearly this coin was lovingly saved since the moment the proof set was brought home from the mint. It sat, undisturbed for years, allowing mother nature work her magic. The toning is deep, showing vibrant blues, reds, and purples on the obverse; the reverse a touch less evenly toned, with dark olive-russet and patches of untuned silver. The mirrors are reflective and when the light hits them at certain angles, there is clear contrast between the heavily reflective fields and frosty textured reliefs.

PCGS 5, NGC 15, CAC 5. The most recent PR68 CAC to sell was an old-holdered NGC coin that sold in March 2016 for \$14,100.

This coin is the most recent PCGS PR68 to sell, realizing \$11,750 in February 2014. There are none graded finer at PCGS in the non-Cameo designation, and clearly regardless of any designation, this is one of the finest of the first Barber quarter proof extant. The current PCGS Price is \$12,000. If you are looking to start a set of Barber quarter proofs, get started here!

25C 1892 PCGS PR67+ CAM CAC

Brilliant deep mirrors show only the lightest touch of amber and white silver tone. The mirrors are smooth as ice and this is a **STONE BOLD** superb gem. The mirrors offer deep clarity and are ultra attractive. The devices are fully and crisply struck and are amazingly frosty, providing bold contrast.

PCGS 14, NGC 17, CAC 6. The only PCGS/CAC 67+ sold for \$3,290 which is ridiculously cheap (February 2016). More recently a regular PR67 CAM CAC sold for \$3,760 in April 2016.

Keep in mind only 4 CAMS are finer, the most recent selling for \$8,225 in October 2016. The current PCGS value is \$6,500.

The market has perked up a bit since the the perfect storm of a crashing stock market, oil prices, and gold prices in the beginning of the year.

25C 1892 PCGS PR67+ DCAM CAC

UNBELIEVABLE quality and eye appeal. This coin is the epitome of a **ULTRA CAMEO** Proof Barber Quarter in high grade. We assure you, this coin looks better than most of the 68's out there!

Endless miles deep mirrors beam explosively from all over. These mirrors are so clean, crystal clear, and flashy you can use them for doing surgery or shaving while standing 10 feet away! We can't stress how much having **NO** haze like this adds to the value. If you twirl the coin, the mirrors look like a freshly formed sheet of ice. There is an ultra light hint of gold by the rims on the reverse. Miss Liberty and the details are thickly frosted an iridescent creamy white. The eye appeal is **PHENOMENAL**!

PCGS 8, NGC 5, CAC 10. PCGS has graded 3 coins PR67+ DCAM. Even in PR67, the last one to sell in major auction brought \$7,050 back in June 2013-**THREE LONG YEARS AGO**. This coin is a dazzling, unforgettable monster **GEM** that will always command a premium. If you seek one special piece or are building a breathtaking PR Barber Quarter Collection, this is a **MUST See** (actually **MUST HAVE**). We expect strong bidding here.

OUR ESTIMATES

The estimates you see published in this catalog are just that: estimates. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin.

The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

25C 1893 PCGS PR68 CAMEO CAC EX CHEYENNE COLLECTION

This is some coin! The Cheyenne collector really knew how to pick his coins for maximum quality and color. And this is a duplicate of his!

Really deep mirrors are on fire all over. They are crystal clear, have no problems of any size, and are intensely reflective. The obverse has a wonderful mix of totally original aqua blue/pale green colors. The reverse has a ring of the same and some purple. Miss Liberty and every detail are frosted and have full strikes. The eye appeal is spectacular!

Only 792 were minted. PCGS 7, NGC 8, CAC 8. The last 1913 to sell in auction brought \$12,925 in August 2013. Think about that -NONE have sold in 3 years! These are NOT as readily available as you think. BUT you can still build a complete set in a decent amount of time. This will make a great addition to GEM PR Barber or Type collection.

Rainbow tones swirl all over like an ice cream in a dish. The quality is super!

Sleek mirrors are deep and beam from all over. The mirrors are the ultimate in clarity, cleanliness and of course reflection. The mirrors look like a freshly formed sheet of ice. Beautiful tones of totally original violet/aqua green/blue/gold swirl all over the obverse. The reverse is a gorgeous aqua blue green/gold mix. Miss Liberty and the details are frosted and have needle sharp strikes. The eye appeal is phenomenal!

Only 880 were minted. PCGS 4, NGC 11, CAC 8, The last PCGS PR68 to sell in auction brought \$11,164 in a June 2014 auction sale. With all the color, quality, and rarity the PR Barber Series offers, it's a shame the market has spanked the series so hard.

We think now is the BEST time to buy coins like this!

This is an incredible coin. The obverse really does grade PR67 while the reverse is a full PR68!

Bold deep mirrors beam from all over. They are extremely clean, crystal clear, and have a bold reflection. When you twirl the coin the mirrors look like a freshly formed sheet of ice. The obverse enjoys moderate natural pale colors of lavender/blue/green/gold/amber/pale tangerine. The reverse is an explosion of iridescent blue/gold/amber/pearl green/violet colors. Miss Liberty and the details are needle sharp in strike and have thick frosting. They look slightly 3-D. The eye appeal is super!

PCSG 15, NGC 15, CAC 11. PCGS has graded 4 in PR67+. The last PCGS CAC PR67 (NOT a +) piece to sell in auction was in August 2012 and brought \$5,175. NO PR67+ have ever sold at auction. It is hard to put this GEM down. The coin is a seductrice, a siren beckoning the viewer from across the room. As close to perfection as you could ever hope to get! How a coin with such delicate mirrors and frost could survive without receiving ANY flaws is just astonishing! The mirrors are deep and dark, like a freshly cut mirror. The frosted reliefs stick out against the mirrors in stunning 3-D. Both sides are mostly black and white, deeply contrasting silver, but both sides also have a halo of gorgeous rainbow toning that forms a frame around the rims.

Only 762 proofs were struck and this is the sole finest graded by PCGS. PCGS 1, NGC 3. This MONSTER PR Barber sold for an astonishing \$35,250 the last time it sold, and is the only coin that has appeared at auction that has any color. All the NGC examples that have sold had untuned silver surfaces. The current PCGS Price Guide value is \$42,500. While most Barber proofs have softened in the last 18 months or so, this coin is special, and should not be affected by that weakness. This is the ultimate Barber quarter for a PR type set. We expect there to be fierce bidding competition when this coin crosses the block, be prepared.

A resplendent GEM that possesses a wonderful eye appeal. Gleaming surfaces show a dusting of the lightest clear gold that adds depth to the boldly embossed details. Ms. Liberty's head details are fully rendered, as are the brads on her shield and the folds in her drapery. Mintages were dropped dramatically in 1921, and only the Philadelphia mint struck quarters, as the nation dealt with a deep recession after the conclusion of WWI. Compared with earlier dates, the 21 is scarce to begin with and rare in such fine condition.

PCGS 23, NGC 8. The last NGC MS66 FH to sell was 8 ½ years ago, at the April 2008 auction, which realized \$13,225. A PCGS/CAC example just recently sold for \$18,800 at the 2016 ANA. The PCGS Price Guide value is listed at \$15,000. This coin is fresh to the market, and our consignor has placed a very reasonable reserve on it. If you are working on a set of Standing Liberty quarters, do not hesitate to look at this lovely NGC MS66 FH; it is very pleasing and will stand tall in an advanced set. Keep in mind there are only 4 graded finer at PCGS and only 1 better at NGC.

25C 1923-S PCGS MS67 CAC

Beautiful and nearly Full Head! Tied for second finest certified by PCGS. Well struck devices are accented by a radiant satin frost and a pleasing pastel iridescent toning. This is one of the dates that very rarely come with FH details, and this one is very close, displaying about 90% full details and every rivet on the shield is visible.

PCGS 7, NGC 3, CAC 2. The finest is included in the PCGS population figure, as MS67+. The last PCGS MS67 to sell in auction realized \$6,463 in February 2016 and it was not CAC. The sole 67+ has not appeared at auction, but PCGS suggests a value of \$12,000. Keep in mind that with an FH designation (being only marginally sharper struck) a 67 would cost upward of \$25,000, or more. This SUPERB coin has nearly full detail and will cost about 1/3 the price! Good Luck!

25C 1930-S PCGS MS67FH CAC

This coin is superb in every respect! No question this piece is totally original. Absolutely immaculate surfaces are satiny and are embraced by a strong unbroken luster. Even using a strong glass and searching for a long time will yield you no impairments of ANY size, anywhere. A wonderful mix of original moderate golden brown/pale green/gold colors swirl all over and blend with creamy white colors. This coin does not appear ever to have been dipped. We know it was never messed with. Miss Liberty and the details are above average in strike. Two of the rivets in the shield do show softness which is typical, but overall the eye appeal is great!

PCGS 25, NGC 30, CAC 18. Per our records, prior to this coin selling, the last 1930-S to sell in auction brought \$17,625 in a July 2015 sale. One was too high, the other too low (in the same 2015 sale one brought \$8,812.50). Still, the market has not fallen much on these ever popular not too easy to find coins. This will be a great addition to GEM Set!

Tied for FINEST graded at PCGS! Glorious satiny smooth surfaces display a beautiful mint bloom. The obverse sports pastel green-rose-pink-gold hues that sparkle with the luster. The reverse rim has an arc of rose tone, and is otherwise silvery and mint set fresh.

PCGS 120, NGC 204, CAC 28. There are only 8 PCGS MS67+s on the population report. The last one to sell was untuned and did not have the exceptional eye appeal of this beautiful SUPERB GEM. The current CU price is \$2,500 and we think this coin could exceed that level when it sells.

A beautifully toned SUPERB gem that sat undisturbed in an original mint set where the lustrous silver surfaces took on sunset orange, olive green, and soft gold. Well struck throughout.

PCGS 75, NGC 162, CAC 49. Only 10 are graded 67+ at PCGS, 2 at NGC. Only TWO are graded finer, both MS68. The last PCGS MS67+ CAC to sell in auction realized \$2,350. Keep in mind that if you can find a PCGS MS68, it will cost around \$17,000. Here is a great looking coin that would be extremely hard to improve on. Beautiful and superbly toned on the obverse. Anyone who worked the counter at a coin shop can no doubt recall thousands of BU examples coming in deals (I know I can!) but none look like this! Tied for FINEST graded by PCGS! The fields and devices are flawless! We cannot find a single tick, mark, or line.

This coin clearly sat at the top of a paper bankroll for years, imparting rainbow hues that begin at the rims and brilliantly frame Washington's bust. The reverse is brilliant and untuned. This is one of the most alluring examples of the date we have seen!

PCGS 9, NGC 38, CAC 2. This will be the ONLY CAC coin to sell in auction. The most recent PCGS-graded MS67 coins sold for \$2,374 and \$2,585. The last one was not attractively toned, and had a very bold fingerprint on the obverse. This one is so much finer! Good luck.

Simply amazing! This coin is virtually perfect. Richly reflective, deep watery mirrors are like a freshly frozen pond and display an icy-blue, clear gold, and frosty white tone. The surfaces are immaculate and flawless, truly worthy of its lofty grade in every way.

PCGS 4, NGC 21, CAC 1. It seems that only a single PCGS example has sold at auction, the "Michael Fuller Collection" coin, which is clearly a different coin from the presently offered one. That coin, not CAC approved, sold for \$11,750 in its last appearance in a June 2013 auction. The CU price is currently \$12,500. With CAC approval, this UBER gem should bring a strong price. 50C 1795 2 LEAVES. PCGS XF45

Light dove centers, with slate toning in the peripheral areas. The strike is bold and the surfaces clean, free of any significant post mintage marks or lines. In fact the only marks are some intersecting mint made adjustment marks on the obverse that were not struck out. Perhaps lightly cleaned ages ago, but now coming back nicely. Struck from the O-104 variety, rated as R-4; this example is moderately scarce and at the low end of the Condition Census.

PCGS 44, NGC 58. There is a wide range of APRs in XF45; mostly in the \$8,225 to \$14,100. The current PCGS Price Guide value is \$10,500. Early type is always popular and when attractive like this choice XF will certainly attract strong bidding activity.

50C 1797 PCGS GOOD-6 CAC

This is the RAREST silver type in the entire U.S. Federal coinage series! The Draped Bust, Small Eagle type was coined in 1796 and 1797 and both years have a combined mintage of 3,918, the majority of those being struck dated 1797. There are precious few specimens of this type available to collectors that any time one comes up for sale, the collectors swarm. Needed not just by DATE collectors, but TYPE collectors as well, even damaged pieces bring significant sums from collectors.

There were surprisingly two die pairs used to coin the estimated 2,894 half dollars dated 1797, the presently offered coin is O-101, which is rated as R-5. While heavily circulated, the wear is even and problem free. There are a few areas of weakness and a few light lines are noted for accuracy, but these minor issues can be overlooked in light of the importance of this coin.

PCGS 6, NGC 2, CAC 2. No PCGS-graded G-6 has ever sold in auction. In 2010, a PCGS G-4 sold for \$37,440; in June 2016 an NGC G-6 CAC sold for \$41,125; and in August 2013 a PCGS VG8 sold for \$52,875. If you are building a complete type set of U.S. coins, and do not want to include an impaired coin, this is a perfect specimen for you. The number of collectors that desire an example far outnumber the examples available at any one time. It could be a long time until another pleasing, low-grade example crosses the auction block. We suggest strongly that if this is a coin you need, bid liberally now.

50C 1807 O-111B. LARGE STARS, 50/20. BEARDED GODDESS. PCGS AU50 EX LINK

One of the most popular Capped Bust die varieties, and one of the few times that a die state gets its own entry into the Red Book, and thus into the focus of many more collectors than just those "Bust Half Nuts" that go into the intricacies of the 450+ die marriages listed in Overton from 1807-1836. This marriage pairs the popular 50/20 blundered denomination with an obverse die that cracked down the center early on. This break began at the chin and connected the chin to the bust, thus the moniker. As the die continued to break, the crack splintered off into the eye and headband.

This lovely AU is among the finest known for this RARE and popular issue. While considered to be Rarity-5 by experts, there are not enough to satisfy demand, and anytime one appears at auction, regardless of condition, the collectors flock to it. This one has a pleasing silver-dove tone overall with accents of tan and gold. Much frost clings to the surfaces, giving it a pearly look. There are some minor friction lines, and perhaps a hairline or two, none that are distracting. The strike is decent for the variety, which is often softly impressed on the eagle's wing.

PCGS 4, NGC 1. There are four coins finer at PCGS, evenly split between AU53 and AU55. The most recent AU to sell in auction was the PCGS/CAC AU53 Pryor-Hamilton coin that sold in the 2016 ANA sale for nearly \$15,000. That coin was of the earlier O-111a die state where the crack has begun to form, but is not as boldly defined as here. Also that coin is not as lustrous or eye appealing as the presently offered coin. We think the PCGS Price Guide does not properly value this grade, listed at \$16,000, we think that is too low. This coin is Ex Chuck Link, THE collector of Bust halves. He has been culling out duplicates, and this one can now grace another AMAZING cabinet of these very popular coins. Good luck.

50C 1808/7 PCGS MS64

A Condition Census example of this highly popular overdate. Represented by only the O-101 variety, the 08/7 is generally seen in circulated grade. In near GEM grades, it is exceptionally rare. Beautifully patinated and well struck, this MS64 is satiny and very attractive. This is a later die state with intricate cracks and die clashes that add lots of character to smooth and problem free surfaces.

PCGS 8, NGC 6. There are a total of three examples graded higher: a 64+, a 65, and a 66 graded at PCGS. Only two higher grade pieces have ever sold in auction: an NGC MS65 that sold for \$21,150 in November 2013 and the Pogue PCGS MS66 sold for nearly \$50,000 in September 2015. The most recent PCGS MS64 to sell was not as attractive as this example, realizing \$12,925 in the Gardner October 2015 sale. The current PCGS Price Guide value is listed at \$17,500. Bust half dollars are very popular in all grades, and this MS64 will fit very nicely into any high grade mint state set.

50C 1809 OVERTON-107. III EDGE. PCGS MS63 EX LINK

Rich slate-gold, lilac-dove is accentuated by a bold satin sheen that radiates from smooth surfaces and boldly struck devices on the obverse; the reverse shows some reflective luster with the dappled iridescent color.

We note a touch of striking weakness on the eagle's talons and the top part of 50C. Close inspection of the reverse shows a couple of teenie marks none too distracting and magnification is needed to see them. The O-107 is an R-3, and this coin ranks in the middle of the condition census.

PCGS 3, NGC 1. The most recent III EDGE in PCGS MS63 to sell realized \$15,275 in the 2014 FUN Auction, and is not the presently offered coin. The current Collector's Universe value is listed at \$10,000 but because of the rarity, we think that level is low. The experimental edge devices; III and XXX have always been popular among collectors, each warranting separate listings in the Guide Books. We think this coin should realize a strong price when it sells.

An amazing GEM. Deep gunmetal, teal, azure, slate toning bathes both sides of this exceptionally satiny lustrous and well struck magnificent looking Bust half dollar. The devices are so sharp and the surfaces so smooth, the coin takes on a 3-D effect that is quite enticing. This condition census example of the O-106 variety.

PCGS 2, NGC 5, CAC 4. This GEM is housed in an older generation NGC "fatty" holder where the insert did not have a barcode. It last sold for over \$18,000 when it sold, and keep in mind that there are very few finer at either service. This coin is VERY high end and original. We think this coin should sell for a very strong price. You will be hard pressed to find a more appealing GEM example of this date so if you need a gem coin for a type set, or you want to put a special Bust half away for a long term hold you must take a look at this superb coin!

This one has subtle teal, gold, and dusty silver. The strike is bold and better than normally seen.

PCGS 79, NGC 74, CAC 15. These have generally sold in the \$2,000-\$2,500 range over the last few years. This original, pretty toned coin is quite compelling and will certainly attract the attention of serious Bust Half Nuts.

A beautiful example, the toning and luster are radiant and the eye appeal superb. A glowing satin luster shines from below the shades of teal, gold, apricot, and silver. The O-101 is an R-1 variety, making it easily obtainable in most grades, but it becomes difficult in attractive Choice MS grades. This one is beautiful.

PCGS 10, NGC 2, CAC 3. The last two examples have sold for \$6,463 and \$6,325 and neither were CAC. The current CU value is listed at \$7,650. This attractive coin will certainly attract serious bidding competition from type and specialist Bust half collectors.

50C 1820/19 OVERTON-101, SQUARE BASE 2. PCGS MS65 EX ELIASBERG-KAUFMAN-LINK

A VERY RARE GEM Bust half with one of the most impressive provenance chains in the series. Stunning swirling cartwheel mint bloom dances on both the obverse and reverse. An understated pastel icy-blue, slate, golden-silver iridescent toning is brought to life by the strong luster. A few minor ticks and light lines can be detected with a strong glass, but none are distracting or take away from the great overall eye appeal. All the devices are exceptionally well struck and it is amazing how this coin was clearly taken care of since the time it was minted.

Among collectors of U.S. coins, few names are as famous or storied as Louis E. Eliasberg. His collection of coins were sold over a series of five or six auctions from 1982 to 2010 (along with duplicates sold back in 1947). This AMAZING gem half dollar was sold as lot 1769 in the May 1997 Bowers & Merena/ Stack's auction of his U.S. coins. Whether at that sale directly, or sometime after, the coin was purchased by Phil Kaufman and graded NGC MS66. In the 2009 Central States auction, this coin was sold to an unknown intermediary, and it reappeared in August 2011, where it sold to Bust half specialist Chuck Link. It is unfortunate we do not know where Louis Eliasberg purchased this coin, but it is likely that it came from the Clapp Estate in 1942.

PCGS 2, NGC 0. The other coin in the PCGS Pop is the above cited Soros-Pogue coin in 65+. This coin is the one listed as MS66 on the NGC census. The most recent comparable examples to sell in recent auctions are the Soros-Pogue coin that sold for \$47,000 in the September 2015 sale of Pogue, Part 2. We sold the Chuck Link PCGS MS64 CAC for \$18,212 in our May 2016 Regency 18 Auction in New Orleans. The current PCGS Price Guide suggests a \$32,500 price for MS65, and we shall see when this GEM sells if that number needs to be adjusted upward.

If you are looking for a great Bust half dollar for a type or date set, or a special coin to put away in a box of 20, take a look at the Eliasberg-Kaufman-Link 20/19!

Untoned and lustrous, this Ugly 3 has a bold strike and a great look. The Ugly 3 was created when an employee at the mint tried to strengthen the center of the 3 and botched it, similar to the O-101a, which was formed by trying to fix the die that was made with a broken 3 punch that was then fixed. This coin is very pleasing for the grade with a light dusting of clear gold.

PCGS 11, NGC 1, CAC 3. The only CAC approved example sold for \$4,406 way back in August 2012. The current CU price is \$4,200. This is a tougher variety and always in demand from Bust Half Nuts.

What an outstanding totally original GEM Bust Half!

O-108. Remarkable surfaces are super satiny smooth and are really PERFECT. We did use a strong glass and looked several times. A moderate luster does enhance the superb original toning. Both sides are a n even soft pearl gray color with a dot or two of reddish gold. There is no question this is a 100% ORIGINAL piece. We grade the reverse MS65+/66. Miss Liberty and the details are frosty and are well struck. The eye appeal is great!

PCGS 13, NGC 5, CAC 7. The last PCGS/CAC piece to sell in auction brought \$10,869 in October 2014. As you can see, these do NOT appear with any frequency. This coin has been long off the market. Legend Numismatics bought this GEM at the end of the ANA Show and it has NOT been in any recent auction. This will be a great fit an ANY GEM Bust or Type set. 182 years old and it looks so good! 50C 1838 REEDED EDGE. PCGS MS66

A frosty white GEM that is tied for finest with the Pogue coin and one other. A strong cartwheel luster swirls on both sides of this well struck and nicely preserved MS66. We note a few minor ticks here and there, but nothing that should offend. Every intricate detail in Liberty's hair and drapery and all the feather details are fully struck and razor sharp. Overall this lovely example of this short lived and underrated type has good overall eye appeal, and would fit nicely in a gem type set.

Once the second U.S. mint in Philadelphia opened in 1836, the new steam presses allowed for a close collar with a reeded edge to be used for half dollars. This new technology required Christian Gobrecht to modify the design of the half dollar. In 1836 a small number of halves were struck for circulation, and production began full scale in 1837. Coins dated 1836-37 are a separate type with the reverse showing the denomination as "50C." in 1838-39 it was spelled out "HALF DOL." Generally for type set purposes, most collectors just have one Reeded Edge in their sets, but this is not the case. If you are building a set, you need one of each to be complete.

PCGS 3, NGC 5. There is only a single NGC MS67 (the Smith-Clapp-Eliasberg coin) graded numerically higher.

The D. Brent Pogue coin, also a PCGS MS66 sold in May 2016 for \$44,650 and is the only PCGS-graded 1838 in MS66 to ever sell in auction. That coin had an original, but dappled golden-gray patina. This untuned, blast white gem will appeal to those who do not like deeply toned coins. The current PCGS price is \$45,000 and that is because of the Pogue coin's record. Perfect for a superb type set or date run of half dollars.

The eye appeal is strong and very pleasing. Among the top examples graded!

PCGS 2, NGC 3. ONLY A SINGLE MS67 is graded higher at PCGS, that coin, the Pittman-Gardner specimen recently sold for \$58,750 in our September 2016 Regency XVIII auction. The last MS65 coin to sell in auction, was the Dick Osburn NGC coin that sold for \$8,913 in the 2011 ANA auction. NO PCGS MS65 has EVER sold in auction before. We expect strong competition when this gem crosses the block. The CU value is currently listed at \$15,000 and it is quite possible that that level will be met or exceeded.

Only the slightest hint of friction keeps this GEM AU out of a Mint State holder. Pale silver with hints of gold, some luster survives in the devices. A one-year type coin, which increases demand from not just date collectors, but type collectors as well.

A fantastic coin, truly PQ for the somewhat modest grade. Despite a healthy mintage, 1872 halves were not saved in any real quantity; PCGS has graded 39 coins in Mint State. Both sides display a pleasing satin sheen with hints of PL texture under a blanket of teal, cobalt, and hints of violet. Well struck and giving the initial impression of a proof.

PCGS 6, NGC 5, CAC 2. This coin is from the George Dyer Collection, an old time holding that sold in Stack's Bowers November 2011 auction. This coin, because of its AMAZING look, sold for \$2,875 in that auction. It goes to show how NICE this coin is; in the 2011 ANA auction, the Dick Osburn PCGS MS63+ CAC sold for \$1,840. We think it will again sell for a very strong price.

PCGS # 6333 | EST: \$2,000+

LOT 309

50C 1852 PCGS PR63

In terms of overall rarity, this is possibly the RAREST coin in the sale. PCGS CoinFacts estimates that there were 6 proofs struck, and currently, between PCGS and NGC there are four coins on the pop reports, this one is counted twice, once at each service. The other two are an NGC PR60 and an NGC PR65. In the long series of Proof Seated Liberty half dollars, this is among the absolute rarest.

Proof fields are watery in texture, and display only the lightest hairlines, which account for the assigned grade. Over the years both sides have acquired a rich cobalt blue tone at the peripheries that blend to variegated olive, lilac, purple and gold hues, leaving the centers untuned. Exceptionally well struck, the only weakness is noted at the bottom of 18 in the date and tops of STATES. Ms. Liberty and the eagle are all well struck with all the intricate details of her drapery and the eagle's feathers are fully and crisply struck up. Despite the modest numerical grade assigned, this coin has a bold visual appeal, and advanced numismatists can surely appreciate what an important opportunity this is.

Numismatically speaking, proof silver coins struck before 1858 were made special for VIPs and other well connected folks and were made in very limited numbers, often fewer than 10. To think that any of these coins survived all the tumultuous times is remarkable. Very few numismatists have been blessed to be able to own a proof 1852 half dollar, let alone be able to see one.

PCGS 1, NGC 1. (The same coin). This choice PR half was most recently in the famed collection of Eugene Gardner, and he purchased the coin from the Stack's October 1996 auction. In the Gardner sale, this coin was in an old generation NGC PR63 holder, and was recently crossed to PCGS. The PCGS Price Guide lists a value of \$35,000 and that is completely speculative as this is the ONLY coin graded by PCGS. We think that level could very well be exceeded when this one hammers down. It is unknown to us where the NGC PR60 is and the NGC PR65 last sold in January 2015, so who knows when that one will reappear; it could be years. If you are interested in owning one of the rarest Seated Liberty half dollars, on par rarity-wise with the 1853-O No Arrows, this coin is not to be missed. We congratulate the winning bidder in advance!

50C 1859 PCGS PR66+ CAC

Unlike so many other 1859 Proofs we have seen-this coin is a roaring party of color and flash that blows everything else away!

Killer deep (and we mean deep) mirrors explode from all over. The mirrors are clean, crystal clear, and certainly have a reflection that nearly blinds you. Both sides are bathed in vivid almost electric original colors. The obverse has purple/violet/pearl green/blue/gold. The reverse has a ring of blue with purple/deep champagne centers. Miss Liberty and the details are thickly frosted and have full stand out strikes. The eye appeal is incredible-especially when you consider it is an 1859!

ONLY 800 were minted. PCGS 1, NGC 3, CAC 2. This is the ONLY PR66+. PCGS has graded 2 PR67's-neither of which is CAC'd. This is NOT your typical 1859. In fact, it's not your typical No Motto. This coin puts on one of the great color shows you will see for an early Proof half. Had it been a Civil War era date, it would be worth \$20,000+! The current Collectors Universe Value is \$14,000. If you are building GEM Toned PR half set or just buy wild color coins, this coin is a "must have"! Good luck!

Some coins you can tell just by looking at them how they were stored for ages, this gem was obviously carefully stored in tissue for many years, the toning pattern on the reverse shows the angles in which the paper was folded! The variegated color is wonderful and is rich enough to be attractive, but iridescent enough for the light to make the watery mirrors pop and shine. Close inspection reveals a stray line or two, but none are distracting and are perfectly acceptable at the PR65 grade.

Only 550 were struck during this important Civil War year. PCGS 16, NGC 23. Much prettier than the most recent NGC PR65 (which actually accounts for the last 3 NGC PR65s sold in auction, most recently selling for \$3,525 in July 2016, down from \$4,230 in October 2015). Certainly worthy of a premium bid.

This coin last sold in July 2014 for \$7,638, and there are two records for this grade that are into the 5-figures. The current CU value is \$9,000. This is a lovely Condition Census level coin and we do like the classic look!

Blazingly brilliant silver centers are surrounded by vivid toning rings on both sides, giving this cameo GEM a very classic look. Only a slight hint of striking softness on Liberty, which is common on these proofs, as the polishing process sometimes flattened some of the details in the dies. The eye appeal is awesome.

PCGS 10, NGC 12, CAC 1. No PCGS-certified PR65 CAM has sold since August 2006, think about that, a DECADE ago, before the creation of CAC. This makes figuring this GEM interesting; a PR64+ with no CAC sold for \$4,700 in October 2012 and a CAC-approved PR66 sold for \$7,931 in April 2015, intuitively this beauty should sell for somewhere between those levels, although the PCGS price is listed at \$4,450, but our consignor paid a substantially higher amount to acquire this GEM. This coin should sell for a very strong price based on its eye appeal.

Have you ever seen the sunlight reflect off a calm lake? That is exactly how the light reflects off the mirrored fields of this superb gem! They are exceptionally deep and have great clarity throughout. The devices are boldly frosted and contrast very nicely against the mirrors. An arc of teal-blue forms a frame, following the obverse stars while the rest of that side has a pleasing copper-crimson-gold iridescent hue that glows from a silvery center. The reverse is lightly toned with similar shades in a slightly dappled iridescent pattern.

The 1880s saw a dramatic drop in mintages for circulating silver coins (other than silver dollars of course). Only 8,000 circulation strikes were minted in 1883, which puts additional demand from collectors for Proof strikes, of which 1,039 were made.

PCGS 4, NGC 6, CAC 3. There are no 1883 PR half dollars graded finer at PCGS regardless of designation; there is one PR67 DCAM.

The most recent PCGS/CAC PR67 CAM to sell was the Gene Gardner coin, which sold in October 2014 for \$11,163 (that same coin sold in 2011 for \$23,000!) This super coin has a great look, and with the market firming up from its bottom earlier this year, we can see this coin selling for a price closer to the CU value of \$14,000. Since there are none numerically finer at PCGS, and the sole PR67 DCAM not CAC, this is one of the FINEST quality examples you could own. Bid liberally!

The surfaces are also smooth and super clean. There is no toning anywhere and this coin is a crisp white. Miss Liberty and the details (especially the eagle) are sharply struck; typically the reverse comes flat (this coin is not). The details are also frosted and the eye appeal is gorgeous!

PCGS 5, NGC 2, CAC 2. PCGS and NGC have graded NONE higher. Prior to this coin selling, the last one of these to sell in auction brought \$20,700 in August 2010. Six years is a VERY long time. The surfaces are smooth and have ZERO imperfections of ANY size, ANY where. Even with a strong glass you can't find anything more than an innocuous stray friction line. Both sides have a nearly full satin frost with only the lightest hint of pale gold. Most of the details are extremely well struck, only the slightest hint of weakness in some of the wing feathers. The eye appeal is excellent!

GEM MS Barbers like this just don't get much respect if they are not "super wow wee" coins. This piece caught our attention because it has really neat "skin," is original, and is a real MS66!

We do not hesitate to call this coin SUPERB. The surfaces are remarkably satiny smooth and are super clean. Only with a strong glass can you find any tiny ticks (which are widely scattered). A very strong luster enhances the totally original light golden brown color that's even all over. Miss Liberty and the details are fully struck. The eye appeal is really great!

Don't let the pops fool you, nice piece like this that probably were put away since the day they left the bank-over 100 years ago are hard to find. A beautifully toned superb PR Barber half. Deeply mirrored fields reflect like an icy pond. The devices stand out in bold relief against the pleasing fields. Golds, blues, oranges, greens, grace both sides and blend for a wonderful visual allure. A few light lint marks (as made) and a light line or two can be detected under the deep toning with careful inspection with a strong glass. In general, this coin is bold and beautiful.

PCGS 11, NGC 17. Only a couple of coins grade higher at PCGS, the finest PR68. There has not been a PCGS PR67 sold in auction since the 2007 ANA auction! That coin, which realized \$5,319 had no where near the lovely color that the currently offered beauty does. We think that this coin will see considerable bidding competition when it comes up. The current CU value is \$6,450. More recently a PCGS PR67+ CAC sold for \$8,636. A lovely type coin or for placement in a beautiful set of proof Barber halves.

A beautifully and deeply toned and reflective SUPERB example of this PR half. Well struck and expertly preserved, even using a strong glass we are unable to locate a single flaw on either side. Bold blue-green, violet, and salmon toning is pleasing and thick, but do not hide the deep reflectivity of the watery mirrors.

PCGS 6, NGC 10, CAC 2. This is the only PR67+, which sold in our December 2015 Regency Auction, without a CAC sticker.

Keep in mind that at PCGS there is only a single PR68 finer within the non-CAMEO designations, which last sold in October 2015 for \$11,163. No question this coin is a borderline PR67. It has the look and quality! Under a strong glass we see a line that is either a die line or thin scratch—that's what keeps this coin from PR67. You have to tilt the coin to see it—it IS that well-hidden. Both sides have deep, crystal clear, super clean, and highly reflective mirrors. An even coating of ORIGINAL pale purple/blue color is spread all over (the colors are NOT dull). Miss Liberty and the details are fully struck. The eye appeal is terrific!

A soft satiny sheen is truly captured brilliantly when viewed in a light. A hint of dappled toning, imparted perhaps by an old paper roll can be seen on the obverse periphery. A decent strike for this key early date Walker and we note only a tiny bag mark hidden in Liberty's flowing gown lines.

PCGS 259, NGC 137. Because of the scarcity of this coin in GEM, we think there is some duplication in the MS64 population figures. That said the last PCGS MS64 sold for \$3,408 in a September 2016 auction sale and that coin had a similar look to this one. The Collector's Universe value is \$3,500. A splendid, SUPERB coin. Bold satiny mint bloom radiates on both obverse and reverse. The right obverse displays a brilliant arc of rainbow patina that frames that side. The reverse is untoned. Both sides show a strong strike, although the highest portions of the design in the central areas of the obverse are a trifle flat, typical for the era, where churning out coins to satisfy demand during the booming wartime economy, was more important than striking quality.

PCGS 40, NGC 35, CAC 15. This is a date/grade that has obvious resubmissions and it shows in the pop reports, which has dramatically forced prices down. 50C 1949-S PCGS MS66+ FBL CAC

Highly lustrous and attractively toned. This wonderfully preserved Franklin is boldly struck and displays an even amber-gold and russet dusting of color.

PCGS 223, NGC 40, CAC 66. Only 20 of the coins in the PCGS Population are 66+ FBL. In the 2016 ANA sale, a non-CAC coin brought \$1,058 and the CU value is \$1,450. This coin has superior eye appeal and should bring a strong price.

50C 1949-S PCGS MS67 FBL CAC

Among the absolute finest graded by PCGS, bested by a single MS67+ FBL. A swirling satiny cartwheel luster brings the pearly-silver surfaces to life. The surfaces are clean and free of all distractions. There is a hint of an arc of sunset toning along the left obverse rim. This is one of the keys to the Franklin series, and perfect for inclusion in any top tier registry set.

PCGS 7, NGC 7, CAC 2. We sold the last PCGS MS67 FBL that was NOT CAC approved, for \$6,169 in our Regency 16 Auction, February 2016. The presently offered SUPERB GEM is better struck and more even looking than the other CAC coin that sold for \$7,638 in an April 2014 auction sale. The current Collector's Universe price is \$8,000 and we think this coin will sell somewhere between the two cited APRs. Good Luck!

If we were to name this coin like we are with the Northern Lights Collection, we would call this one "Lustrous Amber Waves" because of the reverse. This SUPERB 57 half is among the very finest certified. A bold luster brings life to the golden amber toning that dominates the central reverse. The obverse displays a frame of color at the rims; clearly this magnificent coin came from an original mint set, rather than surviving by pure happenstance.

PCGS 27, NGC 5, CAC 12. The PCGS and CAC figures include the single finest MS67+ FBL. The last PCGS/CAC MS67 FBL to sell in auction brought \$3,055 in December 2015. While attractive, the reverse was not as vibrant or dramatic as this presently offered superb coin. The current CU value is \$2,650. Destined for a top notch Registry Set.

This coin is spectacular! We are pleased to offer this tied for finest certified 58-D. This amazing gem has great color on the obverse with a pastel iridescent rainbows at the lower obverse that blends to a crimson gold throughout the rest of that side. The reverse color is a touch more subdued, but pretty and original. Both sides are brightly lustrous and very well struck. There are ZERO imperfections to be found anywhere.

PCGS 66, NGC 22, CAC 35. There are only TWO graded at the MS67+ FBL level at PCGS. The other coin recently sold in our May 2016 Regency Auction for \$5,875. OUR ESTIMATES

The estimates you see published in this catalog are just that: estimates. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

\$1 1795 SILVER PLUG. PCGS AU50

Silver-plug dollars are a very interesting artifact of the early U.S. mint. In the earliest days, it was of the utmost importance to ensure the the weight and composition of precious metal coins met the letter of the law. Many early coins show file marks, known as adjustment marks appear on coins that were overweight; the planchets filed lightly to take the weight down to proper levels before striking. For underweight planchets, a small hole was drilled (generally in the center) and a heavier plug of silver was inserted before striking. It was easier to do this than to melt and reroll the blanks. Of all the varieties of 1795 flowing hair dollars, the B-7, BB-18, is seen more frequently with a Silver Plug than any other die marriage.

The presently offered coin clearly shows a large plug right in the center of the planchet. Pleasing olive, russet, tan patina bathes both sides of this highly attractive AU coin. A couple of scattered light marks are accounted for but do not detract. The strike is very bold and pleasing. There is a small planchet flaw at the lower reverse, mint made.

PCGS 4, NGC 4. These do not come up for auction that often. There was one that sold in the 2014 FUN auction for \$41,125 and before in the 2009 CSNS one sold for \$54,625. The current PCGS Price Guide value is \$55,000. This is a very scarce issue and should bring more today. There are very few that are graded finer and these are highly prized by early dollar specialists. Good luck.

\$1 1795 OFF-CENTER DRAPED BUST. PCGS MS65 CAC

EX Legend Collection. This MAGNIFICENT GEM is THE highlight of the present Regency Auction. It is an impressive coin that has inspired awe among all those who have been lucky enough to handle it. Its first traced auction appearance was in 1956, and since then, only the most elegant "numisprose" has been used to explain the outright gorgeous nature, its technical quality, and physical attributes. Described in the New Netherlands 1956 auction of the famed T. James Clarke Collection as follows:

"1795 B-14. Draped bust. Variety with the bust placed too far to left. Rev. Very small eagle. Called 'Unc. Gem' and the 'Finest Known' by Mr. Clarke, this piece is the closest to it. Fully struck up at hair, and almost so at eagle's breast, less so on left leg. A sharp, neatly impressed coin; free from rubbing or friction, but close inspection reveals microscopic signs of mishandling, particularly two minute border nicks at the lower I. Reverse. Magnificent blue, pink, lavender and gold toning; both sides somewhat mirror-like. Obtained from B.G. Johnson, and undoubtedly a Brand item. Worth a generous bid!"

The words that the experts at New Netherlands penned six decades ago are somewhat harsh! We do not see either of the "border nicks" described. The toning is still magnificent and the pattern matches the black and white plate. The semi-prooflike luster, especially on the reverse makes this exceptionally sharp coin really pop out. The look is dramatic and memorable. Easily one of the most eye arresting early dollars in existence.

Since the advent of third party grading, and coins put way long ago having been more recently submitted for grading, we note that while no longer considered THE finest, it is certainly ranked among the top. The current census for the B-14, BB-51 is as follows:

NGC MS66+ CAC--A. Bridgman, Jr. (S.H. & H. Chapman, 11/27/1891), lot 694; Unknown intermediaries; "Colonel" E.H.R. Green; Green Estate; Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman Collection, Heritage November 2013 for \$910,625

Subsequently submitted to PCGS and graded MS65 and bearing a CAC sticker.

PCGS 2, NGC 0, CAC 2. We were consigned this amazing coin by Bruce Morelan, a consummate aficionado of Flowing Hair, Draped Bust, Seated, and Trade Dollars. Imagine, this was his DUPLICATE for the Off-Center Draped Bust, having recently acquired the Eliasberg-Pogue MS66. No MS65 has sold in auction since the Gilchrist coin sold in September 1999! The Collector's Universe price is currently listed at \$500,000 and with its dramatic eye appeal, and overall desirability as near the apex of the condition census, we think this coin will see a fierce bidding war break out when it crosses the block. Type collectors, early dollar specialists, or anyone wanting to own a sexy trophy coin will be contesting this GEM. We wish all bidders the best of luck, and send a note of congratulations in advance to the winning bidder.

PCGS AU53**

Ranked as # 4 on the latest Bowers Encyclopedia Condition Census, which does not include the mint state Newman coin. This is a very scarce R-4 Bust dollar with a great look. Ample frost in the fields provides a backlight to the soft pearly gold color on the obverse and reverse. Some light patches of bluish-teal at the reverse rim add to the appeal. A decent strike has rendered all but the highest central details to full effect. A few light scuffs are noted, but none that are too distracting.

Early dollars are a challenging series to collect and study. The reverse die used to strike this coin was first employed in 1795. Die steel was hard to come by and dies were used and reused until they could not strike another coin.

PCGS 2, NGC 0. The newest Bowers volume, published in early 2013 lists the pedigree as follows: Dale Friend Collection-Cardinal Collection-B&M auction July 2008 (lot 702 as PCGS AU50), realizing \$50,000-Dr. Hesselgesser Collection (Goldberg's September 2011, lot 5029), realizing nearly \$59,000. From there, the coin is traced to the "Freedom Collection" in the 2013 ANA auction, lot 4321, realizing \$36,425. The current PCGS Price Guide lists a value of \$41,500. This coin has graced several of the great collections: Friend, Cardinal, and Hesselgesser. You can now add your name to this illustrious chain. Overall a very pleasing condition census example of this scarce variety and worthy of a fine collection of early dollars.

They exclusively built the #1 all-time finest MS Set EVER: The Legend/Morelan set. So, you know we know (guilt by association) MS Seated Dollars! When we first saw this coin, we are quite impressed. The quality IS VERY high end!

Superb surfaces are remarkably clean. In fact, using a strong glass all we found was a single TINY tick. The surfaces do have a sleek semi satiny texture. A moderate (or more typical) luster enhances the toning. Both sides are a totally original mix of pale olive/russet/deep silver/pewter colors. This absolutely is NOT a dull or drab coin. Miss Liberty and the details are extremely well struck and do stand out. The eye appeal is great!

PCGS 22, NGC 20, CAC 5. In 01/2016 one of these sold for \$8,000.00. The current Collectors Universe Value is \$12,500.00-a little high but that is what REAL quality MS64's should be worth in our opinion. An MS64+ sold for \$28,200.00 04/2014. The last MS65 brought \$97,750.00 back in 2005. As you can see, these do not grow on trees. All we can say is, good luck finding another that is really as nice as this!

Our sister company, Legend Numismatics has unquestionably seen or handled EVERY top MS Seated Dollar in existence. Building the all-time #1 Legend Collection took years and a lot of hard searching, and 1855 was one of the very last dates we needed. This coin offered here had been put away by major dealer for many years at one time. Without any doubt, this coin is the second finest known 1855 that exists!

Extremely HIGH END quality stands out all over. For a big coin, the surfaces are exceptionally clean and sleek. Even using a strong glass, you will NOT be disappointed. All the ticks are super tiny and are scattered. A surprising full booming luster illuminates the fiery original golden brown/pale reddish gold that is spread all over. This is not even close to be dull or drab. Miss Liberty and the details are frosty and are sharply struck. The eye appeal is tremendous!

You can NOT beat this coin's HIGH END TRUE MS65 quality. It has three HUGE things going for it: #1 It was the late dealer David Akers PERSONAL favorite coin (David was the builder of the greatest sets ever of his generation in the 60's and 70's); #2 it was in an NGC MS66 holder; #3 This coin was in the Legend Collection of MS Seated Dollars (A Hall of Fame FINEST EVER SET) until recently. Only the coin currently in our Legend Collection is better.

The obverse is full MS65+/66 caliber. The surfaces are super clean and are sleek yet have a soft satiny texture. The reserves is MS65 quality. There are some light scuffs around 12:00. We have seen worse marks on a few "commoner" MS66's! Both sides enjoy a super strong luster. The color is a rich silver white with a hint of gold. Miss Liberty and the details are slightly frosted and have amazing full stand out strikes. The eye appeal is fabulous!

PCGS 2, NGC 1, CAC 3. We believe this coin is represented 2x on the PCGS and CAC pops (we were fiddling around seeking a 65+). There is NO auction history for any MS65. In an MS66 holder, this coin sold for \$76,375.00-which is still below what we feel this coin should be worth. At least Collectors Universe Value is close-\$85,000.00 in MS65. Once this real rarity is sold, good luck finding another. Think about how many PCGS MS65 CAC MS Seated Dollars you have seen offered in the last decade-NOT MANY AT ALL! Good luck!

Superb surfaces are a mix of semi-prooflike mirrors and a slight satiny texture. Overall, the surfaces are clean. There is some very light chatter in the right obverse field and that is it. A surprising strong luster enhances the crisp white surfaces. This is NOT a dipped out coin. Miss Liberty and the details are thickly frosted and are fully struck. We grade the reverse full MS66. The eye appeal is fabulous!

PCGS 53, NGC 44, CAC 5. DO NOT let the Population figures fool you, this is a coin that does not appear with any frequency in auction, the last PCGS PR64 sold in November 2011, realizing \$4,313 and was not CAC. That coin, ex Teich Family Collection, was very weakly struck, with most of the details at the top of Liberty's head and the adjacent stars flat. This coin, though a tad darker is much more carefully struck and is CAC approved. Keep in mind that if a PR65 was to appear, it would cost about double.

A very pleasing and ORIGINALLY toned near gem. Deep cobalt with rose accents over highly reflective mirrored fields are very pleasing. This is a classic, old time look and while the color is deep the mirrors are undisturbed. Well struck and very pleasing.

Only 900 were struck in proof for collectors. PCGS 73, NGC 81, CAC 6. This coin sold for \$4,113 back in February 2014, and is the most recent PCGS/CAC to sell in auction. Even non-CAC NGC coins have brought over \$3,500 recently. We think this coin will bring a good price when it comes up for sale. The current CU value is \$4,150. Because there are so many over graded and ugly coins dragging prices down, the prices have come down on PR type, and we think now is a great time for set building, or just putting a few especially pretty coins away. This coin would fit both bills.

A vibrantly toned and highly reflective coin with a great look that grabs you at arm's length. The mirrors are clear and deep and show only the slightest minute hairlines, which are not distracting. A beautiful azure, teal, crimson, and gold tone frame both sides and add greatly to the very pleasing, original look. The solitary flaw that needs mentioning is a well hidden staple scratch on the reverse that has long since been toned over, caused by some careless caretaker decades ago. Ms. Liberty, the bundles of agriculture products, and the eagle are all crisply and sharply struck and defined.

PCGS 137, NGC 141. We think there are clearly resubmissions going on here, with several coins getting sent in multiple times in the vain attempt of receiving a + or 65 grade. The last one to sell was in June 2014, realizing \$3,408, that coin with a very uneven and dappled toning. The current PCGS Price Guide lists a price at \$4,150. This coin is clearly finer in overall appearance to the

\$1 1879-S PCGS MS65 CAC **"THE RUMBLE IN THE JUNGLE"**

Yet another spectacular coin from the amazing Northern Lights Toned Morgan Collection. We rank the colors a full 9+ on our 1-10 scale (10 is the best).

To start, we do rank this coin as being HIGH END. Looking through the toning you will only find a few minor and scattered ticks/lines. Not only is there a full booming luster, the surfaces border on being fully prooflike. Magnificent shades of electric and totally original violet/pearl green/royal blue/pale gold swirl all over the obverse. Making the coin highly desirable are the clearly visible polka dot burlap bag toning dots. The reverse has some light gold around the rims. The eye appeal is gorgeous plus!

Take the art down from your walls, a picture of this coin is much better!

"SPEED RACER"**

Multiple WOW's for this mega monster! We unhesitatingly rank this coin a 10+!

Wild street line like burlap bag toning lines draw your eyes from miles away. Technically, this coin is all there and then some. Color wise, its beyond 95% of the wild toning patterns you will ever see. Neon like totally original colors of green/violet/gold/blue swirl together like Formula One race cars on their final lap to the winning flag. The eye appeal for sure will make your heart race!

This is one of the wildest and ridiculously toned pieces in the remarkable Northern Lights Collection. The owner paid well into FIVE Figures for it. Once you see it, you'll agree it's yet again worthy of a world record price!

\$1 1879-S PCGS MS67 CAC "THE NORTHERN LIGHTS"

This monster well deserves to be named after this awesome collection of toners. Its colors swirl just like the real Northern Lights in the sky! We rank this coin 100 on our 1-10 color scale (10 is the best). Yes, we rank it that high because in our opinion, the colors are out of this world perfect!

Why this monster is not a 67+, we do not know. It has everything quality wise. The colors are best you can ever get. PCGS must have been in bad mood the day this coin was graded, but it does not matter, the colors are so sensational you can see them from across the room. Totally original neon-like shades of violet/pearl green/royal blue/amber/gold all swirl vividly on the obverse. There is just a hint of gold on the reverse. The colors do remind us the real Northern Lights swirling show. The other problem when viewing this coin, your jaw might drop so hard it will lock! Ouch!

We can't imagine this coin selling for anything less than a world record price. If you seek one ultra wild toner, this is it!

"THE COMET"

Zoom! As this killer races past earth it leaves a trail of nothing but wild color! We rank the coin a 9+ on our 1-10 color scale (10 is the best).

First, the technical grade teases you with bordering on full MS67. We've seen much worse in higher holders.

The surfaces are not only boldly lustrous, they are boldly semi-prooflike. A rocket trail of totally original burlap bag toning blazes across the half the obverse. Neon shades of deep pearl green/violet/gold/blue bust out in a comet like train. The bottom half of the obverse is a sunset baby blue/amber color. All the colors are clearly original. The reverse has a crescent of brown/blue/olive colors. The eye total eye appeal is radical!

This is one wicked cool comet colored toner.
 It will hook you!

This nearly blinding GEM has incredible colors. We rank then a 9+ easily on our 1-10 color scale (10 is the best).

Why this magnificent GEM was not labeled a PL is a mystery to us. If you have ever seen in a casino with all the new slots, this coin looks like an explosion of the colors they give off. Chromatic shades of totally original green/gold/violet vividly swirl all over the obverse. You do not have to imagine the burlap bag toning dots-they are bold. The reverse has a small hint of gold. The eye appeal is this piece is nothing less than incredible!

Yet another Northern Lights toner that not only is mind boggling, but is SUPER HIGH END! We rank the colors a full 10 on our 1-10 scale (10 is the finest).

Shimmering and explosive cascading hues of deeper rainbow bag toning burst from the obverse. The colors are your typical original bag toned rainbows: magenta/violet/pearl green/blue/gold/amber and over 2/3 of the obverse. The reverse is untuned with a hint of gold by the rims. We rank this coin as being borderline prooflike. Mother Nature can't create a better rainbow toner. The eye appeal is tremendous!

"CREOLE COOKING"

What else could we name a wildly toned Morgan from New Orleans? We rank the colors a full 9 on our 1-10 color scale (10 is the best).

Never saw a completely toned 1881-O before. What makes this coin even more special, we think it's a 64.9. PCGS clearly had an imaginary moment by grading this coin only an MS64. A virtually flawless obverse revels in majestic shades of totally original burnt orange/pearl green/deep violet/gold colors all evenly spread out. The reverse is slightly mottled with shades of gold/blue/silver. It is very important to note the strike is crisp and full. The eye appeal is real wow power!

Oh, yeah! This is an incredible once in a lifetime wildly toned DMPL. Clearly it sat in tissue paper for a very long time. We rank the colors a full 10 on scale of 1-10 (10 is the best)!

When you see it-even from a block away, this coin will consume you. The mirrors are a full 8" deep. They have extreme clarity, display just a few trivial ticks (all deep mirrored coins pretty much do), and are incredibly reflective. The iridescent blue/purple/violet original colors jump out at you. The mirrors add a sensational 3-D like dimension to the colors. The eye appeal is one you will never forget!

We can't stress enough how this monster is a once in a lifetime coin. This cataloger (who has seen as many wild toners as anyone) has never seen ANY thing else like it in ANY date. We expect extra strong bidding and a record price to be paid by the winner. Be prepared and good luck!

ULTRA high end. This coin is so MS65 looking, even we resubmitted it on behalf of the consignor!

There is only ONE single tiny tick in the left obverse field that we think keeps it from a full MS65 designation. We cannot answer why PCGS did not + it. Amazing surfaces are sleek, semi satiny, and have a trace of prooflike mirrors. Save for that one tick, there are NO problems. A full booming luster shows off the creamy white colors that mix with a very faint hint of gold. There is no question this coin has never been messed with. Miss Liberty and the details are so pinpoint sharp in strike and frosted they look like they were carved from a block of chalk. Her check can't get any cleaner! The eye appeal is like the quality-tremendous!

\$1 1879-CC CAPPED DIE PCGS MS65 CAC

This particular piece has one been one of Legend Numismatics favorite CC's. For a Capped Die, this coin is exceptional in EVERY respect!

Capped Dies are much softer in strike and appearance compared to a regular GEM 79-CC. This coin has remarkable clean super clean and satiny smooth surfaces. To the naked eye the worst you see is a few small frost breaks. Even when using a strong glass there are NO distractions to be found. Both sides are a superb original creamy white. Miss Liberty and the details are thickly frosted and have crisp bold strikes. Her cheek is super clean and will please any picky grader. The eye appeal is magnificent!

PCGS 11, NGC 9, CAC 5. PCGS has graded only 2 MS65+ higher. The last PCGS CAC MS65 Capped Die to sell in auction brought \$39,100, way back in August 2012. \$1 1879-CC PCGS MS65 CAC EX SUNNYWOOD-SIMPSON

A truly spectacular example, and an "old friend;" we sold this coin in our Regency IX Auction of the Sunnywood/Simpson Toned Dollar Collection, October 2014, lot 130. An important date that is rarely found with beautiful toning, this coin features a lovely rainbow of subtle yet distinctive pastel hues intensifying near the left obverse rim. Exceptional quality and eye appeal, and seemingly deserving of a higher grade. Easily among the very finest survivors of this key issue. Most 1879-CC dollars are either circulated or lower graded UNC, and most of the times, the uncs are dipped white. Not only are they very rare in Gem MS65 grade, but with color like this, especially so! Think about how special this coin is: this is the coin that the Sunnywood Collector chose to represent the date in his historic toned dollar set.

PCGS 106, NGC 51, CAC 32. The NGC and PCGS pop data includes the few coins graded with the "+" designation. Only three coins have graded MS66 at PCGS; none of them have ever sold in auction, and PCGS estimates a value of \$160,000 in their Price Guide, should one come up for sale.

We closed the description in our Regency IX sale, "As you can see, this beautiful CC hasn't been on the market for many years, though we sold a nicely toned example last year for \$50,000.00! These are extremely rare with this kind of color and quality." Those words read true today, just as they did in October 2014 when this beautiful coin sold for \$29,375. If you are a serious Morgan dollar collector, whether a registry set collector or a connoisseur of color, you are afforded a very rare opportunity to bid on this amazing coin again!

Not sure which is better to call the coin: impressive or incredible. It is both!

This coin is not one of those over graded OGH coins.

We could see it grading MS67 EVERY time-even if PCGS has an off day! The surfaces just beam with sheer perfection. They are super satiny too. Even if you use a strong glass, there are NO negatives to be found. A moderate luster also shows off a small reverse crescent of gold/blue/pale violet colors. No question this coin has never dipped or messed with. Miss Liberty and every detail is thickly frosted and have full stand out strikes. Her cheek is one of the very best you will ever see on any CC! The eye appeal is super impressive!

This GEM has a lot going for it. First it is among the five FINEST graded examples of this very popular Morgan Dollar variety; only a single MS65+ is certified finer at PCGS. The luster displays lively swirling cartwheels over a semi-PL texture on the reverse. Blast white, there is nothing to disturb the wonderful eye appeal.

While there are many Morgan dollar varieties, many of them are very minor and esoteric, needing a strong glass to identify, the Tail Bar is visible by the naked eye and is often included in advanced sets of Morgans.

PCGS 5, NGC 1, CAC 2. The PCGS Pop info includes the single finest MS65+. The ONLY PCGS MS65 Tail Bar to sell was back in a July 2007 auction, which realized \$14,950. We think this coin will sell for substantially more in today's market, especially since it is brilliant and untoned. The Collectors Universe value is listed at \$22,000. Clearly this is a special coin for the advanced CC collector, and we anticipate strong bidding.

\$1 1891-CC PCGS MS66 CAC OGH

A coin that is very solid for the grade. Superior surfaces are clean and have a light satiny texture. A few tiny insignificant ticks/frost breaks can be seen. They do NOT detract. A strong luster shows off the original creamy white surfaces. There is a small toning spot on the cheek. Miss Liberty and the details are frosty and have sharp strikes. The eye appeal is excellent!

PCGS 31, NGC 8, CAC 9. The current Collectors Universe Value is \$19,000. Even a PCGS NON CAC piece sold for \$19,975 in a June 2016 auction. Do not let the pops fool you, with a CAC holder (only 9 beaned) these are impossible to find! This coin will be a nice addition to any GEM CC set!

EX WAYNE MILLER**

In the late 60's/early 70's there was no greater Morgan Authority than Wayne Miller. To this date the book he wrote still stands as an authoritative reference on Morgans!

This was the coin Wayne had chosen to be included in his then all-time greatest collection. One look and you can easily see why. We do consider this coin to be HIGH END.

Supreme surfaces are remarkably clean and sleek. In the right obverse field, there are some minor ticks/frost breaks. The reverse is full MS65 quality. A strong luster (for a 93-CC) radiates from all over. The surfaces are an original silvery white. Miss Liberty and the details are sharply struck and do have light frost. The eye appeal is superb!

PCGS 558, NGC 199, CAC 50. The last PCGS CAC piece to sell in auction brought \$14,100 in April 2016.

The current Collectors Universe value is \$18,500.

Combining the quality and history/pedigree of this superb coin should create strong bidding. Be prepared!

A stunning GEM toned Morgan! We unhesitatingly rank the colors a 9+ on our 1-10 color scale (10 is the best). We really believe this coin should have been designated a prooflike. The mirrors are a full 4" and have bold reflection. What makes this coin so valuable: its gorgeous colors. The obverse displays a cascading display of gold/violet/blue/lime colors over 2/3 of the surfaces. The reverse had a monster crescent of royal blue/pearl green/violet/amber colors that spin into a baby blue center kaleidoscope. We rank the reverse colors a full 10 (on our 1-10 Morgan color scale. The obverse is only a high 9+! WOW! If you collect toned Morgans, this belongs in your set!

\$1 1879-S PCGS MS67 PL

Bold mirrors, deeper than seen on most coins called PL, but not quite deep enough for the DMPL designation, this lustrous SUPERB gem boasts exceptional surfaces, brilliantly untuned silver cartwheels, and a razor sharp strike. The reverse is nearly of 68 quality, while a couple of tiny lines on the cheek limit the obverse to a 67.

PCGS 49, NGC 68. Only 6 are graded finer than 67 in the PL category. Despite not having a CAC bean, this coin is without question a wonderful PL example worthy of a strong bid. While the CU price is only \$1,600 the most recently auctioned example, sold for \$3,055 in a June 2016 auction. The presently offered coin has a much stronger eye appeal.

OUR ESTIMATES

The estimates you see published in this catalog are just that: estimates. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

This is one heck of a Moragn! It's hard to imagine how it survived for 136 years in this lofty state of preservation!

Flawless surfaces are silky smooth. There are light traces of semi-proof like mirrors. A velvety luster beams all over. A beautiful ring of auburn/blue frames the rims and Miss Liberty and the details enjoy thick frosting and full strikes. The eye appeal is phenomenal!

PCGS has graded only 24 pieces in MS68+! The last one to sell in auction brought \$21,150 May 2016. This coin should easily command that figure!

\$1 1880-S PCGS MS68+ PL CAC

Legend Auctions is proud to have been consigned one of the few Morgans that clearly ranks above ALL others (not just 80-S's). If PCGS had designated it a MS69 PL, we'd bow down and say YES (Legend Numismatics has owned the Jack Lee PCGS MS69PL)! This coin is every bit as nice. We are NOT exaggerating!

Shimmering mirrors border full DMPL status. We call them 6"+ in depth. They are also amazingly clear, have ZERO imperfections, and are highly reflective. The mirrors look like a freshly made sheet of glass. Miss Liberty and the details are thickly frosted a creamy white and are fully struck. Her cheek is smooth, puffy, and clean. Absolutely nothing has been done to this magnificent coin.

The eye appeal is tremendous!

PCGS 19, NGC 9, CAC 4. PCGS has graded only 2 in MS68+PL. No matter how insanely picky you are, this coin WILL ore then impress you. Somehow it has remained 100% untouched for its 136-year life. We can see strong bidding for this coin taking it to a "moon money" price (this nor the other MS68+PL have never sold at auction). The current Collectors Universe Value is \$35,000. Be prepared!

PCGS 789, NGC 512, CAC 83. Only 53 are graded "+", and very rare finer. The CU price is \$2,950 and the most recent PCGS/CAC coin to sell was a blast white coin that realized \$1,763 in a November 2016 auction. The last PCGS MS66 sold for \$7,638 in the recent ANA sale.

Boldly lustrous with a good deal of PL reflectivity, just so close to a full PL designation. Richly toned the color blends from violet, magenta, teal-green, orange, and gold. The color ranks as a 9 on our 1-10 color scale. There are a number of light scuffs and marks on the obverse that keep the grade limited to the assigned MS65 level, but certainly worth a strong bid!

This coin for sure belongs in the Northern Lights Collection. If it had been, we'd call it "baby monster" because that's what it is.

First, we grade this coin easily an MS65.9+++ . There are zero impairments to be found. Color wise, we rank this piece a full 10 on our 1-10 color scale (10 is the best). Intoxicating bands of violet/sapphire/pearl green/gold cover the entire obverse. A full booming luster makes the colors look 3-D. If this coin had been available years ago, we'd be describing it for the Northern Lights collection for sure! THIS COIN IS A TONED MORGAN LOVERS DREAM!

\$1 1883-S PCGS MS64

A famous condition rarity in the Morgan dollar series. The 83-S saw a substantial mintage of 6.25 million, but these entered right into circulation. Most known examples are circulated and are common as such. In Mint State grades, they are scarce and become rare above MS64. Brilliant cartwheel luster shines on both sides and show some hints of reflectivity. Mostly untoned, save for a halo of toning at the rims. The strike is bold, similar to other S mint dollars of the era.

PCGS 466, NGC 243. There are only 59 coins graded higher, the finest being certified as MS66. This PQ coin has been to CAC and we are not entirely sure why it did not sticker. It has a great look, and we think it is finer than the PCGS/CAC coin that sold for \$4,641 in October 2016. The current CU value is \$5,500 and we would not be shocked if this coin exceeded that amount. Keep in mind that a 65 would cost \$20,000 or more.

Nearly 20,000,000 Morgan dollars were struck in 1886 in Philadelphia alone, making this one of the most common years in the series. They become rare in MS67+ as seen here, with only a small number graded finer. This UNTONED, lustrous gem was struck from a really cool late state of the dies, magnification reveals many really neat die cracks and crumbling of the die steel toward the rims. The surfaces are otherwise very clean and pleasing and the strike bold.

PCGS 464, NGC 987, CAC 281. CAC makes no distinction between regular and "+" grades; only 56 +s have been graded at PCGS, 30 at NGC. Only 8 PCGS coins are graded higher, 7 in MS68 and a single 68+. Unquestionably 8"++ deep mirrors beam from all over, and they are relatively tick and line free.

There is a hint of faint creamy gold toning-but overall the coin is white. Miss Liberty and the details are frosted and have full and bold stand out strikes. Her cheek is remarkably clean and smooth.

The eye appeal is awesome!

PCSG 4, NGC 3, CAC 2. The only PCGS DMPL to ever sell in auction was way back in 2005! Back then the coin brought \$11,500. Time has clearly proven how rare this date and grade is. Considering this is the VERY FINEST graded, we expect strong bidding. Good luck!

While by no means rare as a date, with a PL or DMPL designation, this coin is exceptionally hard to find, especially in GEM. This MS66 PL is tied with a total of a half dozen coins as top graded PL example. The finest DMPL is graded MS65. The eye appeal is bold and very pleasing.

PCGS 6, NGC 2, CAC 4. The last one to sell was back in the 2013 FUN auction, that sold for \$4,406; before that, you had to go back to November 2005 to find one sell. If you seek only one Proof Morgan to own, this for sure is it (sorry we placed ALL the monster PR69 DCAM's with Simpson). The late Jack Lee, who was everything to Dollars (and had unlimited resources) agreed and had this monster in his set.

Amazing mirrors are deep and wildly beam from all over. They border ultra. Also, the mirrors are crystal clear, ultra clean, and have a bold reflection. If you twirl the coin, the mirrors look like a perfect freshly made piece of glass. Both sides have a dusting of light reddish gold by the outer rims. No question, this is one of the FINEST 1904 Proof Morgans that exists. Everything from its killer colors to its mirrors are awesome!

Superior deep mirrors beam wildly from all over. The mirrors enjoy great clarity, cleanliness, and are intensely reflective. They possess as bold a "rolling watery" look as you will ever see. Phenomenal and totally original colors bestowed by Mother Nature include: warm amber/evergreen/purple/navy/blue/gold that swirl all over. We believe that the small toning dot on the eagle's breast is all that keeps his coin from grading PR68. Miss Liberty and the details are sharply struck and actually do have light silver frost. The eye appeal is like the quality-phenomenal!

ONLY 650 were minted. PCGS 3, NGC 21, CAC 5. PCGS has graded only 2 in PR67+. Neither has ever appeared in auction. It is critical to note the last regular PCGS PR67 CAC 1904 brought \$25,300 nearly FIVE years ago! The current Collectors Universe is only \$30,000 for this coin. Tied with only one other coin at PCGS for finest UPRIGHT 5 1856 gold dollar. Billowing satin-golden frost swirls in the clean and problem free. Medium orange-yellow gold with hints of rose iridescence. All the devices are remarkably well struck.

PCGS 2, NGC 1. The current PCGS Price Guide value is currently listed at \$20,000 and the most recent PCGS coin to sell was the other one, realizing \$16,450 in July 2015, and the only other example was the NGC coin, CAC approved, realizing \$30,550 in a January 2014 auction. This magnificent will fit in wonderfully in any GEM gold type set, or advanced set of gold dollars.

Virtually PERFECT! Needle sharp devices are boldly contrasted with frosty reliefs and brilliant swirling cartwheel luster that shows off hints of reflective texture.

This coin is SUPERB in every way; the eye appeal is stupendous and unimprovable in visual appeal. A very low mintage year with only 5,900 struck and this one is among the absolute finest graded.

PCGS 2, NGC 3, CAC 3. The only MS68 to sell this decade was a PCGS/CAC that sold for \$42,300 in the 2015 ANA auction. Long considered a sleeper date in the series, it is much harder to find in SUPERB grades than some other dates of similar mintages.

Everything about this coin is spectacular! Bold prooflike surfaces are clean and smooth. They do offer strong flash that you can see from across the room. There are no problems. Both sides have a stunning mix of original deep gold with highlights of yellow gold. A few pinpoint toning copper dots are visible—they confirm the coin's originality (its black or green spots you do not want). Miss Liberty and every detail is needle sharp in strike—including the recut 6 in the date. We were dazzled by this GEM from a table away.

The eye appeal is that stunning!

ONLY 5,000 were minted. PCGS 6, NGC 14, CAC 6. According to our records, the last one of these to sell in auction brought \$11,750 in August 2016. This is a great gold rarity to just "put away" or sell/trade your dupes for. It will be a long time before another pops up!

Love this wonderful example that is a near miss MS piece. There are no major marks or anything unsightly to catch your eye. If you use a strong glass, all you can see are a few light lines. The surfaces are slightly semi-prooflike and do emit a booming luster. Both sides are an even and slightly deeper original yellow gold color. Most important: Miss Liberty and the details are exceptionally struck and do stand out. There is NO wear or distractions on the high points. The eye appeal is fantastic!

PCGS 32, NGC 66, CAC 14 (we think there are multiple examples of two coins). The last PCGS CAC piece to sell in auction brought \$12,925 back in March 2014. We must say; we have seen several of these—and they were NOT so nice. We think this coin represents a great opportunity to buy a TRUE QUALITY early gold coin from an obsolete mint. As time goes on, you're not going to see many more pieces like this ever offered.

PCGS 5, NGC 4. There are 3 graded MS66+ and a single MS67 graded higher at PCGS, none are finer at NGC. This was the first example in 66 sold since August 2006, when it was purchased by our consignor last year for \$7,638. The current PCGS Price Guide value is listed at \$7,500 based off of this result. We note that a 66+ CAC coin (the only higher grade to ever sell) sold for a whopping \$17,250 in March 2011. Brilliant medium orange frost shines beautifully on this well struck GEM. Like other years in the late 19th century, the mintage of quarter eagles in 1895 was very small, only 6,000 were struck, and this MS66 ranks among the finest certified by PCGS; NONE are graded higher at that firm. The surfaces are essentially flawless, with effort and a strong loupe a few tiny ticks can be found.

PCGS 11, NGC 14, CAC 5. No PCGS graded/ CAC-approved example in MS66 has ever sold at auction, and the only CAC coin to sell was an NGC coin sold way back in October 2012 for \$10,575. The Collector's Universe value is listed at \$9,250 and the most recent PCGS coin in 66 to sell realized \$7,050 in October 2016, this coin has a better overall look with richer color and a completely smooth neck and cheek. Demand for the small \$2.50 was low in the late 19th century compared to other denominations, so the mintages dropped. In 1897, fewer than 30,000 were struck for circulation. This is a scarce date in Mint State, and very rare in Superb grades as here. A rich velvety gold luster accents the bold strike and brings out the beautiful medium gold patina. This coin is a pleasure to look at, and only the slightest minor ticks are noted on both sides, but none are distracting.

PCGS 13, NGC 17. There is a solitary MS68 finer at PCGS. The last time a PCGS example in MS67 sold was nearly two years ago, at the 2015 FUN auction, realizing \$7,638. The current CU price is listed at \$7,250. Gold type sets have always been a great starting point for collectors; this would make a great representative for a type set, or late date \$2.50 Lib set. A delightful, borderline GEM proof quarter eagle. Like ALL proof gold coins this is an exceptionally RARE coin, only 80 were struck, and survivors likely number in the 20-30 range. Richly frosted and razor sharp raised reliefs contrast beautifully with deeply reflective "black" mirrored fields that display a lovely orange peel effect. Close inspection with a strong glass reveals an ancient tiny tick or two, but none are distracting from the otherwise superb visual allure.

Keep in mind that last year, an NGC PR64 Ultra Cameo brought \$15,275, and the last PCGS PR65 DCAM CAC sold for \$30,550 in May 2013. A spectacular proof gold coin that will certainly attract strong bidding competition from the advanced numismatist.

WOW! This SUPERB GEM possesses everything that the collector could possibly desire in a proof gold coin. Expansive depth and vast contrast between the highly mirrored fields and frosted devices, far and away stronger than usually seen on these rare proof gold issues. Free of any copper specks The mirrors are DEEP and black; the reliefs are bright frosty gold with a rich orange-gold patina catches the light and the coin grabs your attention from across the room. Close study of the fields under a light will discover the finely textured and highly desirable orange peel quality which adds a curious texture and adds to the sultry appeal. All the devices are fully struck as would be expected for such an amazing looking coin. Even under the most intense scrutiny with a strong glass we cannot find a single flaw worthy of description; all Quarter Eagle proofs of this date show a shallow indentation in the horizontal shield stripes on the reverse as seen here.

The more you look at it, the more mesmerizing it is. The late 1890s saw a triumph of minting techniques that all came together to create these elegant Deep Cameo proof gold coins. First off, the dies had to be carefully prepared, with an acid applied to etch the entire die surface which creates the frosted appearance. Next the frost was completely removed from the fields (the highest point on the die) by carefully polishing the surface, but not so much as to drift into the devices. This process gives the fields their mirror finish and the first few dozen coins struck under high pressure offer the greatest degree of contrast and depth of reflectivity. Long collected by specialists these proof gold coins are the absolute pinnacle of quality in American numismatics, they were struck for collectors and have been held in the highest regard ever since. Their rarity is legendary, and when found in gem or finer grades, with the Deep Cameo contrast, simply cannot be surpassed in dramatic visual effect.

Only 150 were minted. PCGS 6, NGC 5, CAC 7. This is the ONLY PR66+ and while 10 coins appear to be graded higher on the PCGS Population Report, we think that includes duplication. The most recent PCGS PR66 to sell was back in August 2011 which realized \$20,700. In June 2016 a PCGS/CAC PR67 DCAM sold for \$41,425. This coin will surely find itself selling for somewhere in the middle, perhaps around the PCGS Price Guide value of \$32,500. These unmolested and original GEM proofs are extremely rare, particularly in as fine a grade as offered here. Gold proof coins have long been called the caviar of numismatics, and we believe that any gem proof in a collection adds a mark of sophistication. If you are looking for a truly special coin to put away, here it is.

Tied for ABSOLUTE highest graded at NGC and there are no PCGS CAMEOS finer than the sole PR66 CAM.

Starting in 1901, the Mint began striking proofs with a brilliant finish, which was different from the cameo proofs than the more contrasting cameo proofs of the late 1800s. With the brilliant style as here, early strikes are the only ones that show any kind of cameo contrast. This expertly preserved superb GEM shows remarkable surface quality. Deeply mirrored liquid mercury fields contrast with the frosty reliefs.

Only 193 were struck. PCGS 0, NGC 4. There are none finer. In non-cameo, PCGS has graded 2 as PR67, NGC has graded 5, with a PR67+ finest. The most recent PR67 in any designation to sell was a non-CAM back in February 2000. The highest grade to sell in recent times was an NGC PR66 that sold in March 2011 for \$17,250. Deep black mirrors contrast very nicely with the frosted gold reliefs. Overall very pleasing to the eye. Close inspection reveals a single hairline scratch on the obverse, otherwise the surfaces are problem free and quite nice. As far as classic proof gold, this is a relatively available issue, but not in DCAM, in fact, this coin is tied for second finest graded at PCGS in the DCAM category. In the early 1900s the mint changed the way they polished dies for proof coinage, polishing both the fields and the devices which makes the entire surface reflective, unlike the earlier PR gold coins that had the recesses of the dies (reliefs) protected so they would remain frosty. A DCAM on a 1904 is a rare treat indeed!

Only 140 proof quarter eagles were struck. PCGS 2, NGC 2. There is a single PCGS DCAM finer, a 64+. NGC has graded a half dozen examples finer, a trio called PR68 Ultra Cameo. The finest example to sell in recent times is the PR64+ DCAM CAC that realized \$12,925 in May 2016. A PCGS PR64 DCAM sold for \$8,813 in the 2016 ANA auction. The CU value is \$11,000. \$2.50 1913 PCGS MS66

This is a true SUPERB GEM for the date. It has been to CAC and we think the day it went in the graders were simply in a foul mood (they rarely change their minds too). We do rank this coin as good or better than all other 1913's we have seen.

Most important, this is a genuinely clean coin. The surfaces are satiny smooth. The dreaded right reverse is clean-that is something you rarely see. A moderate luster enhances the very pretty, original pale two tone gold/pinkish gold colors. There are no discolorations. Miss Liberty and the details are frosty and are sharply struck. The eye appeal is fabulous!

PCGS 8, NGC 5. PCGS has only one MS66+ higher. The last PCGS MS66 to sell in auction brought \$28,200 in a November 2013 auction. That speaks volumes about this coin's unquestionable rarity. With the market being off from the 2008-2010 highs, now is a great time to upgrade or build a set of these. Opportunity knocks way too loud here!

A rare \$3 gold piece, and a very alluring example. Highly lustrous surfaces show a bold PL cameo like appearance when rotated in a light at certain angles, and they become satiny with much mint frost. The devices are exceptionally bold and crisply struck and are fully struck. A small abrasion in the obverse field is noted but unless using a strong loupe, it is not distracting.

VERY HIGH END quality, with spectacular eye appeal! Very RARE, only 2,000 were struck, and this near-GEM is among the four highest graded by PCGS. Highly reflective luster displays nearly fully PL mirrors. At first glance, the reverse looks like a proof. The strike is razor sharp; all the details in the wreath, feathers, etc are crisply defined. Clearly an early strike from these dies. The gold color ranges from medium gold to rich honey-orange.

PCGS 3, NGC 4, CAC 2. The last MS64 sold in February 2011 (a PCGS/CAC coin that realized \$32,200; the month earlier, an NGC/CAC coin sold for \$37,375. The only finer example to sell in auction was the D. Brent Pogue coin that sold in a very low point in the market cycle, in February 2016. That non-CAC MS65+ realized \$37,600. In MS64, the CU price is listed at \$32,500. This lovely coin will certainly bring a strong price when this coin sells. The \$3 gold series is a wonderfully challenging one to specialize in. A pleasing light olive-yellow gold surfaces show much remaining luster. The strike is bold and only light friction is noted on the highpoints and in the fields. A few light adjustment marks and minor insignificant ticks are noted under a glass, but do not distract from the overall eye appeal. All 1803 half eagles were struck using overdate obverse dies, and regardless of which of the 4 marriages, they are all generally about the same rarity. This one is a late die state of the BD-1, which is a Rarity-4 and features the reverse cud at UN. This is a pleasing example.

PCGS 30, NGC 16. The last one was CAC-approved and sold for \$12,925 back in April 2014. There has not been an NGC graded AU53 since the FUN 2008 auction. It is readily available in most grades, but scarce in Choice MS and rare any finer. The surfaces are frosty and the devices are fully struck. Greenish-gold is pleasing and original.

The quality stands up to close inspection, only the slightest ticks are noted with a strong glass. This coin does not have any planchet adjustment marks or other distracting marks.

PCGS 63, NGC 16. We know that there is duplication in the population data, with some PQ coins having been cracked out and resubmitted in hopes of a higher grade. The most recent PCGS coin was CAC approved, and sold in the 2016 ANA auction for \$30,550; that coin had some ticks, but the color and luster were touch richer. In 2013 two coins sold in auction, one realizing \$31,725 and the other, not CAC approved realized \$38,188. PCGS suggests a value of \$33,000 and keep in mind that an MS64 will cost around \$40,000-\$50,000. If you are working on a Mint State set of U.S. gold types, take a good look at this pleasing coin.

This is a scarce date in higher grades, most seen are in the VF-XF range (per Akers), and much scarcer than the 64,472 mintage would suggest; experts estimate that perhaps 250-350 survive in all grades.

PCGS 29, NGC 20, CAC 4. We all know how tough CAC is on gold coins, and there's never been a CAC example in XF40 sold in auction. The last PCGS graded coin sold in 2014 for \$1,773, but that coin was not original like this coin, it had clearly been conserved. The current CU value is \$2,400. Struck during the first year of the Civil War, the 1861 half eagle is one of the more common dates in the No Motto series, HOWEVER, in MS64 or higher grades it becomes very difficult to find. A bold satin luster swirls over very pleasing surfaces overall and well struck design devices. Hints of rich orange and subtle rose gold hues add to the strong visual appeal. A scattering of tiny marks exist, but account for the assigned grade.

\$5 1863 PCGS MS61

An incredibly RARE Civil War half eagle. This is the FINEST certified coin at PCGS, and is NOT an AU58 that slipped into an MS holder. The Liberty Head \$5 series is one of the longest running series in American numismatics, and is full of scarce and rare dates. There are some coin that are common in low grades, and in higher mint state grades, become rare. This date is a major rarity in all grades. This is among the 10 most elusive coins in the entire series and PCGS estimates a survival of 30-40 out of 2,442 coins struck. The fields display a bold, semi-PL reflective luster, and the devices are nice and frosty, creating a pleasing contrast. Well struck with full, crisp definition in all the details. As normally seen on PL gold, any little tick or mark is exaggerated.

PCGS 1, NGC 1. This is one of the underrated rarities, a certified Mint State piece has NEVER sold in auction. Even looking at the PCGS auction archives, even an uncertified MS coin is not listed. The closest coin to this one selling was a PCGS AU58+ that is clearly a different coin, that sold for \$32,900 in the 2016 ANA auction. While very few collectors attempt to build a complete set of \$5 Libs, there are clearly those that specialize in Civil War era issues. If you are one of those, be sure to take a close look at this marvelous Mint State 1863, clearly the FINEST certified by PCGS and sure to be a centerpiece in a well chosen set.

A very rare, and underrated date in the Liberty \$5 series. This pleasing mid-grade circulated coin is about the average grade for those certified by PCGS. Only 17,000 were struck for circulation, and they served the the intended purpose, only a single example is graded Mint State. The surfaces are even and show only a few microscopic ticks and lines are noted. The devices were boldly struck when this coin came off the dies, as noted by the remaining details. This is a date that very rarely appears at auction. If you are a serious collector of US gold, this is a date you can wait for years until one comes up, and many of the survivors are impaired beyond what is acceptable for PCGS or NGC to certify.

PCGS 5, NGC 5. Only two dozen are graded finer at PCGS and we doubt that those are all different coins. The most recent PCGS example in XF40 to sell was way back in July 2003, and that record is meaningless today, as are the results for the last PCGS VF35 (sold in November 1996) or the XF45 that sld in June 2002. Because of the dearth of pricing data, the PCGS Price Guide value of \$5,600 may well prove to be too low. Good luck.

Legend Auctions is pleased to have been consigned a really nice example of a really rare \$5 Liberty. It is tied for finest graded; there are NO MS pieces graded at PCGS or NGC.

This coin is a true borderline MS piece. Pretty much immaculate surfaces are devoid of any big marks or problems. Only with a strong glass can you find some light lines and microscopic tick or two. There is a lot of original luster still visible. The luster adds life to the even original gold color. There are NO spots or discolorations from any wear. Miss Liberty and the details are extremely well struck. The eye appeal is great!

PCGS 4, NGC 7. The last PCGS piece to sell in auction was way back in 1999! That coin brought \$25,300. That is a record 17 years! There have been 2-3 1804 dollars and 1913 Liberty nickels sold since then. The current Collectors Universe Value is \$25,000. How about a helping of "numismatic caviar"? LRCA is proud to offer this beautiful GEM PR half eagle. Incredibly RARE one of only 53 proofs struck for collectors, and this one is in the condition census for the date. There are an estimated 20 examples extant, several of which are impounded in institutional collections like the Smithsonian and the American Numismatic Society.

The surfaces show the highly desired orange peel texture in the fields, the well struck devices are bright gold and highly frosted. The mirrors beam from all over, they catch your eye from across the room. Even using a strong glass it will take some time to find even the smallest minor hairline anywhere.

PCGS 1, NGC 3. At NGC there are fewer than a handful of examples graded finer, 2 in PR66 UCAM, and 1 each in PR67 and PR68 UCAM. Do not let the embarrassment of riches that the 2015 ANA auction provided with TWO examples, a the Norweb-Trompeter NGC PR64 UCAM CAC which realized \$32,900 and a PR65* UCAM which realized \$35,250. These majestic rarities do not appear with much frequency, and when they do, collectors should not let the opportunity pass them by.

\$5 1892 PCGS PR65 DCAM EX BAREFORD

An amazingly rare PR \$5, one of only 92 struck and perhaps as many as 30 known today in all grades, including a number impounded in institutional collections and impaired pieces.

Deep, black mirrors reflect the light as a freshly cut sheet of ice. This date typically has weakness in the centers, a trait observed on most denominations and is common among PR \$5s. This GEM hails from the famed Harold Bareford Collection, one of the classic collections built in the 1930s-1950s and sold in several sales in the late 1970s and early 1980s. There are a couple of minor, microscopic lines that appear when the light hits the coin at various angles, but are not seen head on. David Akers noted that 1892 PR \$5s are "less often seen than proofs of some dates with lower mintages."

PCGS 1, NGC 0. In DCAM, PCGS has graded only two specimens higher. In August 1999, the sale of the Walter Childs Collection had an example that graded PCGS PR65 that sold for a resounding \$54,050, and that level stood as a record until the Trompeter NGC PR66 UCAM CAC sold for the same amount in the 2015 ANA auction. The Collectors Universe value is listed at \$47,500. This GEM will certainly appeal to the serious collector. Walter Breen, and others, referred to Proof Gold as "the caviar of numismatics" and it is not hard to understand what makes these incredibly rare coins so desirable. With its wonderful eye appeal, and great provenance, this coin will surely find a welcome home in any advanced cabinet.

\$5 1910-D PCGS MS64 CAC EX HARBOR VIEW

Deep gold color with blue and orange accents. Well struck and very attractive with satin luster. Close inspection reveals a few tiny ticks and giggles, but nothing that would keep this superbly original 64 from being CAC'd. Like most \$5 Indians, the 10-D is very rare in MS65 grade, putting a lot of pressure on choice quality MS64s like the one offered here.

PCGS 53, NGC 29, CAC 11. The last two CAC-approved PCGS MS64 coins to sell were back in March 2014, both selling for around \$10,000. The current CU value is listed at \$9,500, and we think this coin will certainly sell in that range. Keep in mind that a 65, if you can find one, will cost \$35,000-\$45,000. Opportunity knocks loudly here for any 20th century gold specialist.

\$5 1913-S PCGS MS65 EX HARBOR VIEW

The SECOND finest graded at PCGS! A major \$5 Indian rarity in such a fine grade and rarely ever seen in MS64 or finer grades, this coin is the only MS65 graded by PCGS, and has not sold since March 2000! There is a single PCGS MS66 finer. A very pleasing medium yellow-gold with accents of honey and wheat toning. The incuse details are fully rendered by a strong and exacting impression by the dies. The satiny luster swirls along both the obverse and reverse sides. The fields are generally very smooth and very clean. The look is very high end. Remember, since this is the only MS65 at PCGS, and one finer, only two sets of \$5 Indians can truly be GEM sets.

PCGS 1, NGC 1. PCGS has 1 and NGC has 2 in MS66. The last time a PCGS MS65 sold in auction, it realized \$77,625 all the way back in 2000. The NGC coin sold for \$72,250 in 2010. The PCGS Price Guide lists a value of \$155,000 in MS65. Keep in mind the PCGS MS66 sold for \$258,500 in the 2013 FUN Auction. If you missed out on the MS66 nearly four years ago, you now have a rare opportunity to buy the SECOND finest PCGS graded 13-S \$5. Once sold, who knows when you will have another chance to bid on another? If you are building a set of \$5 Indians or 20th Century gold this coin is a MUST HAVE! Opportunity is not only knocking, but it is using a battering ram!

Lovely orange-gold with pleasant rose overtones. The satin luster radiates all over and the strike is sharp. There are a few tiny lines and ticks, but none are distracting, and are completely acceptable for the grade. The eye appeal is bold.

PCGS 237, NGC 246. The most recent example to sell brought \$14,100 in September 2016, which was in an NGC holder. Before that a PCGS/CAC example sold in March 2016 for \$3,995. The Collectors Universe price is \$5,600. This near GEM has great appeal and is certainly worth a premium bid. Keep in mind a 64+ is worth \$7,000+ and the last MS65 sold in 2013 sold for nearly \$20,000!

\$5 1915 PCGS MS63+ CAC

Originality is the word to describe this super choice \$5 Indian. Rich golden color is thick and unmolested. A lovely, satiny mint frost accentuates all the well struck, incuse devices.

PCGS 919 (only 12 are +), NGC 671(11 are +), CAC 74 (combined 63 and 63+). Only two 63+ coins have ever sold at auction (neither were CAC); the most recent being a PCGS coin in September 2013 which realized \$1,880. The current PCGS Price Guide is a very low \$1,045. We think this coin should be worth more than the PCGS suggested price. Keep in mind a 64 will cost \$2,500 or more.

Great color! The satiny gold surfaces show orange-rose-pink hues when rotated in a light, especially on the reverse. For the grade, the surfaces are smooth and clean with no distracting marks or lines. The incuse devices are boldly struck and exceptionally well defined.

PCGS 119, NGC 70. The most recent MS64 was PCGS-graded and sold for \$8,225 in the 2016 ANA auction. The CU value is \$12,000. This is a very rare date in GEM grades, and the price jumps to about \$30,000 in 65. Indian Head \$5 are a very challenging set to build and this is a tough date to find nice.

\$5 1929 PCGS MS64 CAC

Nice! This rarity looks more like any commoner date than the key rarity.

The obverse is remarkably clean and satiny smooth. Ticks and scrapes are held to minimum. The reverse does have the usual ticks/lines in the dreaded right field. they are NOT serious and do NOT grab your eye. Most important, there is a strong luster which illuminates totally original even gold colors. There are NO spots or discolorations. Every detail is boldly struck and does stand out. The eye appeal is excellent!

PCGS 107, NGC 70, CAC 22. There are 8 graded MS64+ and a total of 10 coins graded MS65 as finest. The last PCGS CAC piece to sell at auction brought \$54,050 in September 2015. Do NOT be fooled by the pops, these are difficult coins to find choice and nice looking. This coin will make a great addition to any choice/GEM set. Note: CAC has beamed NO MS65's. If one did appear, it would cost at least \$100,000!

PCGS # 8533 | EST: \$45,000+

LOT 463

\$10 1801 PCGS AU55

A very attractive early \$10, with much better color, surface quality and eye appeal than generally seen for the grade. Most early \$10s have been dipped and stripped in an effort to get a higher assigned grade.

This coin is NOT one of those. We note some light directional hairlines on the surfaces suggest an ancient mild cleaning but in the subsequent years has had the chance to acquire a beautiful coppery-red patina around the devices. As your eyes wander over the surfaces, hint of a subtle magenta can be seen. The strike is strong and bold. There were two die marriages used in 1801, this is the more common BD-2, which is R-2.

PCGS 75, NGC 39. This is NOT the DiBello-Lupfer coin sold in the recent ANA auction for nearly \$20,000, nor is it the one that sold for \$16,450 in another session of the ANA auction. This lovely coin should sell for a premium because of its unmolested color and pleasing surface quality. The Collector's Universe price is \$20,500. Great for a wonderful type or date set.

PCGS 5, NGC 20. At PCGS there are only 4 coins finer; 3 in MS61 and one 62. The most recent PCGS AU58 sold for \$6,463 in the 2014 FUN auction. The PCGS Price Guide is listed at \$6,500. Keep in mind that a mint state coin would sell for between \$20,000 and \$30,000. This is a date that rarely appears in auction, and if you are building a set of \$10 Libs, this piece should be strongly considered.

\$10 1872-S PCGS AU55 EX SIMPSON-HALL

A tiny mintage of only 1,620 pieces, of which perhaps 40 to 50 exist today. This is one of the finer examples and certain to delight any date specialist. This is the plate coin used to represent this issue on the CoinFacts website. Deeply reflective fields as the dies never lost their polish when striking so few circulation strike coins. Moderately abraded as the delicate mirror fields show the slightest circulation nicks with ease. Nevertheless, the marks blend into a happy and natural arrangement and the bold devices overpower their presence. Flashy yellow gold with a dash of peripheral copper tints. One of the toughest issues to find in any grade!

PCGS 7, NGC 28. Only 4 are graded higher (all AU58) and there are NONE in Mint State at PCGS. This coin last sold in our September 2015 auction, where it realized \$12,925. The current CU value is listed at only \$7,000, but we think this coin is worth substantially more. The last PCGS AU58 sold 20 years ago! The Liberty \$10 series is full of rarities, both absolute and condition. It is a challenging series to collect, and this was the one that PCGS-founder David Hall chose to include in his set; a provenance like that tells not only of the value, but the difficulty he had to find a high grade piece.

Within the Condition Census for the date, this near-gem shows a glowing golden luster with a muted orange-gold tone throughout. The devices are boldly struck and displays a fantastic look. We noted a scattering of light ticks that hold the grade back, but the overall look is great.

PCGS 73, NGC 195, CAC 10. Keep in mind that only 6 PCGS coins and 1 NGC coin is graded 64+. The CAC approval rate is exceptionally low, revealing several factors: CAC is tough on gold; there is clearly duplication in the pop reports; and finding a CAC-approved example is very tough. What is also clear is that only 4 coins are graded finer at PCGS. The most recent MS64+ was an NGC/CAC coin that realized \$5,875 in June 2013. The most recent PCGS MS64+ was sold in April 2012 for \$3,450 and was not CAC. The current CU price is \$3,500 and keep in mind that if you can locate one of the 2 MS65s, you will have to spend \$10,000.

PCGS 7, NGC 10. There are only two MS66+ and 1 MS68+ finer. Put that in perspective when compared with the 204 1901-S \$10s graded at PCGS. The last PCGS MS66 to sell in auction was CAC approved and sold for \$8,519 in February 2014. Although not CAC, this GEM is beautiful and will please most collectors of gold coins.

This coin just sold in our Regency 18 sale and is Ex Flannagan. We described it as "Brilliantly lustrous and crisply struck GEM quality surfaces do not display any issues except for a stray line or two. The color is a rich honey-gold with hints of rose patina. A spectacular example for the grade. Totally fresh, this coin has been off the market for at least 2 decades.

PCGS 244, NGC 325, CAC 57. The last PCGS MS65 CAC realized \$8,519 in October 2015, and prior to that they were bringing over \$9,000 in auction. PCGS lists a value of \$8,250. Keep in mind how fresh this coin is when figuring your bid!"

It realized a very strong \$9,400. Our consignor bought this coin out of the sale, and recently "traded up" for the MS66+ that our sister company Legend Numismatics had for sale. Very rarely do such GREAT coins reappear so soon after being sold. We think that it is a rare opportunity if you missed this GEM in September, you can now vie for it again. Good Luck!

Satiny and lustrous, displaying a better than generally seen overall look. Both sides are well struck and the color ranges from pale wheat gold to rich honey gold. Close inspection reveals a few light scratches in the obverse field. Otherwise the coin is pleasing and clean. The 08-D No Motto has always been an underrated date, usually seen in MS60-63; coins graded MS64 and up are rare.

PCGS 50, NGC 30. Most recently these have been selling in the \$10,000-\$12,500 range, and CAC-approved examples sell for \$20,000+. While not CAC, this MS64 is more eye appealing than most, and should sell for a premium price. The current PCGS value is listed at \$17,500 and since MS65s would sell for \$35,000 or more, MS64s are about as high a grade as most collectors could hope to own.

A radiant mint luster swirls on both sides of this near GEM 10-S \$10. Rich orange-gold color throughout with brilliant, lustrous cartwheels and accents of pinkish-rose. The feathers in the headdress and on the eagle are fully struck and crisply defined. Like many dates in the series, it is common in low grades, but in Mint State, they are rare. In MS64 they are especially rare, and in GEM, they are excessively rare. The overall eye appeal is great, and only the slightest little marks are noted, using a strong glass to find them.

PCGS 33, NGC 18. There are only a half dozen coins graded finer at PCGS, two each in 64+, 65, and 66. Due to the rarity of this date in higher grades, there may well be some duplication at the services in this grade, trying to get a PQ coin into a higher grade holder. The last PCGS graded example was sold in October 2016 for \$8,525. The PCGS Price Guide is listed at \$16,500, which seems reasonable, considering that the last 65 sold in auction a decade ago, realizing \$52,900. PCGS 284, NGC 283, CAC 34. This one is exceptionally bold.

It is important to note that the last time a PCGS/CAC coin sold was in July 2013. The most recent PCGS example sold for \$3,290 in August 2016. The current CU value is listed at \$3,800 and keep in mind the value doubles going up to MS65.

This is a very nice example of a much tougher date to find in the higher grades. Overall, the surfaces are pretty clean. If you need to find a few marks or scuffs you have to look really hard—they do stand out like normal for this date. A strong luster shows off even deeper original gold color. There are no spots or discolorations. Miss Liberty and the details are lightly frosted and have sharp strikes. The eye appeal is nice!

PCGS 54, NGC 36, CAC 25. PCGS possibly has graded 24 in MS64+. That's not a mistake. The last one to sell in auction brought \$12,402 in October 2015. The current Collectors Universe value is \$13,500. NOTE: An MS65 would easily hit \$30,000.00+ if one showed up. A few years ago, a small group was found. Of the 24 graded, we'd guess less than half would really be acceptable as a real +. Regardless, you do NOT see this date or grade offered in any real frequency. If you are building a set of \$10 Indians, now is a great time to add a tougher coin like this.

All we can see that keeps his superb piece from a full MS65 designation is a small frost break/very light scuff on the right obverse. Overall, the surfaces are super clean and have a satiny smooth texture. This coin is not NOT whacked up. The surfaces do display an really neat "thick satiny" luster. A seductive super slider of this RARE overdate variety. This GEM AU is just a hair's breadth from a full MINT STATE grade. The wear is imperceptible. Boldly struck throughout every detail is fully embossed. Only a few tiny, stray ticks and giggles are totally acceptable for the assigned grade. The satiny lustrous surfaces are a pale, wheat-gold color with slightly honey gold.

Like many overdates, the variety was not discovered until the 1950s, and it is currently a controversial issue, with some who say it is a true overdate, and others that do not. PCGS now certifies them as 5/2' recognizing that there is something under the 3. Experts have said that the eye appeal of this variety is often below average for the Type 1 \$20, but the presently offered example has a bold visual appeal better than usually seen.

PCGS 22, NGC 44, CAC 11. Only 2 are graded 58+ and there are eight graded higher, the finest being MS61. This is NOT the one that sold in May 2015 for \$30,055. An important Civil War era issue, that is amazingly original and unmolested. A wealth of mint frost throughout and beneath the golden patina, we see hints of reflectivity in the protected areas. We note only the slightest hint of friction in the fields and on the highpoints, but both sides are free of any distracting marks. The golden color is rich and display an attractive original "crust" that is highly coveted by specialists, suggesting that no one has messed with the surfaces. An unfortunate truth in the market is that in an effort to receive the highest possible numeric grade, original surfaces have been lost forever to conservation or doctoring; many Type 1 \$20 Libs have had this fate befall them. This GEM AU is a very pleasing exception.

As the war between the states raged on in the east, the future of the country was at times in doubt, as the south had an upper hand in the hostilities until the week of July 4th, when major Union victories at Gettysburg and Vicksburg began to turn the tide. Gold and silver, which had all but disappeared from daily commerce in 1861 and 62 continued to be hoarded, and even the lowly copper-nickel cent was being hoarded to the point that countless 1-cent tokens had to be privately issued to facilitate everyday transactions. While the mintage of 142,790 double eagles was higher than the previous year, it paled in comparison to the nearly 1 million \$20s that the San Francisco mint churned out in 1863.

PCGS 15, NGC 29, CAC 8. Do not let the PCGS/NGC pops fool you, these are scarce, the last PCGS coin selling in auction nearly two years ago, at the 2015 FUN auction. There has not been a CAC-approved coin sold since an NGC coin sold in August 2013. The last PCGS-CAC coin to sell was back in July 2013, realizing \$24,675. There was a non-CAC approved example sold in the 2014 FUN auction for \$30,550. The current

PCGS Price Guide value is \$29,000. Civil War era coins, particularly the gold coins, are always a popular collectible, desired by serious numismatists, as well as casual collectors. \$20 1873 OPEN 3. PCGS MS62

Pleasing and original medium gold color sparkles with a satiny mint luster and a bold strike. Perhaps wiped long ago, with some unobtrusive directional hairlines in the field in front of Liberty's portrait. One of the more common Type 2 \$20s, but rare any finer.

PCGS 1196, NGC 884. The last one to sell was an NGC coin, which realized \$1,998 in a September 2016 internet auction. Non-CAC PCGS coins have sold in the \$2,100-\$3,000 range in 2016.

\$20 1908 NO MOTTO. NGC MS67

Swirling frosty mint luster is radiant throughout the satin-smooth superb gem. Very pleasing rich orange-gold patina accents the boldly struck devices.

PCGS 877, NGC 1177. Most of these trace their pedigree to a hoard of 9,900 coins that was dubbed the "Wells Fargo Nevada Hoard" when they came out in the early 1990s. These were all spectacular coins, including a small number that graded MS69! This is the only generic date in the series that will cost under \$10,000 in MS67. The current PCGS price is \$6,500 and when they appear in auction, they generally sell in the \$5,000-\$6,000 range.

PCGS # 9142 | EST: \$5,000+

LOT 485

\$20 1923-D PCGS MS66+ CAC

This is what a GEM Saint looks like! The rolling cartwheel luster accentuates a medium golden luster. The surfaces are smooth and clean; free of any distracting marks, lines, or haze. The devices are completely struck up, offering bold definition. The eye appeal is remarkable.

PCGC 1700, NGC 919, CAC 247. There are 81 that PCGS has graded MS66+. The most recent PCGS/CAC example realized \$4,935 in April 2016. Keep in mind, if you can find a PCGS MS67 CAC (there are only 12), it would likely cost you around \$20,000! Add this great coin with most of the eye appeal for a fraction of the cost!

PCGS # 9176 | EST: \$3,800+

LOT 486

\$20 1925-S PCGS AU58

Only the slightest hints of wear on the highpoints and the fields. A rich golden-orange tone throughout both sides of this scarce date Saint. Some gloss on the highpoints and we note a few light ticks scattered about. Despite a generous mintage, the vast majority was melted in the 1930s after FDR issued his gold recall. Any example that escaped that fate was a happy happenstance. More recently small groups have been repatriated when gold reserves from European and South American bank holdings making this date a little less rare than once thought. Still scarce in all grades and always in demand.

PCGS 91, NGC 105. The current PCGS price is \$7,000 and the last one to sell was CAC approved and realized \$5,875 in December 2015. AU58s appear only a few times a year at most, and none have sold in 2016 yet. This is a pleasing coin and will fit in nicely among other key date Saints in 58.

LOT 487

50C 1936-D CINCINNATI. PCGS MS67 CAC

A light pastel iridescent toning is brought out by a rich satin luster. The surfaces are essentially flawless, only a powerful loupe reveals a light tick or two.

Only 5,005 were struck. PCGS 59, NGC 42, CAC 28. The most recent example to sell was the Scher-Young coin, realizing \$2,820 in April 2016. That coin had beautiful toning, a tad more bold vibrant than the presently offered superb GEM. The current PCGS Price is \$2,500.

PCGS # 9284 | EST: \$2,200+

LOT 488

50C 1936 CLEVELAND. PCGS MS67 CAC

This is a coin that rarely comes attractively toned like this. Deeply toned in shades of green, hues of rose, and accented by a coppery and gold patina, the obverse is memorable. Under a light the satiny mint bloom sparkles from below the layer of color. By contrast, the reverse, save for a touch of autumnal gold at the extreme periphery is untuned and frosty. Both sides are immaculate.

PCGS 86, NGC 77, CAC 44. Only 12 are graded MS67+ and there is a single MS68 at PCGS. The last two PCGS/CAC coins to sell in auction had a dappled, uneven tone to them, realizing \$1,998 and \$1,880 respectively. A more evenly, but not as interestingly toned coin sold in our December 2015 Regency Auction for \$2,174. A PQ coin worthy of a premium bid from the toned commem specialist.

PCGS # 9288 | EST: \$1,750+

LOT 489

50C 1922 GRANT. PCGS MS66

A beautifully toned GEM Grant half. The reverse rim is toned with a dramatic sunset orange that fades to iridescent at the center. The obverse is attractively toned with subtle blue, gold, and olive. The luster is bold and satiny and the strike is full.

Both sides are very attractive and well suited for any GEM toned commem set.

PCGS 298, NGC 219. There is a wide range of APRs for toned MS66s graded by PCGS and this one should realize a premium price when it crosses the block.

LOT 490

50C 1946 IOWA. PCGS MS68 CAC

LRCA is proud to offer this SUPERB Iowa half, the third such coin this year. The toning reminds us of driving into New England in mid-October, the all the colors that the autumnal leaves turn are present on both sides. A sleek satin luster. Sharply struck and exceptionally well cared for over the last 70 years, clearly the owners took great care of this coin over the years.

PCGS 86, NGC 66, CAC 45. These figures include those called MS68+. The most recent MS68 sold for \$1,880 in September 2016, that one was blast white and untuned. The presently offered example should sell for a strong price based on the superb eye appeal. The CU price is \$2,000. If you are building a superb set of toned commems, take a look at this SUPERB coin.

LOT 491

50C 1918 LINCOLN. PCGS MS67+ EX LARRY SHEPHERD COLLECTION

A spectacular SUPERB GEM Lincoln. A brilliant luster swirls over essentially flawless surfaces. Pleasing pastel iridescent toning graces both sides, giving depth to the well struck devices.

PCGS 137, NGC 81, CAC 48. Only 24 are graded MS67+ with a mere 3 coins finer. The most recent sold for \$3701 in September 2016 and it was not as pretty as this coin. There was one with spectacular, more even pastel toning that sold for \$12,925 in the 2016 ANA auction. This coin should sell somewhere in between. Keep in mind that the last MS68 to sell was nearly a dozen years ago in the 2005 ANA auction, realizing \$43,700. This is a great opportunity for the advanced commem collector!

LOT 493

50C 1934 MARYLAND. PCGS MS67+

Tied for FINEST PCGS-graded Maryland! Velvety smooth surfaces display a beautiful, original patina imparted from long term storage in an old envelope or album. The obverse shows concentric rainbows at the rims, that deepen to a coppery gold in the central portions of the design. The reverse is beautiful and highly lustrous, the color is a tad more subtle, but no less eye appealing.

PCGS 7, NGC 6. Only four NGC coins are graded MS68, none are finer at PCGS. None of the MS67+s have ever sold at auction; the most recent PCGS MS65 to sell brought \$3,995 in August 2016 and an NGC MS68 sold back in February 2009 for \$8,625. When you look at this superb gem you will fall in love, and we know the PCGS value of \$3,500 is WAY too low.

PCGS # 9328 | EST: \$7,000+

LOT 492

50C 1920 MAINE. PCGS MS67 CAC

A satiny SUPERB gem that displays a thick golden tone on the reverse and a pale, iridescent accent on the obverse. Well struck and very pleasing and original. The surfaces are exceptionally clean! Keep in mind that this PQ coin is among the finest graded by PCGS so if you are building a top-flight set, you need this coin!

PCGS 49, NGC 40, CAC 29. Six of the PCGS coins are 67+, none are graded finer. Nothing higher than 67 has ever sold in auction and the last PCGS MS67 CAC to sell in auction was in our May 2016 auction, which was blast white, and sold for \$3,642. The current PCGS Price Guide value is \$4,500. If you are building a hand selected collection of Maines, be sure to take a good look at this superb coin and figure a generous bid.

PCGS # 9326 | EST: \$3,500+

LOT 494

50C 1938 NEW ROCHELLE. PCGS SP66+ CAC

A very rare variant to the New Rochelle half dollar. During the production run, mint employees struck 50 examples on polished planchets after polishing the dies. What keeps them from being full PROOFS, is that each coin was struck only once, rather than two or more times as required for striking proofs. As expected for the 66+ grade level, this coin has no hairlines, ticks, marks or carbon spotting. The strike is full and the fields are fully PL and display deep mirrors.

PCGS 3, NGC 6, CAC 3. PCGS only began recognizing these special strikes in 2015, so none of the PCGS coins have ever sold at auction. While the current CU value in SP66+ is \$8,500, an NGC SP66 sold in our Regency XVII auction in May 2016 for \$10,575 and a PCGS SP67 sold for \$17,625 in our September 2016 Regency Auction. Opportunity knocks loudly here if you missed either of those great coins. Truly a prize for the advanced commem collector!

PCGS # 99335 | EST: \$10,000+

LOT 495

50C 1936 OREGON PCGS MS68 CAC

This is a gorgeous and beautifully toned Oregon Commem. When you first see it, it will mesmerize you! Besides the remarkable quality, it has dazzling pretty colors.

No question this coin was carefully saved since the day it left the Mint. The surfaces are totally perfect; even using a strong glass you will still shake your head as to how clean they are. A bold luster enhances the totally original envelope toning (that's the way they came). Beautiful rings of gold/pale green/purple frame the peripheries and open into light gold centers. All the details are well struck and the eye appeal is fabulous!

PCGS 8, NGC 7, CAC 12 (we're sure there are dupes here).

The piece last sold for \$8,108 in January 2016 (in a weak auction), and one prior hit \$11,162 in September 2015. This SUPERB toned GEM last sold in our December 2015 Regency auction, selling for \$9,694. The piece that sold for \$8,108 in January 2016 was not nearly as nice-and had NO color (which makes a huge difference). A coin worthy of a inclusion in any great collection and a strong bid for sure. Good luck

PCGS # 9345 | EST: \$7,500+

LOT 496

50C 1939-D OREGON PCGS MS68 CAC

Oozing with marvelous toning and originality. This is probably the most original and remarkable example of this date that the cataloger has had the pleasure to describe. Clearly this coin sat for ages in an old cardboard album (Wayte Raymond or similar), and the combination of time and Mother Nature's paint brush worked miracles on this SUPERB GEM. The obverse has swirling rainbows throughout the design, while the reverse has a rich autumnal burnt orange crescent and brilliant silver in the center with a light dusting of dappled russet. The lustrous surfaces and boldly struck devices are without flaw. What a delight it is to marvel at the obverse colors!

PCGS 28, NGC 34, CAC 25. There are 14 total MS68+ coins between PCGS and NGC included in the figures. NONE ARE GRADED MS69. For beautifully toned examples, throw the price guides away! A colorful, tab style toned NGC MS68* CAC sold in August 2011 for \$12,650; a very pretty, yet not as vibrantly toned PCGS MS68 CAC sold for \$9,200 in January 2011; and a similarly toned example to the presently offered coin sold for \$17,250 back in the 2010 ANA auction. To put those premiums in perspective, the last PCGS MS68 CAC untuned coin sold for \$3,525 in March 2016. This beauty should give the 2010 ANA specimen a run for its money. If you specialize in MONSTER TONED commems, this is an opportunity that should not be missed!

LOT 497

50C 1939-PDS OREGON SET. PCGS MS65

The P and D mint coins are CAC, the S is not. All three coins are well matched with a pearly-silver coloration and a soft satin sheen. Only 3,005 sets were distributed to collectors. The total PCGS Price Guide value for the set is \$1,725, and this set is PQ so it is possible that it will bring more!

PCGS # 99999 | EEST: \$1,500+

LOT 498

50C 1935 TEXAS. PCGS MS68

A spectacular SUPERB GEM that is without a single flaw, anywhere! Abundant frosty mint bloom dances in the light on both sides. Well struck throughout, especially on the busy design of the reverse. A narrow arc of rainbow on the upper-right obverse periphery and a dusting of gold on the reverse rim adds to the visual allure.

PCGS 9, NGC 15. NONE ARE GRADED FINER at either service. Only 2 examples making three appearances have sold in auction since March 2006, all bringing between \$11,000 and \$13,500. The current PCGS value is \$11,000. This pretty coin should see an explosion of bidding activity when it crosses the block.

PCGS # 9382 | EST: \$7,500+

LOT 499

1C 1858 J-208 PCGS MS64

A very popular "transitional" pattern that is just as important for advanced collectors of Indian Head cents, as well as pattern collectors. The J-208 is known to have been struck from two different sets of dies, this one being the more common one being listed as P-259; it features the date well centered in the field below the bust and a wreath containing clusters of 5 leaves and is struck on a copper-nickel planchet. The presently offered MS64 has a brilliant tan luster with hints of rose-gold. The devices are well struck and overall the quality's pleasing.

PCGS 14, NGC 17. Here is a great entry level pattern coin. If you have thought about adding a pattern or two into your collection, this one is approachable. It offers a popular design that WAS adopted for general circulation the following year and a price point that is not intimidating. While common for a pattern, there has not been a MS64 sold since January 2009 (an NGC coin). The last PCGS MS64 sold for \$1,955 back in August 2007 and more recently, a PCGS/CAC MS63 sold for \$3,525 in the January 2016 FUN sale.

PCGS # 11884 | EST: \$1,200+

LOT 500

1C 1858 J-212. PCGS PR63 CAC

A very cool Indian cent pattern, dated a year before the start of the Indian cent series, and featuring a reverse similar to that adopted in 1860, with an oak wreath and shield at the top. The shield is a bit fancier in style to the one adopted, and in this cataloger's opinion the more interesting option. Like the J-208, there are a couple of die marriages for this number, this one being P-263, with the date set centered in the field below the bust. It is the more available of the two. Struck in copper-nickel and rated as R-5. Pleasingly original and unmolested, the surfaces have a light film from storage that slightly subdues the reflectivity, but the mirrors are there, and can be seen on the reverse especially. Well struck, with all the details of the wreath and Indian fully defined.

PCGS 33, NGC 17, CAC 2. Going back to 1992, PR63 examples of J-212 have sold in the \$1,000-\$2,000 range, the most recent PCGS-graded coin to sell was in November 2013 for \$1,645, and that coin was not CAC. The PCGS Price Guide suggests a value of \$1,700, which makes sense. If you are an advanced collector of Indian Head cents, this pattern will fit nicely into your advanced set. Also, if you have pondered buying a pattern or two, this is a cool design at an inviting price point.

PCGS # 11895 | EST: \$1,200+

LOT 501

1C 1858 J-198 PCGS PR65

A scarce pattern, listed as R-6-, and related to the Indian Head patterns, as this Flying Eagle pattern was included in the 12-piece sets that were sold to collectors. About a dozen are known, this being among the finest graded by PCGS. The obverse is the regular issue large letters obverse, and the reverse is similar to the adopted 1860 except the shield is the ornamental variety. Struck on a regular copper-nickel planchet. The golden-tan C-N planchet has nice reflectivity and the devices are boldly struck. A blush of deeper copper can be seen on both sides and adds a little depth to the design. The fields are smooth; devoid of any distracting hairlines or marks.

PCGS 4, NGC 1. There is a single PR66 finer. None have sold in auction since November 2013, where one realized \$6,900. The current CU value is listed at \$6,500 and the 10th Edition of Judd suggests a retail value of \$7,500. If you have completed a set of PR Flying Eagle cents and want to add something interesting to it, consider this GEM FE pattern.

PCGS # 11856 | EST: \$6,000+

LOT 502

1C 1858 J-213 PCGS PR65 CAM

Another very popular transitional Pattern small cent, featuring the Indian Head portrait obverse adopted in 1859 mated with the wreath reverse utilized in 1858; struck in copper with a plain edge. This is a Rarity-5 pattern. Boldly reflective mirrors show off a very pleasing orange-tan patina. Crisp and fully struck throughout both sides, the eye appeal is tremendous and is not impaired by a few tiny flecks or light lines.

PCGS 1, NGC 2. NO CAMs have ever sold at auction. This is the PCGS CoinFacts plate coin, and with a CAM designation, the CU Price Guide does not assign a value. In regular PR65, the estimated value is listed at \$5,750, and the last example to sell was an NGC coin that sold in April 2009 for \$2,990. The most recent example of this Judd number sold was a PR63 in October 2016 realizing \$4,700. This GEM is so cool and would make a great addition to an advanced Indian Head cent collection or a cool way to start a collection of patterns.

PCGS # 517484 | EST: \$3,000+

LOT 503

1C 1858 J-213. PCGS PR64

Here is another cool Indian Head cent pattern, struck in copper-nickel, that was part of a 12 coin set of transitional patterns struck as a replacement for the Flying Eagle cent. This one features the Indian Head obverse with the cereal wreath reverse then in use. Like the other patterns in the set, there were combinations of dies used, this one with a Low Date, there are two Pollock numbers assigned to these, with a combined estimate of about 18 known.

This coin may have been wiped long ago to remove some light accumulated film, we note some very light hairlines. The reflective surfaces can be seen in the light, and the strike is bold throughout, especially on the reverse which is known to be weakly struck at times.

PCGS 20, NGC 12. Remember that the J-213 is represented by 4 different die marriages, which gives it an overall rating of R-5.

The Low Date varieties are scarcer, perhaps R-6 or R-6+. The last PCGS PR64 to sell realized \$1,998 in March 2015, and was a part of the Q. David Bowers Reference Collection. That price seems awfully low, considering that a PR63 sold in the 2012 ANA auction for \$3,450, and the CU Price for PR64 is \$3,750. Another cool pattern destined for an advanced Indian Cent collection.

PCGS # 11897 | EST: \$1,300+

LOT 504

1C 1859 J-228. PCGS MS64 CAC

A perennial favorite among Indian cent collectors, this common pattern utilizes the obverse of 1859 with the reverse of 1860 and struck in copper-nickel. This very choice, nearly GEM example is very well struck with a brilliant golden-tan luster, with pinkish highlights. There are no spots or flecks to be found anywhere on either side. Very pretty!

PCGS 121, NGC 39, CAC 11. The most recent auction coin to sell was in April 2016, realizing \$3,760, but there is a wide range of APRs over the recent years. The PCGS Price Guide value is \$1,850, which seems a little low. More than pattern collectors, we think that the advanced Indian Head cent collector will want to add this jewel to their sets.

LOT 505

5C 1866 J-470 PCGS PR66

This super neat looking George Washington portrait Nickel Pattern is a R-6 (13-30 minted). Superb surfaces have moderate mirrors. There is good clarity, cleanliness, and the reflection is good. The quality no doubt is VERY HIGH END. Even using a strong glass there are NO spots or problems to be found. The color is a totally original nickel. Washington's bust and every detail have light frosting and are fully struck. The eye appeal is fabulous!

PCGS 3, NGC 0. NONE ARE GRADED FINER AT PCGS! This coin was auctioned back in August 2014 for \$5,581, housed in a first generation PCGS PR65 CAC. The collector who bought it has changed his mind about doing Washington Pattern set and thus has consigned the coin to us. Since the time it last sold, it has been upgraded. The last PR66 sold nearly two decades ago! It really a neat to see this design that never became full legal tender, and while that collector changed his mind about doing a Washington Pattern set, that would be a very cool project to attempt!

A tough R-7- Standard Silver pattern quarter struck in copper with a plain edge. Well struck and pleasing mellow red mirrors. We note a few minor toning flecks and a tiny line or two, but none too distracting.

PCGS 1, NGC 0. The most recent auction appearance of this coin was over a decade ago in the 2006 FUN auction, realizing \$2,990. More recently a PCGS PR65 RD CAC sold for \$3,525. The current CU price is \$3,500. If you are interested in pattern coinage, there is a wide range of variation in the Standard Silver series, and many are rare but affordable. A majestic example of this really neat Longacre pattern cent. Sharing nearly the exact design of the then current 3CN, just struck on a more narrow nickel planchet. Rated as a Rarity-5. Exceptionally deep quicksilver like mirrors shine in the light. The devices are exceptionally well struck and highly contrasted relieves and fields. The eye appeal and technical quality are superb and high end!

PCGS 1, NGC 5, CAC 3. NO CAMEO examples have ever sold in auction, except for a PCGS PR67 CAM CAC which sold for \$8,050 all the way back in March 2011. This exceptional high grade coin should attract serious attention.

50C 1869 J-744 PCGS PR64 RB CAC

Another R-7- Standard Silver pattern, struck in copper with a reeded edge. Watery, reflective mirrors sport a pleasing blue overtone on the PR red surfaces. There is a slight weakness of strike in the central portions of both the obverse and reverse, but that is consistent with other examples that have sold. Overall the quality is quite nice and there are fewer than a dozen examples known.

PCGS 2, NGC 0, CAC 1. The last PCGS example in PR64 RB to sell was back in July 2003, realizing \$2,530. A PR63 RB last sold in 1996 and the last PR65 RB sold in 1993. There are no APRs for RDs, and a BN sold for \$2,185 11 years ago. The current PCGS Price Guide lists a value of \$4,800. This is a MAJOR opportunity for the advanced pattern collector!

50C 1869 J-755. PCGS PR65 CAC

A beautiful Standard Silver pattern, struck in silver with a plain edge, rated as R-6+. Watery reflective fields shine like a freshly frozen pond. Beautiful blue and burnt orange patina at the periphery lighten to gold and silver at the centers. The surfaces are smooth and the mirrors are of awesome quality. Liberty wears a headband with a single star in front, her hair both in a bun and flowing down to her shoulder. A ribbon inscribed IN GOD WE TRUST below. The reverse shows a wreath of olive and oak branches, STANDARD SILVER above and the denomination within. The date below.

PCGS 3, NGC 1, CAC 2. This is an exceptionally hard to find variety, the last PCGS example in this grade to sell was back in October 1992 (where one sold for \$3,740 at a Superior Auction). None have sold in any grade since 2013; the most recent PR65 was back in February 2008 when an NGC coin sold for \$6,325. A PCGS PR64 CAC sold for \$3,220 in March 2012. Collectors Universe estimates a value of \$4,500. 10C 1870 PCGS J-827. PCGS PR65 RD CAM

A spectacular GEM example of this R-7- (fewer than 12 known) Standard Silver pattern dime featuring Barber's Seated Liberty design, struck in copper with the a reeded edge.

Deep reflective mirrors show bold contrast against the reliefs. A subtle reddish-violet and rose patina seems to float on an icy lake of brilliant coppery mirrors. The devices are fully struck up and fully and crisply defined. The fields are generally very clean, free of all but the most insignificant ticks; most of which are mint made (a couple of microscopic lint marks, die lines, and planchet flakes). The visual allure is strong and among the finest for the Judd-827 extant.

PCGS 1, NGC 1. We believe that this is represents the same coin. The only time the NGC PR65 RD CAM sold was in July 2009, realizing \$4,025. Collector's Universe does not list a value for this coin/grade in their price guide. This is another cool Standard Silver pattern that we are offering in this sale. OUR ESTIMATES

The estimates you see published in this catalog are just that: estimates. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

50C 1870 J-955. PCGS PR66 CAM CAC

This is an exceptionally RARE Standard Silver pattern half dollar struck in aluminum with a reeded edge. The bust of Liberty sports a tiara, not a cap and is not adorned with any stars. The open "agricultural" wreath has the denomination and date inside on the reverse. Listed in Judd as an R-7+, with an estimated half dozen examples known. Free of all but the most minute, insignificant lines or marks. The mirrors are bold and deep, the devices nice and frosty.

PCGS 1, NGC 0, CAC 1. This is the PCGS CoinFacts plate coin. It is the finest certified by either service and the quality is the best that can be expected. Standard silver issues are quite diverse with lots of varieties, designs, compositions, and denominations. Because of the diversity it is a series that can seem overwhelming to specialize in.

EX DENALI COLLECTION**

A Rarity-7+ Standard Silver pattern quarter, struck in aluminum with a reeded edge. This variety shows a capped head of liberty with 3 stars and a wreath of oak and laurel. This coin is a true GEM, deeply contrasted surfaces. White toning on the reflective aluminum on both sides. Well struck and pretty. This pattern was struck for inclusion in sets of off metal strikings and sold to contemporary collectors and other VIPs with connections at the mint.

PCGS 2, NGC 0, CAC 1. With the exception of the Bob Simpson Collection, the Denali Collection was one of the most advanced collections of Standard Silver coins ever assembled. There are no accurate APRs, as PCGS CoinFacts is reporting figures this coin was "bought back at." This is an exceptionally RARE variety, perhaps as many as a half dozen exist in all grades.

1C-\$1 1880 8-COIN PROOF SET

Here is something you rarely see anymore: an intact early proof set. Our sister firm, Legend Numismatics used to call original early proof sets "the final frontier of numismatics" an area that was undervalued and underrated. In the old days, you could find original proof sets in auction with some frequency, especially in the days before grading and registry sets. Today, in an effort to maximize sales prices, if original sets are brought to market, they are instantly broken up. Some people will try and reassemble these sets to commemorate a relative's birth year or some other event; but again, when the time comes to "cash in" the sets are broken up. Legend Rare Coin Auctions is pleased to offer this GEM 1880 Proof Set, which for the most part looks like it could have been together since time of minting. The set contains:

This Proof Set is certainly worthy of a premium bid. The well matched coins are for the most part PQ and eye appealing. If you were to go out into the market and search for each individual coin to try and replicate the set, it would take years. The effort has all been done for you. The combined Collectors Universe value for the eight coins is \$53,275, and in some cases, because of the amazing appeal, if offered individually, some of these GEMS would far exceed the assigned CU value. There are likely not many sets still out there "in the wild" so the presently offered SUPERB GEM 1880 PR Set should attract considerable bidding. Good luck!

1C-\$1 1880 8-COIN PROOF SET

1C PCGS PR66 RB CAC

Highly reflective copper mirrors show off a stunning magenta, brick, violet tone. PCGS 32, NGC 30, CAC 11.

PCGS # 2328

3CN NGC PR67 CAC

Brilliant nickel surfaces show reflective touches in the fields. Hints of gold and attractive. PCGS 47, NGC 57, CAC 19..

PCGS # 3776

5C PCGS PR66 CAM

Pale iridescence over watery-reflective fields. Perhaps the cameo contrast was a bit soft for CAC. PCGS 84, NGC 53.

PCGS # 2328

10C PCGS PR66

Watery-reflective fields with some mauve/azure toning on the both sides. The surfaces are well preserved. PCGS 29, NGC 33.

PCGS # 4777

25C PCGS PR66 CAC

The mirrored fields beam from all over on this superb gem. Similar toning to the dime, but with a touch of rose. Very pretty. PCGS 37, NGC 24, CAC 7.

PCGS # 5581

50C PCGS PR66

Very similar look overall to the quarter above, but the toning is a touch darker and displays a more vibrant teal in place of some of the pretty rose. PCGS 17, NGC 26.

PCGS # 6441

T\$1 NGC PR67

Vibrant mirrors are stunning and clean, offer a clarity that few toned PR Trade dollars can rival. Free of all but the most insignificant light line or two. Magnificent toning covers both sides with shades of sea-green, teal, fiery-orange, gold, and varied blue. Very eye appealing. PCGS 3, NGC 16.

PCGS # 7060

\$1 PCGS PR67

Wow. This SUPERB gem PR Morgan is a borderline CAM! The devices, especially Liberty's portrait, are frosty and contrast nicely against the deeply toned mirror fields. Similar in toning to the quarter and half dollar, this stunning gem has tremendous eye appeal. PCGS 27, NGC 27.

1C-\$1 1892 PROOF SET. PCGS PR65-66

An extraordinary opportunity for the astute numismatist as original, matched Proof Sets from this period are extremely rare. Virtually all were broken up long ago. Here is one of the very few that survived intact, and not only intact, but with each coin retaining the gem level of preservation!

It would be hard to imagine a more original and desirable 1892 Proof Set. These coins have obviously been held and stored together since the time of issue, acquiring exceptionally rich toning in their long journey on the silver pieces. What remains of considerable interest is the high quality of the set, which confirms these coins were carefully handled, if ever handled, with the greatest care to retain such exceptional quality. We doubt more than a handful of the 846 minted sets still exist! This is a dazzling set and an incredible opportunity.

1C PCGS PR65RB

Glorious and fiery golden red shades blend with violet hues on the devices. A few trivial specks are present but the eye appeal and colors are simply astounding.

5C PCGS PR66

Boldly reflective mirrors fall away from the frosty devices. A thin veil of original toning is present, a testament to the originality of this set. Free of any signs of contact and a delight to behold.

10C PCGS PR66

Classic royal blue blends with tinges of greenish iridescence on both sides, of course this is the first year of issue of the new Barber series, and this gorgeous gem shows perfect striking matched with careful preservation.

25C PCGS PR66

Perfectly matched to the dime, and the other silver denominations in this set with an eye catching blend of blue, green and gold that flashes with reflectivity when examined.

50C PCGS PR66

A mate to the other Barber coins in this set with deep watery fields that surround the frosted devices, bathed in flashy blue toning with a dash of lilac and russet to the centers. Incredible surfaces continue with this half dollar.

\$1 PCGS PR66

opping off this original set is the Morgan Dollar, again the toning is a rich blend of royal blue, lilac russet with tinges of bright gold. Watery reflectivity is apparent when examined, and free of any detractors. The strike on this Morgan Dollar is absolute and precise.
